| Preface | xxi |
| Chapter 1. From Decision Theory to Decision-aiding Methodology | 1 |
| Alexis TSOUKIAS | |
| 1.1. Introduction | 1 |
| 1.2. History | 4 |
| 1.2.1. Genesis and youth | 4 |
| 1.2.2. Maturity | 10 |
| 1.3. Different decision-aiding approaches | 16 |
| 1.4. The decision-aiding process | 20 |
| 1.4.1. The problem situation | 21 |
| 1.4.2. The problem formulation | 22 |
| 1.4.3. The evaluation model | 23 |
| 1.4.4. The final recommendation | 24 |
| 1.5. Conclusion | 25 |
| 1.6. Acknowledgements | 26 |
| 1.7. Bibliography | 26 |
| Chapter 2. Binary Relations and Preference Modeling | 49 |
| Denis BOUYSSOU, Philippe VINCKE | |
| 2.1. Introduction | 49 |
| 2.2. Binary relations | 50 |
| 2.2.1. Definitions | 50 |
| 2.2.2. Properties of a binary relation | 52 |
| 2.2.3. Graphical representation of a binary relation | 53 |
| 2.2.4. Matrix representation of a binary relation | 53 |
| 2.2.5. Example | 53 |
| 2.3. Binary relations and preference structures | 54 |
| 2.4. Classical preference structures | 57 |

- 2.4.1. Total order 57
 - 2.4.1.1. Definition 57
 - 2.4.1.2. Numerical representation 59
- 2.4.2. Weak orders 60
 - 2.4.2.1. Definition 60
 - 2.4.2.2. Numerical representation 61
- 2.4.3. Classical problems 62
 - 2.4.3.1. Choosing on the basis of binary relation 62
 - 2.4.3.2. Aggregating preferences 63
 - 2.4.3.3. Particular structure of the set of objects 63
- 2.5. Semi-orders and interval orders 66
 - 2.5.1. Semi-order 66
 - 2.5.1.1. Definition 66
 - 2.5.1.2. Weak order associated with a semi-order 67
 - 2.5.1.3. Matrix representation 68
 - 2.5.1.4. Numerical representation 68
 - 2.5.2. Interval order 69
 - 2.5.2.1. Definition 69
 - 2.5.2.2. Weak orders associated with an interval order 70
 - 2.5.2.3. Matrix representation 71
 - 2.5.2.4. Numerical representation 71
 - 2.5.3. Remarks 72
- 2.6. Preference structures with incomparability 73
 - 2.6.1. Partial order 73
 - 2.6.2. Quasi-order 74
 - 2.6.3. Synthesis 76
- 2.7. Conclusion 76
 - 2.7.1. Other preference structures 76
 - 2.7.2. Other problems 77
- 2.8. Bibliography 78

Chapter 3. Formal Representations of Uncertainty 85

Didier DUBOIS, Henri PRADE

- 3.1. Introduction 85
- 3.2. Information: a typology of defects 88
 - 3.2.1. Incompleteness and imprecision 89
 - 3.2.2. Uncertainty 91
 - 3.2.3. Gradual linguistic information 94
 - 3.2.4. Granularity 96
- 3.3. Probability theory 98
 - 3.3.1. Frequentists and subjectivists 98
 - 3.3.2. Conditional probability 101
 - 3.3.3. The unique probability assumption in the subjective setting 104

- 3.4. Incompleteness-tolerant numerical uncertainty theories 107
 - 3.4.1. Imprecise probabilities 108
 - 3.4.2. Random disjunctive sets and belief functions 112
 - 3.4.3. Quantitative possibility theory 118
 - 3.4.3.1. Possibility theory and belief functions 119
 - 3.4.3.2. Possibility theory and imprecise probabilities 119
 - 3.4.3.3. Clouds and generalized p -boxes 121
 - 3.4.3.4. Possibility-probability transformations 122
 - 3.4.4. Possibility theory and non-Bayesian statistics 126
- 3.5. Qualitative uncertainty representations 127
- 3.6. Conditioning in non-additive representations 130
 - 3.6.1. Conditional events and qualitative conditioning 132
 - 3.6.2. Conditioning for belief functions and imprecise probabilities . . . 134
- 3.7. Fusion of imprecise and uncertain information 138
 - 3.7.1. Non-Bayesian probabilistic fusion 140
 - 3.7.2. Bayesian probabilistic fusion 141
 - 3.7.3. Fusion in possibility theory 142
 - 3.7.4. Fusion of belief functions 144
 - 3.7.5. Merging imprecise probability families 146
- 3.8. Conclusion 147
- 3.9. Acknowledgements 147
- 3.10. Bibliography 147

