

Model Driven Architecture[™] Applying MDA[™] to Enterprise Computing

Preface		XV
Foreword		xix
Part One	Introducing MDA	1
Chapter 1	Pressure and Progress: How We Arrived at This Point	3
-	Challenges Facing the Software Industry	3
	The Viability Variables	4
	Machine-Centric Computing	5
	Application-Centric Computing	6
	From Assembly to 3GLs	6
	Operating Systems and the Abstraction Gap	8
	Object-Oriented Languages and Virtual Machines	8
	Enterprise-Centric Computing	9
	Component-Based Development	9
	Design Patterns	10
	Distributed Computing	11
	Middleware: Raising the Platform Abstraction Level	12
	Middleware: Raising the Programming Abstraction Level	13
	Declarative Specification	13
	Enterprise Architecture and Separation of Concerns	14
	Enterprise Application Integration (EAI)	21
	Design by Contract	22
	Other Enterprise-Centric Technologies	25
	Pressures on Enterprise-Centric Computing	25
	Pressure on Production Costs	26
	Pressure on Quality	27
	Pressure on Longevity	28
	A Modern Day Sisyphus	30
	Summary	30

Chapter 2	Model Driven Enterprise Computing	31
•	Bringing Model-Centrism to Intermediate Tiers, EAI, and B2B	i 31
	Models as Development Artifacts	32
	Syntactic Abstraction versus Semantic Abstraction	32
	B2Bi and MDA	35
	First- and Second-Generation Web Services Integration	36
	Web Services and Enterprise Architecture	38
	Defining Abstract Business Services	39
	Mapping Business Information Models to XML	41
	Parameterized Mappings	41
	Mapping Business Service Models to WSDL	42
	Automating Business Processes and B2B Collaborations	43
	Flexibility in Choosing the Abstraction Level	45
	Modeling Language Extensibility	46
	Platform Independence: A Relative Concept	48
	EAI and MDA	50
	The Limits of Declarative Specification	52
	Metadata Integration	52
	MDA and Component-Based Development	54
	Automatic Pattern Replication	54
	A J2EE Example	55
	Architectural Styles	56
	Pushing More below the Line	57
	Model Driven Enterprise Architecture	58
	Standardized MDA-Based Modeling Languages	59
	Synchronizing among Multiple Tiers	60
	Design by Contract Revisited	60
	MDA and Other New Development Approaches	61
	Interactive Decign	62
	Extreme Brogramming	62
	Summany	03 64
	Summary	04
Part Two	The Base MDA Technologies	65
Chapter 3	The Role of UML in MDA	67
•	Origins and Evolution	67
	Strengths	68
	Separation of Abstract Syntax from Concrete Syntax	68
	Extensibility	70
	Support for Platform-Independent Modeling	71
	Maintained by a Standards Organization	72
	Weaknesses	73
	Large and Poorly Partitioned	73
	Weak Support for Viewpoints	74
	Not Current with Industry Developments in Components	
	and Patterns	74
	Vagueness about Relationships	74

Contento

¢

	Limitations of Profiling	74
	Misalignment of UML and MOF	75
	Lack of Standard Diagram Interchange	75
	Lack of a Metamodel for Object Constraint Language	75
	Future Directions	76
	UML 2.0	76
	Expected Outcomes	76
	What You Can Do Now	77
	Summary	77
Chapter 4	Beyond Basic Class Modeling	79
	Design by Contract	79
	The Basics	79
	An Example	80
	Contracts, Reuse, and Interoperability	83
	As Precise as Programming3	85
	Constraints and Exceptions	86
	A Framework for Quality	86
	DBC and UML Tools	87
	Overcoming Barriers to Use	87
	Another Look at Constraints	87
	Behavioral Modeling	88
	State Machines	88
	Activity Models	91
	Interaction Models	92
	Use Case Models	93
	Action Semantics	93
	What You Can Do Now	94
	Summary	94
Chapter 5	The Meta Object Facility (MOF)	95
	A Key MDA Foundation	95
	A Basic Premise	97
	Borrowing from UML	98
	MOF Isn't Just for OO	101
	Abstract Syntax Trees	103
	Metalevels	105
	Level M3	105
	Level M2	106
	Level M1	106
	Level M0 ⁴	107
	How Meaningful Are Metalevels?	107
	Self-Description	108
	Metalevels and Abstract Syntax	109
	Model Driven Metadata Management	110
	What Is Metadata?	110
	Volume and Value	111
	Previous Attempts at Metadata Integration	111

÷.

