

Connections between Steel and Concrete

Volume One

Stuttgart, Germany

10-12 September 2001

Organised by
University of Stuttgart

Co-sponsored by
ACI, fib, IABSE

Edited by R. Eligehausen

HOCHSCHULE
• LIECHTENSTEIN
Bibliothek

RILEM Publications S.A.R.L

Contents

VOLUME ONE

Preface	XXI
PART ONE: KEYNOTE LECTURES	
1 Where structural steel and concrete meet	1
J. W. B. Stark and D. A. Hordijk	
2 Fastening technique - Current status and future trends	11
R. Eligehausen, I. Hofacker and S. Lettow	
PART TWO: DESIGN	
3 Anchoring to concrete: the new ACI approach	31
J. E. Breen, E.-M. Eichinger and W. Fuchs (Keynote Lecture)	
4 Evolution of fastening design methods in Europe	45
W. Fuchs (Keynote Lecture)	
5 Probabilistic calibration of design methods	61
R. E. Klingner (Keynote Lecture)	
6 Current status of post-installed anchor application in Japan	72
R. Tanaka (Keynote Lecture)	
7 Design method for splitting failure mode of fastenings	80
J. Asmus and R. Eligehausen	
8 Behaviour and design of fastenings of shear lugs in concrete	90
H. Michler and M. Curbach	
9 Safety relevant aspects for torque controlled expansion anchors	102
H. Gassner and E. Wisser	
IQ Study on standard test methods for post-installed anchors	108
Y. Hosokawa, K. Nakano, Y. Oohaga, S. Usami and K. Imai	
11 Static behavior of anchors under combinations of tension and shear loading	118
D. Lotze, R. E. Klingner and H. L. Graves, III	

12	Improved structural model for channel bars with more than two anchors J. Kraus, J. Ozbolt and R. Eligehausen	129
13	Anchors in low and high strength concrete J. Kunz, Y. Yamamoto and M. Berra	143
14	Development of common uniform regulations in Europe for the assessment of metal anchors K. Laternser	150
15	Behavior of multiple-anchor fastenings subjected to combined tension/shear loads and bending moment L. Li and R. Eligehausen	158
16	Load bearing capacity of torque-controlled expansion anchors L. Li	170
17	Behaviour and design of anchors close to an edge under torsion R. Mallee	175
18	Fixings with anchors: concerning relevant base plate thickness R. Mallee and F. Burkhardt	186
19	Installation verification of mechanical and adhesive anchors L. Mattis	196
20	Steel capacity of headed studs loaded in shear N. S. Anderson and D. F. Meinheit	202
21	The analysis of fastener strength using the limit state approach J. J. Melcher and M. Karmazfnova	212
22	Behavior of shear anchors in concrete: statistical analysis and design recommendations H. Muratli, R. E. Klingner and H. L. Graves, III	220
23	Study on shear transfer of joint steel bar and concrete shear key in concrete connections K. Nakano and Y. Matsuzaki	231
24	Performance of undercut anchors in comparison to cast-in-place headed studs P. Pusill-Wachtsmutn	241

25	Shear anchoring in concrete close to the edge	251
	N. Randl and M. John	
26	Behavior of tensile anchors in concrete: statistical analysis and design recommendations	261
	M. Shirvani, R. E. Klingner and H. L. Graves, Til	
27	Performance of single anchors near an edge under varying angles of loading	272
	R. E. Wollmershauser, U. Nestler and V. Smith	
28	The prequalification of anchors in the United States of America: past, present and future	282
	R. E. Wollmershauser	
29	On the ratio of plate thickness to stud diameter for steel concrete stud shear connectors	290
	H. D. Wright, A. Elbadawy and R. Cairns	
30	Incorporation of the size effect and other factors in strength design of concrete fastenings, in the context of the CEB Design Guide	300
	V. I. Yagust and D. Z. Yankelevsky	
PART THREE: DURABILITY/FIRE		
31	Corrosion behavior of materials in fixing applications	313
	N. Arnold	
32	Behaviour of post-installed anchors in case of fire	320
	K. Bergmeister and A. Rieder	
33	Durability of galvanized, post-installed fasteners to concrete	329
	K. Menzel and B. Hagmayer	
34	Durability of stainless steel connections with respect to corrosion	338
	U, Niirnberger	
35	Fire resistance of steel anchors in concrete	352
	M. Reick	
PART FOUR : BONDED ANCHORS		
36	Anchoring with bonded fasteners	361
	R. A. Cook and R. C. Konz (Keynote Lecture)	^