Chapter 4. Human Decision: Recognition plus Reasoning 157

Jean-Charles POMEROL

- 4.1. Introduction: the neurobiology of decision, reasoning and/or recognition 157
- 4.2. Procedural rationality and limited rationality 159
 - 4.2.1. Savage's expected utility model 159
 - 4.2.2. Challenging utility expectation 162
 - 4.2.3. Bounded rationality 164
 - 4.2.4. Multicriterion decision 169
 - 4.2.5. Other models 170
- 4.3. Decision based on recognition 172
 - 4.3.1. Diagnosis and decision 172
 - 4.3.2. Case-based decision 173
- 4.4. Recognition, reasoning and decision support 175
 - 4.4.1. Interactive decision support systems 175
 - 4.4.2. Scenarios 176
- 4.5. Cognitive biases 178
 - 4.5.1. Biases linked to probabilities 180
 - 4.5.2. Representations, levels of satisfaction and the anchor effect 182
- 4.6. Conclusion 185
- 4.7. Acknowledgements 187
- 4.8. Bibliography 187

| | |
|---|-----|
| Chapter 5. Multiple Objective Linear Programming | 199 |
| Jacques TEGHEM | |
| 5.1. Introduction | 199 |
| 5.2. Basic concepts and main resolution approaches | 201 |
| 5.2.1. The problem | 201 |
| 5.2.2. Dominance relation and efficient solutions | 203 |
| 5.2.3. Ideal point, payoff matrix and nadir point | 205 |
| 5.2.4. Scalarizing functions | 206 |
| 5.2.5. Theorems to characterize efficient solutions | 208 |
| 5.2.6. The main resolution approaches | 209 |
| 5.2.6.1. A priori preferences | 210 |
| 5.2.6.2. A posteriori preferences | 213 |
| 5.2.6.3. Progressive preferences or interactive approach | 213 |
| 5.3. Interactive methods | 215 |
| 5.3.1. The step method | 215 |
| 5.3.1.1. Initialization ($m = 0$) | 215 |
| 5.3.1.2. General iteration ($m \geq 1$) | 217 |
| 5.3.2. The Steuer and Choo method | 219 |
| 5.3.2.1. Initialization ($m = 0$) | 220 |
| 5.3.2.2. General iteration ($m \geq 1$) | 220 |
| 5.3.3. Interactive methods based on a utility function | 222 |
| 5.3.3.1. Principle of the Zionts and Wallenius method | 222 |
| 5.3.3.2. Principle of the Geoffrion <i>et al.</i> method | 223 |
| 5.4. The multiple objective integer programming | 224 |
| 5.4.1. Methods of generating $E(P)$ | 226 |
| 5.4.1.1. The Klein and Hannan method | 226 |
| 5.4.1.2. The Sylva and Crema method | 226 |
| 5.4.1.3. The Kiziltan and Yucaoglu method | 227 |
| 5.4.2. Interactive methods | 228 |
| 5.4.2.1. Gonzales <i>et al.</i> method | 228 |
| 5.4.2.2. The MOMIX method | 229 |
| 5.5. The multiple objective combinatorial optimization | 231 |
| 5.5.1. Exact methods | 233 |
| 5.5.1.1. Direct methods | 235 |
| 5.5.1.2. The two phases method | 237 |
| 5.5.1.3. Comments | 240 |
| 5.5.2. Metaheuristics | 241 |
| 5.5.2.1. Simulated annealing | 241 |
| 5.5.2.2. Tabu search | 243 |
| 5.5.2.3. Genetic algorithms | 243 |
| 5.6. The multiple objective stochastic linear programming | 245 |
| 5.6.1. The equivalent deterministic problem | 247 |
| 5.6.2. Determination of the first compromise | 248 |

