**Introduction**

- 1.1 About Econometrics WJ *i.U*
- 1.2 The Structure of this Book
- 1.3 Illustrations and Exercises

it

**An Introduction to Linear Regression**

- 2.1 Ordinary Least Squares as an Algebraic Tool
  - 2.1.1 Ordinary Least Squares
  - 2.1.2 Simple Linear Regression
  - 2.1.3 Example: Individual Wages \*
  - 2.1.4 Matrix Notation
- 2.2 The Linear Regression Model
- 2.3 Small Sample Properties of the OLS Estimator : >
  - 2.3.1 The Gauss-Markov Assumptions .0
  - v 2.3.2 Properties of the OLS Estimator
  - 2.3.3 Example: Individual Wages (Continued)
- 2.4 Goodness -of-fit u
- 2.5 Hypothesis Testing
  - 2.5.1 A Simple /-Test
  - 2.5.2 Example: Individual Wages (Continued)
  - 2.5.3 Testing One Linear Restriction
  - 2.5.4 A Joint Test of Significance of Regression Coefficients
  - 2.5.5 Example: Individual Wages (Continued) f
  - 2.5.6 The General Case
  - 2.5.7 Size, Power and p-Values -, t
- 2.6 Asymptotic Properties of the OLS Estimator f t-t

2.6.1	Consistency	33
2.6.2	Asymptotic Normality	35
2.6.3	Small Samples and Asymptotic Theory	36
2.7	Illustration: The Capital Asset Pricing Model	38
2.7.1	The CAPM as a Regression Model	39
2.7.2	Estimating and Testing the CAPM	40
2.8	Multicollinearity	43
2.8.1	Example: Individual Wages (Continued)	45
2.9	Prediction	46
	Exercises	47
<b>Interpreting and Comparing Regression Models</b>		<b>53</b>
3.1	Interpreting the Linear Model	53
3.2	Selecting the Set of Regressors	57
3.2.1	Misspecifying the Set of Regressors	57
3.2.2	Selecting Regressors	58
3.2.3	Comparing Non-nested Models	62
3.3	Misspecifying the Functional Form	64
3.3.1	Nonlinear Models	65
3.3.2	Testing the Functional Form	66
3.3.3	Testing for a Structural Break	66
3.4	Illustration: Explaining House Prices	67
3.5	Illustration: Predicting Stock Index Returns	71
3.6	Illustration: Explaining Individual Wages	75
3.6.1	Linear Models	75
3.6.2	Loglinear Models	78
3.6.3	The Effects of Gender	81
3.6.4	Some Words of Warning	83
	Exercises	83
<b>Heteroskedasticity and Autocorrelation</b>		<b>85</b>
4.1	Consequences for the OLS Estimator	85
4.2	Deriving an Alternative Estimator	87
4.3	Heteroskedasticity	88
4.3.1	Introduction	88
4.3.2	Estimator Properties and Hypothesis Testing	91
4.3.3	When the Variances are Unknown	92
4.3.4	Heteroskedasticity-consistent Standard Errors for OLS	93
4.3.5	A Model with Two Unknown Variances	95
4.3.6	Multiplicative Heteroskedasticity	96
4.3.7	Weighted Least Squares with Arbitrary Weights	97
4.4	Testing for Heteroskedasticity	97
4.4.1	Testing Equality of Two Unknown Variances	98
4.4.2	Testing for Multiplicative Heteroskedasticity	98
4.4.3	The Breusch-Pagan Test	99
4.4.4	The White Test	99

4.4.5	Which Test?		
4.5	Illustration: Explaining Labour Demand		
4.6	Autocorrelation		
4.6.1	First-order Autocorrelation		105
4.6.2	Unknown $\rho$		
4.7	Testing for First-order Autocorrelation		
4.7.1	Asymptotic Tests		109
4.7.2	The Durbin-Watson Test		110
4.8	Illustration: The Demand for Ice Cream		111
4.9	Alternative Autocorrelation Patterns		114
4.9.1	Higher-order Autocorrelation		114
4.9.2	Moving Average Errors		
4.10	What to do When you Find Autocorrelation?		
4.10.1	Misspecification		116
4.10.2	Heteroskedasticity-and-autocorrelation-consistent Standard Errors for OLS		
4.11	Illustration; Risk Premia in Foreign Exchange Markets		
4.11.1	Notation		
4.11.2	Tests for Risk Premia in the 1 Month Market		121
4.11.3	Tests for Risk Premia Using Overlapping Samples		124
	Exercises		127
<b>Endogeneity, Instrumental Variables and GMM</b>			
5.1	A Review of the Properties of the OLS Estimator		
5.2	Cases Where the OLS Estimator Cannot be Saved		
5.2.1	Autocorrelation with a Lagged Dependent Variable		
5.2.2	An Example with Measurement Error		134
5.2.3	Endogeneity and Omitted Variable Bias		138
5.2.4	Simultaneity and Reverse Causality		140
5.3	The Instrumental Variables Estimator		
5.3.1	Estimation with a Single Endogenous Regressor and a Single Instrument		140
5.3.2	Back to the Keynesian model		144
5.3.3	Back to the Measurement Error Problem		145
5.3.4	Multiple Endogenous Regressors		145
5.4	Illustration: Estimating the Returns to Schooling		146
5.5	The Generalized Instrumental Variables Estimator		150
5.5.1	Multiple Endogenous Regressors with an Arbitrary Number of Instruments		151
5.5.2	Two-stage Least Squares and the Keynesian Model Again		154
5.5.3	Specification Tests		155
5.5.4	Weak Instruments		156:
5.6	The Generalized Method of Moments		
5.6.1	Example		
5.6.2	The Generalized Method of Moments		
5.6.3	Some Simple Examples		

	5.6.4	Weak Identification	• •	163
	5.7	Illustration: Estimating Intertemporal Asset Pricing Models	; ? I-	164
	5.8	Concluding Remarks	• o t.	tm
		Exercises