l

	An Additional Premise	112
	What Is the Benefit?	113
	Platform Independence	113
	Enforcing Semantics	115
	Metadata Management Scenarios	115
	Generic MOF Code	118
	MOF Is Not CORBA-Based	119
	Appearances versus Intent	120
	Mapping beyond Syntax	120
	Applying the MOF-CORBA Mapping	120
	A Closer Look at XMI	122
	Return on Investment	122
	XMI and XML Schema	124
	A Common Misconception about XMI	124
	Hand-Coded DTDs and Schemas	124
	XMI Complexity versus UML Complexity	125
	XMI as Input to Generators	126
	XMI and UML Diagram Interchange	127
	A Closer Look at JMI	128
	A MOF-Java Mapping	128
	Aren't XML and DOM Enough?	129
	Another Look at MOF Self-Description	131
	Additional Applications	135
	Human Usable Textual Notations	135
	XMI's Reverse Mapping	136
	Weaknesses	138
	Lack of Coverage of Graphical Notation	138
	Lack of Support for Versioning	138
	Misalignment with UML	139
	MOF-CORBA Mapping Problems	139
	Interoperability Problems Due to Immaturity	139
	Future Directions	140
	Interoperability Testing	140
	MOF 2.0	140
	MOF in the Computer Industry	140
	MOF and Enterprise Software	141
	MOF and the Resource Description Framework (RDF)	142
	What You Can Do Now	142
	Summary	143
Chapter 6	Extending and Creating Modeling Languages	145
-	Extending UML via Profiles	145
	A Family of Languages	145
	Stereotypes	1 46
	Tagged Values of Stereotypes	147
	Standalone Tagged Values	148

Defining a Profile Formally150Extending UML via MOF153Anatomy of a Heavyweight UML Metamodel Extension153Profiles versus Heavyweight Extensions154Creating New Modeling Languages155Tight Domain Focus155The Metamodel + Profile Strategy156Heavyweight + Lightweight Extension Strategy156UML Tools versus MDA Tools156UML Modeling versus MOF Metamodeling159UML Constructs That MOF Does Not Support155What You Can Do Now161Summary161Chapter 7Building Compilable Class Models163The Scope of the Guidelines163Class Modeling versus Behavioral Modeling164What the Standard MDA Mappings Produce166Purposes of the Guidelines166Don't Define Accessor and Mutator Operations166Navigability and Contracts166Navigability and Contracts166Navigability and Information Formats177Avoiding Name Clashes177Navigability and Modularity177A MOF Complication174Use Aggregation Properly177Aggregation Properties of Association Ends177Aggregation Properly177Aggregation Properties of Association Ends177Aggregation Properties of Association Ends177Aggregation Properties of Association Ends177Aggregation Properties of Association Ends177Aggregation Properties of Association End

	What You Can Do Now	245
	Summary	245
Part Three	Advanced Topics	247
Chapter 9	Modeling Transformations with CWM	249
•	More Than a Database Metamodel	249
	Implementation Strategies	251
	The Inner Workings	254
	Common Superclasses	254
	Mapping Expressions	257
	UML Models as Sources and Targets	260
	Metamodel-to-Metamodel Mappings	262
	MOF Mappings	266
	Completing the Picture	268
	Limitations	270
	What You Can Do Now	271
	Summary	271
Chapter 10	Additional Advanced Topics	273
	Generating Declarative versus Imperative Code	273
	APIs	273
	Information Formats	274
	The Role of Standards	274
	Green Fields versus Legacy	275
	Metadata Management Revisited	276
	Metadata Management as a Green Field	276
	Implementing Interesting Operations	276
	Implementing Derived Attributes and Associations	278
	Synopsis	279
	Generating Bridges	280
	Mappings—The Essential Knowledge	280
	Generalizing the Bridging Problem	282
	Standards and Bridges	285

	Executable Models and Virtual Machines	286
	Examples from Industry	286
	Correctness	287
	Performance	287
	Dynamism at the Lower Level	288
	Reflection	29 0
	Reflection and Metadata Fragmentation	29 0
	Drawing Conclusions	291
	A Middle Way	292
	Raising the Platform Revisited	292
	MDA and Systems Engineering	293
	What You Can Do Now	293
	Summary	294
Epilogue	A Reality Check	295
Appendix A	Sample Transaction Metamodel	297
	ModelElement	297
	Tx	297
	ACIDTx	297
	BusinessTxUnit	298
	CompensatableUnit	299
	ReversableUnit	299
	BusinessTx	299
Appendix B	3 Options Trading Concepts	301
	Basic Concepts	301
	Examples	302