| | |
|---|------------|
| 5.6.2.1. Payoff matrix | 248 |
| 5.6.2.2. Weights associated with the objectives | 249 |
| 5.6.2.3. First compromise | 249 |
| 5.6.3. Interactive phases | 249 |
| 5.6.3.1. Information given to the decision maker | 249 |
| 5.6.3.2. First interaction with the decision maker | 250 |
| 5.6.3.3. Computational phase | 250 |
| 5.7. The multiple objective fuzzy linear programming | 253 |
| 5.7.1. Comparison of two fuzzy numbers | 253 |
| 5.7.1.1. Area compensation | 254 |
| 5.7.1.2. Determination of $I(\tilde{a} \geq \tilde{b})$ | 256 |
| 5.7.1.3. Equivalent crisp constraint | 257 |
| 5.7.2. Treatment of a fuzzy objective function | 257 |
| 5.7.3. The crisp (deterministic) equivalent problem | 258 |
| 5.8. Conclusion | 258 |
| 5.9. Bibliography | 258 |
| Chapter 6. Constraint Satisfaction Problems | 265 |
| G rard VERFAILLIE, Thomas SCHIEX | |
| 6.1. Introduction | 265 |
| 6.2. The CSP framework | 266 |
| 6.2.1. Syntactical part | 267 |
| 6.2.2. Semantical part | 268 |
| 6.2.3. Assignments | 269 |
| 6.2.4. Queries | 269 |
| 6.3. Complexity | 271 |
| 6.4. Related problems | 272 |
| 6.5. Reasoning on a CSP | 274 |
| 6.5.1. Local consistency | 275 |
| 6.5.2. Arc-consistency | 275 |
| 6.5.3. Path-consistency | 278 |
| 6.5.4. Other local consistency properties | 280 |
| 6.5.5. General constraint propagation mechanisms | 282 |
| 6.6. Looking for a CSP solution | 283 |
| 6.6.1. Tree search | 283 |
| 6.6.2. Variable elimination | 288 |
| 6.6.3. Greedy search | 291 |
| 6.6.4. Local search | 292 |
| 6.7. Experimental evaluations and lessons learned | 294 |
| 6.7.1. Pure constraint satisfaction problems | 294 |
| 6.7.2. Constraint optimization problems | 294 |
| 6.8. Polynomial classes | 295 |
| 6.8.1. Acyclic constraint networks | 296 |

| | |
|---|------------|
| 6.8.2. Simple temporal constraint networks | 297 |
| 6.9. Existing tools | 297 |
| 6.10. Extensions of the basic framework | 298 |
| 6.10.1. Continuous domains | 298 |
| 6.10.2. Conditional problems | 300 |
| 6.10.3. Dynamic problems | 301 |
| 6.10.4. Constraints and preferences | 301 |
| 6.11. Open problems | 308 |
| 6.11.1. Constraints and uncertainties | 308 |
| 6.11.2. Deciding or reasoning under time constraints | 309 |
| 6.11.3. Interactive decision | 310 |
| 6.11.4. Distributed decision | 310 |
| 6.12. Books, journals, websites and conferences | 311 |
| 6.13. Bibliography | 311 |
| Chapter 7. Logical Representation of Preferences | 321 |
| Jérôme LANG | |
| 7.1. Introduction | 321 |
| 7.2. Basics of propositional logic | 324 |
| 7.3. Principles and elementary languages | 326 |
| 7.4. Weights, priorities and distances | 329 |
| 7.4.1. Weights | 329 |
| 7.4.1.1. Bibliographical notes | 332 |
| 7.4.2. Priorities | 332 |
| 7.4.2.1. Best-out | 333 |
| 7.4.2.2. Discrimin | 333 |
| 7.4.2.3. Leximin | 334 |
| 7.4.2.4. Bibliographical notes | 334 |
| 7.4.3. Distances | 335 |
| 7.4.3.1. Bibliographical notes | 337 |
| 7.5. Preference logics: conditionals and <i>ceteris paribus</i> preferences | 338 |
| 7.5.1. <i>Ceteris paribus</i> preferences | 338 |
| 7.5.1.1. Preferences between non-contradictory formulae | 339 |
| 7.5.1.2. <i>Ceteris paribus</i> comparisons and their generalizations | 340 |
| 7.5.1.3. Preference relation induced by <i>ceteris paribus</i> preferences | 342 |
| 7.5.1.4. CP-nets | 343 |
| 7.5.1.5. Comments and bibliographical notes | 345 |
| 7.5.2. Defeasible preferences and conditional preference logics | 345 |
| 7.5.2.1. Bibliographical notes | 351 |
| 7.5.3. Logical modeling of incomplete and/or contradictory preferences | 352 |
| 7.6. Discussion | 353 |
| 7.6.1. Cognitive and linguistic relevance, elicitation | 353 |
| 7.6.2. Expressivity | 353 |

| | |
|--|-----|
| 7.6.3. Complexity and algorithms | 354 |
| 7.6.4. Spatial efficiency | 354 |
| 7.7. Acknowledgements | 355 |
| 7.8. Bibliography | 355 |