37	Experimental study on performance of bonded anchors in the low strength reinforced concrete	371
	T. Akiyama, Y. Yamamoto, S. Ichihashi and T. Katagiri	
38	Behavior of grouted anchors	381
	R. A. Cook, N. A. Zamora and R. C. Konz	
39	Long time load-carrying capacity' of bonded anchors	391
	L. Elfgren, G. Danielsson, I. Holm and G. Soderlind	
40	Transmission of shear loads with post-installed rebars	402
	J. Kunz	
41	Design of anchorages with bonded anchors under tension load	411
	B. Lehr and R. Eligehausen	
42	Load bearing behavior and design of single adhesive anchors	422
	J. Meszaros and R. Eligehausen	
43	Rebar anchorage in concrete with injections adhesive	433
	M. Reuter, T. Greppmeir and F. Miinger	
44	Investigations on bonding behaviour of tie reinforcements in historic masonry	443
	M. Raupach, J. Brockmann, A. Domink and M. Schurholz	
45	Actual trends in chemical fixings: from capsule to injection systems	456
	J. Schatzle	
46	Performance of bonded anchors in dependence of installation conditions, state of cure- Deformation behavior at elevated temperatures	461
	G.W. Ehrenstein and A. Tome	
47	Study on the performance evaluation of the new capsule typed bonded anchor	470
	M. Yonetani, A. Fukuoka and Y. Matsuzaki	
PART FIVE: SEISMIC BEHAVIOUR		
48	Seismic behavior of connections between steel and concrete	479
	J. O. Jirsa (Keynote Lecture)	
49	Tests on connectors for seismic retrofitting of concrete and masonry structures in Mexico	481
	S. M. Alcocer and L. Flores	

50	Design and construction of heavy industrial anchorage for power-plants P. J. Carrato and W. F. Brittle	491
51	Dynamic behavior of single and double near-edge anchors loaded in shear J. Hallowell Gross, R. E. Klingner and H. L. Graves, III	498
52	Post-installed rebar connections under seismic loading I. Hofacker and R. Eligehausen	509
53	An evaluation of tensile capacity of anchor system in nuclear power plants by actual model tests J.-B. Jang, S.-K. Woo; Y.-P. Sun and J.-R. Lee	521
54	Structural behavior of SRC Column - RC beam joint under monotonic and cyclic load S-H. Lee, Y.-K. Ju, S.-C. Chun and D.-Y. Kim	531
55	Dynamic behavior of tensile anchors to concrete M. Rodriguez, D. Lotze, J. Hallowell Gross, Y.-g. Zhang, R. E. Klingner and H. L. Graves. III	541
56	Test methods for seismic qualification of post-installed anchors J. F. Silva	551
57	Safety concept for fastenings in nuclear power plants T. M. Sippel, J. Asmus and R. Eligehausen	564
58	Experimental study on seismic performance of beam members connected with post-installed anchors R. Tanaka and K. Oba	576
59	Shallow shear anchor bolts for structural seismic strengthening of columns with wing wall Y. Yamamoto. Y. Hattori, T. Koh and M. Kato	586
60	Seismic response of multiple-anchor connections to concrete Y.-g. Zhang, R. E. Klingner and H. L. Graves, III	596

PART SIX: NUMERICAL SIMULATION

- 61 Smearred fracture Finite Element analysis of reinforced concrete structures - Theory and examples**
J. Ozbolt (Keynote Lecture)
- 62 Numerical and experimental investigations of the splitting failure mode of fastenings**
J. Asmus and J. Ozbolt
- 63 Three dimensional modeling of an anchorage to concrete using metal anchor bolts**
H. Boussa, G. Mounajed, B. Mesureur and J.-V. Heck
- 64 Influence of bending compressive stresses on the concrete cone capacity**
M. Bruckner, R. Eligehausen and J. Ozbolt
- 65 ATENA - An advanced tool for engineering analysis of connections**
V. Cervenka , J. Cervenka and R. Pukl
- 66 A computational model for double-head studs**
A. Haufe and E. Ramm
- 67 Behavior and design of fastenings with headed anchors at the edge under arbitrary loading direction**
J. Hofmann, J. Ozbolt and R. Eligehausen
- 68 Evaluation of a bridge deck strengthening with shear connectors: Finite Element analysis and experimental results**
A. J. Leite

