Contents

SECTION I: THE WORLD AROUND US

1	Background: From Fire to Flight.....	3
2	Management, Systems: Tools For the Toolbox.....	9
	Management Methods	10
	Zero-Based Budgets (ZBB)	12
	The Kepner-Trego (K-T) System	13
	Taguchi Methods (TM)	14
	Quality Function Deployment (QFD)	17
	Kaizen	18
	Design for Assembly (DFA)	19
	Total Quality Control	19
	Failure Mode Effect Analysis (FMEA)	22
	Simultaneous Engineering (SE)	22
	The Theory of Inventive Problem Solving (TRIZ)	23
	Benchmarking	25
	Value Analysis/Value Engineering (VE)	26
3	The Toolbox: The Application Benefit Matrix.....	31

SECTION II: THE ECONOMICS OF PROFIT

4	Cost and Its Elements: The Driving Force.....	39
	Introduction	39
	Target Costing	40
	Where Does All the Money Go?	44
	Cost as a Measurement Tool	46
	Cost Estimates and Time	47
	Definitions	50
	Sources of Cost Information	55
	Cost Visibility Techniques	56
	Basic Cost Analysis Techniques (BCAT)	59
	Project Justification	65
	Cost Visibility, Budget Analysis, and Fund Allocation	67

5	Function: The Foundation of Clarity.....	73
	Introduction	73
	Function is the Key	74
	Function Defined	76
	The Link Between Function and Creativity	77
	Define the Function	78
	Functions for Creativity	82
	Start at the Top	84
	Types of Functions	84
	Some Examples of Product Functions	85
6	Value: A Matter of Opinion.....	91
	Introduction	91
	Definitions	92
	Measuring Value	95
	Function in Value Engineering/Analysis	96
	Value Classifications	97
	Value Is a Motivator	99
	Define the Value	103
	Social Value — A Matter of Opinion.	105
	Value in the Past	105
	Values and the Future	106
	Social Problems and the Argus System	107
	Measuring Social Values	108
7	Quality: A Major Component of Value.....	117
	Introduction	117
	Quality, A Subjective Appraisal	118
	Values and Performance	119
	Measuring Value	121
	Measuring Quality	123
	Quality Depreciation Index (QDI)	124

SECTION III: THE HUMAN ELEMENT

8	Communications: A Two-Way Street.....	129
	Introduction	129
	The Communications Model	130
	Nonverbal Communication	132
	Listening	133
	Meetings	137
	Meeting Productivity	139
9	Motivation: Different Things Move Different People	143
	The Life Cycle	143

10 Teams and Teamwork: A Synthesized Knowledge Group... 157
 Teams for Overall Understanding 157
 Team Organization 161
 Team Development 165
 Nontask Team Issues 167
 How to Become a Team 169

11 Creativity: The Innate Drive To Change... 171
 Introduction 171
 Left and Right Brain Theory 173
 Invention and Discovery 174
 Creative Characteristics 176
 The Creative Process 177
 Improving Our Creativity 182
 Stimulation of Creativity and Creative Techniques 184

SECTION IV: THE SUM OF THE PARTS —
 A PRACTICAL METHOD

12 Value Engineering: A Total System..... 193
 Introduction 193
 Function Analysis: A New Idea 194
 Definition 195
 The Job Plan 196
 Job Plan Examples 202
 The Value Engineering Process 204

13 **Organization and Implementation:**
Develop a Practical System..... 241
 Introduction 241
 Goal for Achievement 241
 Develop a Plan 244
 Concluding Comments 251

14 **Examples: Winning Results.....** 253
 Introduction 253
 800-Ton Stamping Press 253
 Automobile Dealership — Construction Schedule 257
 Automatic Clutch Adjuster 259
 Automotive Suspension Crossmember 261
 Engineering Department Organization Analysis 263
 Congestion in High School Corridors During Class Change Periods 269
 Career Analysis and Planning 275
 Small Parts Analysis 279

APPENDIX

Aids and References.....285
