CONTENTS

Stating the Problem	
Forging the Postwar Paradigm	2
The Concepts of Basic and Applied Research	6
Static and Dynamic Forms of the Paradigm	9
The Experience of Science	12
Science and Technology	18
Who Reaps the Technological Harvest from Science?	13
A Paradox in the History of Ideas	24
The Rise of the Modern Paradigm	16
The Ideal of Pure Inquiry in Classical Times	27
The Ideal of the Control of Nature in Early Modern Science	30
Institutionalizing the Separation of Pure from Applied in Europe	34

	Institutionalizing the Separation of Pure from Applied in America	38	
	Reinforcing the Separation: American Science in the Aftermath of World War II	45	
	The Reception of Bush's Plan	50	
3.	Transforming the Paradigm		58
	Early Dissents	59	
	Official Reporting Categories	64	
	Expanding the Dimensional Image	70	
	Probing the Framework	75	
	Rethinking the Dynamic Paradigm	84	
	Implications for Policy	89	
4.	Renewing the Compact between Science and Government		90
	Collapse of the Postwar Bargain	91	
	The Opening for Renewal	96	
	Strengthening the Case for Pure Research	99	
	Capturing the Benefit in Technology	104	
	Institutionalizing a New Compact	106	
5.	Basic Science and American Democracy		111
	Recognizing Scientific Promise and Social Value at the Project Level	113	
	Linking Scientific Promise to Social Value at the Wholesale Level	121	
	Evaluating the NIH Model	137	
	Linking Scientific Judgment with Political Authority	142	
	Notes		153
	Index		174