VOLUME TWO

- 69 Numerical analysis of group effect in bonded anchors with different bond strengths**
Y.-J. Li and R. Eligehausen
- 70 Simulation of fastening systems utilizing chemical and mechanical anchors**
J. Nienstedt, R. Mattner, U. Nestler and C. Song
- 71 Headed stud anchor - cyclic loading and creep-cracking interaction of concrete**
J. Ozbolt, J. Hofmann and R. Eligehausen

72	Numerical investigations of headed studs with inclined shoulder	729
	P. Pivonka, R. Lackner and H. A. Mang	
73	Simulating a response of connections	747
	R. Pukl, J. Cervenka and V. Cervenka	
PART SEVEN: APPLICATIONS		
74	Non-supported crash barriers - Proof of the concrete resistances according to the concrete-capacity-method	759
	J. Buhler	
75	Reconstruction of multi-layer-walls	766
	E. Dereser and J. Buhler	
76	Load carrying capacity of fasteners in concrete railway sleepers	774
	H. Thun, S. Utsi, L. Elfgren, P. Nilsson and B. Paulsson	
77	Anchorage with headed bars in exterior beam-column joints	785
	J. Hegger and W. Roeser	
78	Halfcn HDB-S bars as shear reinforcement in slabs and beams	795
	J. Hegger, K. Frohlich, R. Beutel and W. Roeser	
79	Behaviour of fasteners in concrete with coarse recycled concrete and masonry aggregates	805
	D. A. Hordijk and R. van der Pluijm	
80	Regarding strength of anchor bolts used for precast concrete curtain wall fasteners	815
	H. Kawamura, T. Otobe and S. Oka	
81	New method of reconstruction - Strengthening of old buildings	825
	M. Marjanishvili, T. Zuzadze, D. Ramishvili and A. Lebanidze	
82	Fastening in masonry	836
	A. Meyer and T. Pregartner	
83	Study on design method of joint panels for hybrid railway rigid-frame bridges	847
	H. Nishida, K. Murata and T. Takayama	
84	Tension stiffening model based on bond	857
	M. A. Polak and K. Blackwell	

- 85 Over-cladding of existing concrete buildings using cold formed light steel sections and composite cladding panels**
S. O. Popo-Ola, R. M. Lawson and P. J. Sullivan
- 86 Redundant structures fixed with concrete fasteners**
M. Rdfle and R. Eligehausen
- 87 Numerical and experimental analysis of post-installed rebars spliced with cast-in-place rebars**
H. A.Spieth, J. Ozbolt, R. Eligehausen and J. Appl
- 88 Dowel action of titanium bars connecting marble elements**
E. Vintzileou and C. Papadopoulos
- 89 Case study - Application of high strength post-tensioned rods for anchoring aerial tram structures to rock**
G. P. Wheatley

PART EIGHT: SPECIAL FASTENERS

- 90 Behaviour and design of fastenings with concrete screws**
J. H. R. Kuenzlen and T. M. Sippel
- 91 Behaviour and design of anchors for lifting and handling in precast concrete elements**
D. Lotze
- 92 Behaviour of plastic anchors in cracked and uncracked concrete**
T. Pregartner and R. Eligehausen

PART NINE: BRIDGES

- 93 Testing of a dowel connection for a bridge with a concrete deck and a sandwich panel truss structure**
H. Blontrock, L. Taerwe, A. Nurehi, J. Vantomme, C. De Roover, J. Wastiels and K. Croes
- 94 A new step forward for composite bridges**
The Bras de la Plaine Bridge
E. Barlet, G. Causse and J.-P. Viallon
- 95 Anchorage of the steel elements to the concrete piers at the specific pipe bridges over a Danube Bay in Budapest**
B. Csiki

96	Behavior and design of steel girder-to-concrete column connection for a cantilever-construction highway bridge	982
	L. Huang, H. Hikosaka, M. Shimozono and K. Akehashi	