Chapter 8. Decision under Risk: The Classical Expected Utility Model 365

Alain CHATEAUNEUF, Michèle COHEN, Jean-Marc TALLON

| | |
|---|-----|
| 8.1. Introduction | 365 |
| 8.1.1. Decision under uncertainty | 366 |
| 8.1.2. Risk versus uncertainty | 366 |
| 8.2. Risk and increasing risk: comparison and measures | 367 |
| 8.2.1. Notation and definitions | 367 |
| 8.2.1.1. First-order stochastic dominance | 368 |
| 8.2.1.2. Second-order stochastic dominance | 369 |
| 8.2.2. Behavior under risk | 370 |
| 8.2.2.1. Model-free behavioral definitions | 370 |
| 8.2.2.2. Certainty equivalent, risk premium and behavior comparison | 371 |
| 8.3. Expected utility (EU) model | 372 |
| 8.3.1. Mixing probability distributions | 372 |
| 8.3.2. Generalized mixture | 373 |
| 8.3.3. Axiomatic foundation of the EU model | 373 |
| 8.3.3.1. Linear utility theorem | 374 |
| 8.3.3.2. Von Neumann–Morgenstern theorem for distributions with finite support in $(\mathcal{C}, \mathcal{G})$ | 375 |
| 8.3.3.3. Von Neumann–Morgenstern theorem for distributions with bounded support in $(\mathcal{C}, \mathcal{G})$ | 376 |
| 8.3.3.4. Von Neumann–Morgenstern theorem for distributions with bounded support in $(\mathbb{R}, \mathcal{B})$ | 376 |
| 8.3.4. Characterization of risk aversion in the EU model | 377 |
| 8.3.4.1. Characterization of first- and second-order dominance in the EU model | 377 |
| 8.3.5. Coefficient of absolute risk aversion, local value of the risk premium | 378 |
| 8.3.5.1. Coefficient of absolute risk aversion | 378 |
| 8.3.5.2. Local value of the risk premium | 378 |
| 8.3.5.3. Variance and EU model | 379 |
| 8.4. Problems raised by the EU model | 379 |
| 8.4.1. Allais paradox | 379 |
| 8.4.2. Interpreting the utility function | 380 |
| 8.4.3. Weak and strong risk aversion under expected utility | 380 |
| 8.4.4. Notion of SSD as a risk indicator in the EU model | 381 |
| 8.5. Some alternative models | 381 |
| 8.5.1. Machina's model | 381 |
| 8.5.2. Models with security and potential levels | 382 |

| | |
|---------------------------------|-----|
| 8.6. Acknowledgements | 382 |
| 8.7. Bibliography | 382 |

Chapter 9. Decision under Uncertainty: The Classical Models 385

Alain CHATEAUNEUF, Michèle COHEN, Jean-Yves JAFFRAY

| | |
|--|-----|
| 9.1. Introduction | 385 |
| 9.2. Subjective expected utility (SEU) | 386 |
| 9.2.1. Definitions and notation | 386 |
| 9.2.2. The SEU criterion | 386 |
| 9.3. Savage’s theory | 387 |
| 9.3.1. Savage’s axioms and their interpretation and implications | 387 |
| 9.3.1.1. Preferences on the acts | 387 |
| 9.3.1.2. Construction of Savage’s theory | 391 |
| 9.3.2.1. From qualitative to subjective probabilities | 391 |
| 9.3.2.2. Subjective lotteries and linear utility | 392 |
| 9.3.2.3. Extension of SEU to all acts | 394 |
| 9.3.3. The Ellsberg paradox | 394 |
| 9.4. Anscombe and Aumann theory | 396 |
| 9.4.1. The Anscombe–Aumann axiom system | 396 |
| 9.4.2. Comments and discussion | 397 |
| 9.4.3. The Anscombe–Aumann representation theorem | 397 |
| 9.4.4. Return to the Ellsberg paradox | 398 |
| 9.5. Conclusion | 399 |
| 9.6. Bibliography | 399 |

Chapter 10. Cardinal Extensions of the EU Model Based on the Choquet Integral 401

