Tadeusz Morzy • Marek Rusinkiewicz
Editors

Handbook on Data Management in Information Systems

With 157 Figures
and 9 Tables

Springer

Contents

Foreword	V
1. Management of Data: State-of-the-Art and Emerging Trends	1
<i>Jacek Biażewicz, Tadeusz Morzy</i>	
1 Introduction	2
2 Survey of the Volume	12
2. Database Systems: from File Systems to Modern Database Systems	18
<i>Zbyszko Krolikowski, Tadeusz Morzy</i>	
1 Introduction - Database Concepts	19
2 Database System Generations	21
3 Network Database Systems	22
4 Hierarchical Database Systems	25
5 Relational Database Systems	29
6 Object-Oriented Database Systems	33
7 Federated, Mediated Database Systems and Data Warehouses	38
8 Conclusions	47
3. Data Modeling	49
<i>Jeffrey Parsons</i>	
1 Introduction	50
2 Early Concerns in Data Management	50
3 Abstraction in Data Modeling	52
4 Semantic Data Models	56
5 Models of Reality and Perception	62
6 Toward Cognition-Based Data Management	66
7 A Cognitive Approach to Data Modeling	70
8 Research Directions	72
4. Object-Oriented Database Systems	78
<i>Alfons Kemper, Guido Moerkotte</i>	
1 Introduction and Motivation	80
2 Object-Oriented Data Modeling	85
3 The Query Language OQL	106
4 Physical Object Management	117
5 Architecture of Client-Server-Systems	135
6 Indexing	139
7 Dealing with Set-Valued Attributes	160
8 Query Optimization	164
9 Conclusion	186

5. High Performance Parallel Database Management Systems	194
<i>Shahram Ghandeharizadeh, Shan Gao, Chris Gahagan, Russ Krauss</i>	
1 Introduction	195
2 Partitioning Strategies	196
3 Join Using Inter-Operator Parallelism	201
4 ORE: a Framework for Data Migration	203
5 Conclusions and Future Research Directions	216
6. Advanced Database Systems	221
<i>Gottfried Vossen</i>	
1 Introduction	222
2 Preliminaries	227
3 Data Models and Modeling for Complex Objects	234
4 Advanced Query Languages	249
5 Advanced Database Server Capabilities	262
6 Conclusions and Outlook	274
7. Parallel and Distributed Multimedia Database Systems	284
<i>Odej Kao</i>	
1 Introduction	286
2 Media Fundamentals	288
3 MPEG as an Example of Media Compression	292
4 Organisation and Retrieval of Multimedia Data	298
5 Data Models for Multimedia Data	304
6 Multimedia Retrieval Sequence Using Images as an Example	308
7 Requirements for Multimedia Applications	318
8 Parallel and Distributed Processing of Multimedia Data	321
9 Parallel and Distributed Techniques for Multimedia Databases	337
10 Case Study: CAIRO - Cluster Architecture for Image Retrieval and Organisation	348
11 Conclusions	359
8. Workflow Technology: the Support for Collaboration	365
<i>Dimitrios Georgakopoulos, Andrzej Cichocki, Marek Rusinkiewicz</i>	
1 Introduction	367
2 Application Scenario and Collaboration Requirements	368
3 Commercial Technologies Addressing Collaboration Requirements	371
4 Evaluation of Current Workflow Management Technology	372
5 Research Problems, Related Work, and Directions	381
6 Summary	383
9. Data Warehouses	387
<i>Ulrich Dorndorf, Erwin Pesch</i>	
1 Introduction	389
2 Basics	389
3 The Database of a Data Warehouse	394

4	The Data Warehouse Concept	404
5	Data Analysis of a Data Warehouse	411
6	Building a Data Warehouse	418
7	Future Research Directions	422
8	Conclusions	423
10. Mobile Computing		431
<i>Omran Bukhres, Evaggelia Pitoura, Arkady Zaslavsky</i>		
1	Introduction	433
2	Mobile Computing Infrastructure	437
3	Mobile Computing Software Architectures and Models	444
4	Disconnected Operation	454
5	Weak Connectivity	462
6	Data Delivery by Broadcast	468
7	Mobile Computing Resources and Pointers	476
8	Conclusions	479
11. Data Mining		487
<i>Tadeusz Morzy, Maciej Zakrzewicz</i>		
1	Introduction	488
2	Mining Associations	490
3	Classification and Prediction	517
4	Clustering	540
5	Conclusions	558