PART TEN: COMPOSITE STRUCTURES

97	Recent developments and chances composite structures	995
	U. Kuhlmann (Keynote Lecture)	
98	Design of lying studs with longitudinal shear force	1015
	U. Breuninger	
99	Studies on the ductility of shear connectors when using high-strength steel and high-strength concrete	1025
	J. Hegger, G. Sedlacek, P. Doinghaus and H. Trumpf	
100	Experimental investigations on the behaviour of strip shear connectors with powder actuated fasteners	1046
	M. Fontana, H. Beck and R. Bartschi	
101	Design concept of nailed shear connections in composite tube columns	1056
	G. Hanswille, H. Beck and T. Neubauer	
102	An experimental study on shear characteristics of Perfo-bond strip and its rational strength equations	1066
	Y. Ushijima, T. Hosaka, K. Mitsuki, H. Watanabe, Y. Tachibana and H. Hiragi	
103	Behavior of lying shear studs in reinforced concrete slabs	1076
	U. Kuhlmann and K. Kurschner	
104	Composite bridge with compression joint - Connection concrete end slab to steel girder - Finite Element method	1086
	M. V. Lammens	
105	Perfo-bond connection and tests	1095
	S. Poot	
106	Development and application of saw-tooth connections for composite structures	1105
	J. Schlaich	
107	Geometry, behaviour and design of high capacity saw-tooth connections	1119
	V. Schmid	

- 108 Composite bridge with compression joints - Connection concrete end slab to steel girder - Dowels divided in groups
D. Tuinstra

PART ELEVEN: FATIGUE

- 109 The fatigue behaviour of the shear connection in the hogging region of steel and concrete composite continuous beams under realistic loading
H. Bode and A. Leffer
- 110 Influence of fatigue loads in tension on short cast-in-place anchors in concrete
E. Cadoni
- 111 A test proposal for fatigue experimental studies on stud shear connectors
N. Gattesco and E. Giuriani
- 112 Innovative interface systems for steel-girders/concrete-deck connection
M. K. Tadros, S. S. Badie and A. M. Girgis

PART TWELVE: CONNECTIONS

- 113 Non-linear analysis of steel-concrete composite beams: a Finite Element model
C. Faella, E. Martinelli and E. Nigro
- 114 Connections between prestressed concrete bridge decks and composite bridge decks - Hybrid construction
D. Jankowski, O. Fischer and M. Matthes
- 115 Anchorage behavior of 90-degree hooked beam bars in reinforced concrete wall-beam intersections
O. Joh, Y. Goto and A. Kitano
- 116 Embedded steel bearings instead of concrete nibs
M. R. Kintscher
- 117 Anchorage zone in a steel-concrete composite slab with unbonded tendons
H. Koukkari
- 118 Connections for continuous framing in precast concrete structures
G. Krummel

119	Standoff screws as shear connectors for composite trusses: push-out test results and analysis	1240
	J. R. U. Mujagic, W. S. Easterling and T. M. Murray	
120	Experimental study on a new joint for prestressed concrete composite bridge with steel truss web	1250
	K. Furuichi, M. Yamamura, H. Nagumo and K. Yoshida	
121	Development and application of embedded connection	1260
	M. Sakurada, T. Yoda, K. Ashiduka and T. Ohura	
122	Design and construction of a concrete-filled steel tube joint	1270
	S. P. Schneider, D. R. Kramer and D. L. Sarkkinen	
123	Friction slipping behavior between concrete steel - Aiming the development of bolted friction-slipping joint	1281
	T. Yoshioka and M. Ohkubo	

PART THIRTEEN: EXPERIMENTAL STUDIES

124	An experimental study on the connection joints between steel girder and reinforced concrete column with various types of embedded load transferring plates	1293
	N. Ando, I. Nishimura and K. Kamo	
125	Low-cycle fatigue Behaviour of Pull-Push Specimens with Headed Stud Shear Connectors	1303
	S. Erlicher, O. S. Bursi and R. Zandonini	
126	Static tests on various types of shear connectors for composite structures	1313
	H. C. Galjaard and J. C. Walraven	
127	Structural monitoring of hybrid specimens at early age using fibre optic sensors	1323
	B. Glisic and D. Inaudi	
128	Development of innovative composite system - Between steel and concrete members	1333
	K. Kitagawa, H. Watanabe, Y. Tachibana, H. Hiragi and A. Kurita	
129	An experimental study on the bond-slip relationship between the concrete and steel with stud	1343
	K. Konno, A. Farghaly and T. Ueda	

130	The behavior of beam-to-box column connection of CFT with air cavity	135
	M.-J. Lee, M.-S. Choi, J.-H. Kim and S.-W. Jun	
131	Sheet reinforcement	138
	O. Matthaei, H.-P. Andra and N. V. Tue	
PART FOURTEEN: SLIM FLOOR STRUCTURES		
132	Composite girders of reduced height	137
	U. Kuhlmann, J. Fries and A. Rieg	
133	Innovative development of light steel composites in buildings	138
	R. M. Lawson, S. O. Popo-Ola and D. N. Varley	
134	Intentional and unintentional shear connections in shallow floor composite structures	139
	M. V. Leskela	
	Author Index	140