Alain CHATEAUNEUF, Michèle COHEN

| | |
|--|-----|
| 10.1. Introduction | 401 |
| 10.2. Notation and definitions | 402 |
| 10.2.1. The notion of comonotony | 403 |
| 10.2.2. The Choquet integral | 404 |
| 10.2.3. Characterization of the Choquet integral | 405 |
| 10.3. Decision under uncertainty | 405 |
| 10.3.1. Ellsberg’s paradox | 405 |
| 10.3.1.1. Interpretation of Ellsberg’s paradox in the framework of Savage | 406 |
| 10.3.1.2. Interpretation of Ellsberg’s paradox in the framework of Anscombe and Aumann | 406 |
| 10.3.2. Schmeidler’s model in Anscombe–Aumann framework | 407 |
| 10.3.2.1. Comonotonic independence | 408 |
| 10.3.2.2. Representation of preferences by a Choquet integral in Anscombe–Aumann’s framework | 408 |

10.3.3. Choquet expected utility (CEU) models in Savage’s framework . 409

 10.3.3.1. Simplified version of Schmeidler’s model in Savage’s framework 409

 10.3.3.2. Choquet expected utility model in Savage’s framework . . 411

 10.3.3.3. Example of computation of such a Choquet integral 412

 10.3.3.4. The comonotonic sure-thing principle 412

10.3.4. Uncertainty aversion 413

10.3.5. The multiprior model 415

 10.3.5.1. The axiomatic of the model 415

 10.3.5.2. Comparing multiprior model with Choquet utility model . 416

 10.3.5.3. CEU model and lower and upper envelopes of a probability distributions family 417

10.4. Decision under risk 418

 10.4.1. EU model and Allais paradox 419

 10.4.2. The rank-dependent expected utility model 420

 10.4.2.1. Definition of the rank-dependent expected utility model . . 420

 10.4.2.2. Key axiom of RDU’s axiomatization: comonotonic sure-thing principle 422

 10.4.3. From the CEU to the RDU model using first-order stochastic dominance 424

 10.4.3.1. RDU representation is a Choquet integral 424

 10.4.3.2. From the CEU to the RDU 424

 10.4.4. Risk aversion notions and characterization in the RDU model . . 425

 10.4.4.1. Strong risk aversion 426

 10.4.4.2. Monotone risk aversion 426

 10.4.4.3. Left monotone risk aversion 427

 10.4.4.4. Characterization of risk aversion notions in the RDU model 428

10.5. Bibliography 429

Chapter 11. A Survey of Qualitative Decision Rules under Uncertainty . . 435

Didier DUBOIS, Hélène FARGIER, Henri PRADE, Régis SABBADIN

11.1. Introduction 435

11.2. Quantitative versus qualitative decision rules 437

11.3. Ordinal decision rule without commensurateness 441

11.4. Axiomatics of qualitative decision theory 445

 11.4.1. Savage’s theory: a refresher 445

 11.4.2. The relational approach to decision theory 449

 11.4.3. Qualitative decision rules under commensurateness 452

11.5. Toward more efficient qualitative decision rules 457

 11.5.1. Refining qualitative criteria 458

 11.5.2. A bridge between generalized maxmin criteria and expected utility 460

 11.5.3. Weighted Leximax/Leximin criteria 463

| | |
|---|------------|
| 11.5.4. The representation of uncertainty underlying Leximax(Leximin) and Leximin(Leximax) criteria | 465 |
| 11.6. Conclusion | 466 |
| 11.7. Bibliography | 467 |
| Chapter 12. A Cognitive Approach to Human Decision Making | 475 |
| Éric RAUFASTE, Denis J. HILTON | |
| 12.1. Introduction | 475 |
| 12.2. Humans do not match current rational models | 476 |
| 12.2.1. Overconfidence and calibration of judgement | 476 |
| 12.2.2. Preference reversals and framing effects | 477 |
| 12.2.3. Subjectivation of expected utility: prospect theory | 478 |
| 12.2.4. Questions raised by the standard model | 480 |
| 12.3. A global descriptive approach to decision making | 481 |
| 12.3.1. The concept of multicriteria decision making | 482 |
| 12.3.2. The notion of dominance structure | 483 |
| 12.3.2.1. The dominance rule | 483 |
| 12.3.2.2. The search for dominance | 483 |
| 12.3.2.3. Dominance structures | 483 |
| 12.3.3. Steps in the decision making process | 484 |
| 12.3.3.1. Pre-edition | 484 |
| 12.3.3.2. Search for a focal alternative | 485 |
| 12.3.3.3. The test of dominance | 485 |
| 12.3.3.4. Dominance structuring | 486 |
| 12.4. Attentional focusing | 487 |
| 12.5. Evaluation heuristics and ecological rationality | 489 |
| 12.5.1. Logical rationality and ecological rationality | 489 |
| 12.5.2. The representativeness heuristic | 491 |
| 12.5.3. The availability heuristic | 492 |
| 12.5.4. The anchoring-adjustment heuristic | 493 |
| 12.5.5. Conclusion on heuristics | 494 |
| 12.6. The role of affect in decision making | 495 |
| 12.6.1. The positive role of emotions | 495 |
| 12.6.2. Affect and expected utility | 496 |
| 12.7. Conclusion | 498 |
| 12.8. Bibliography | 499 |
| Chapter 13. Bayesian Networks | 505 |
| Jean-Yves JAFFRAY | |
| 13.1. Introduction | 505 |
| 13.2. Definitions and notation | 507 |
| 13.2.1. Joint and marginal probabilities | 507 |
| 13.2.2. Independence | 508 |

13.2.3. Conditional probabilities 509

13.2.4. Conditional independence 510

13.2.5. Bayesian network 511

13.2.6. Graphical conditional independence criterion in BNs: d-separation 513

 13.2.6.1. d-separation 515

13.3. Evidential data processing in a BN 516

 13.3.1. Pearl’s method 517

 13.3.2. The junction tree method 523

 13.3.2.1. Construction of the junction tree 523

 13.3.2.2. Evidential data processing in a junction tree 525

13.4. Constructing a BN 528

 13.4.1. Score-based methods 528

 13.4.2. Conditional independence based methods 529

 13.4.3. Search among Markov equivalence classes 529

 13.4.4. Causality 530

 13.4.5. Conditioning by intervention in causal graphs 531

13.5. BNs and influence diagrams 532

 13.5.1. Dynamic decision making under uncertainty 532

 13.5.1.1. An example of dynamic decision problem under risk 533

 13.5.1.2. Decision tree of the problem 533

 13.5.1.3. Optimization by dynamic programming 534

 13.5.1.4. Limits of the classical method 535

 13.5.2. Influence diagrams 535

 13.5.2.1. Origin of the influence diagrams 535

 13.5.2.2. Semantics of IDs 536

 13.5.2.3. The methods of Shachter and Shenoy 536

 13.5.2.4. The junction tree method 537

13.6. Conclusion 537

13.7. Software 538

13.8. Bibliography 538

Chapter 14. Planning under Uncertainty with Markov Decision Processes 541

Régis SABBADIN

14.1. Introduction 541

14.2. Markov decision processes 542

 14.2.1. Problem formulation 542

 14.2.1.1. States, actions, transitions and policies 542

 14.2.1.2. Reward, criterion, value function, optimal policy 543

 14.2.2. Classical solution algorithms for MDP 544

 14.2.2.1. Finite horizon: backwards induction 544

 14.2.2.2. Infinite horizon: value iteration and policy iteration 544

 14.2.3. Example: car race 546

 14.2.4. Recent advances in Markov decision processes 548

| | |
|---|-----|
| 14.3. Partially observed MDPs | 549 |
| 14.3.1. POMDP model, continuous-MDP transformation | 549 |
| 14.3.2. Computing optimal policies in a POMDP | 550 |
| 14.3.2.1. t -policy tree | 551 |
| 14.3.2.2. Value iteration algorithm for POMDP | 553 |
| 14.3.3. POMDP example | 553 |
| 14.3.4. Concluding remarks | 554 |
| 14.4. Real-time dynamic programming and reinforcement learning | 555 |
| 14.4.1. Introduction | 555 |
| 14.4.2. Real-time dynamic programming | 555 |
| 14.4.2.1. Gauss–Seidel algorithm | 555 |
| 14.4.2.2. Asynchronous dynamic programming | 556 |
| 14.4.2.3. Real-time dynamic programming | 557 |
| 14.4.3. Reinforcement learning | 558 |
| 14.4.3.1. Indirect reinforcement learning | 558 |
| 14.4.3.2. Direct reinforcement learning | 559 |
| 14.4.4. Concluding remarks | 560 |
| 14.5. Factored Markov decision processes | 561 |
| 14.5.1. State space factorization, stationary homogenous Bayesian networks | 561 |
| 14.5.2. Factored representation of actions | 563 |
| 14.5.3. Factored representation of rewards | 563 |
| 14.5.4. Factored representation of value functions and policies and computation of optimal policies | 564 |
| 14.5.5. Concluding remarks | 564 |
| 14.6. Possibilistic Markov decision processes | 565 |
| 14.6.1. Background on qualitative possibility theory | 565 |
| 14.6.2. Possibilistic counterparts of expected utility | 566 |
| 14.6.3. Possibilistic Markov decision processes | 568 |
| 14.6.3.1. Finite horizon | 568 |
| 14.6.3.2. Possibilistic value iteration | 570 |
| 14.6.3.3. Policy iteration algorithm | 572 |
| 14.6.4. Concluding remarks | 573 |
| 14.7. Conclusion | 573 |
| 14.8. Bibliography | 574 |

Chapter 15. Multiattribute Utility Theory 579

Mohammed ABDELLAOU, Christophe GONZALES

| | |
|--|-----|
| 15.1. Introduction | 579 |
| 15.2. Introduction to utility theory | 580 |
| 15.2.1. Utility functions | 580 |
| 15.2.2. Decision under certainty, uncertainty and risk | 581 |
| 15.2.3. Multiattribute utility functions | 583 |

| | |
|--|-----|
| 15.2.4. Decompositions of utility functions | 584 |
| 15.3. Decomposition under certainty | 586 |
| 15.3.1. Additive decomposition in two-dimensional spaces | 586 |
| 15.3.2. Extension to more general outcome sets | 594 |
| 15.4. Decompositions under uncertainty | 597 |
| 15.4.1. Decomposition in two-dimensional spaces | 599 |
| 15.4.2. Extension of the two-dimensional decomposition | 603 |
| 15.5. Elicitation of utility functions | 605 |
| 15.5.1. Elicitation under certainty | 606 |
| 15.5.2. Elicitation under uncertainty | 609 |
| 15.6. Conclusion | 613 |
| 15.7. Bibliography | 614 |

Chapter 16. Conjoint Measurement Models for Preference Relations 617

Denis BOUYSSOU, Marc PIRLOT

| | |
|---|-----|
| 16.1. Introduction | 617 |
| 16.1.1. Brief overview of conjoint measurement models | 618 |
| 16.1.2. Chapter contents | 620 |
| 16.2. Fundamental relations and trivial models | 623 |
| 16.2.1. Binary relations on a product set | 623 |
| 16.2.2. Independence and marginal preferences | 624 |
| 16.2.3. Marginal traces on levels | 625 |
| 16.2.4. Marginal traces on differences | 626 |
| 16.2.5. Three models for general relations on a Cartesian product | 628 |
| 16.3. Models using marginal traces on levels | 629 |
| 16.3.1. Definition of the models | 629 |
| 16.3.2. Completeness of marginal traces and monotonicity of F | 631 |
| 16.3.3. Model ($L8$) and strict monotonicity w.r.t. traces | 634 |
| 16.3.4. Complete characterization of the models on levels | 636 |
| 16.3.4.1. Uniqueness and regular representations | 637 |
| 16.3.5. Relations compatible with dominance | 637 |
| 16.3.6. Strict compatibility with dominance | 640 |
| 16.3.7. The case of weak orders | 641 |
| 16.3.8. Examples | 642 |
| 16.4. Models using marginal traces on differences | 644 |
| 16.4.1. Models definition | 644 |
| 16.4.2. Completeness of marginal traces on differences and monotonicity of G | 646 |
| 16.4.3. Characterization of model ($D11$) | 650 |
| 16.4.4. Remarks | 651 |
| 16.4.4.1. Goldstein's model | 651 |
| 16.4.4.2. Marginal preferences | 651 |
| 16.4.4.3. Uniqueness of the representation | 652 |

| | |
|---|------------|
| 16.4.5. Examples | 653 |
| 16.5. Models using both marginal traces on levels and on differences | 655 |
| 16.5.1. Relationships between traces on differences and on levels | 657 |
| 16.5.2. Study of models ($L1D0$) to ($L1D11$) and ($L2D0$) to ($L2D11$) | 661 |
| 16.5.3. Examples | 664 |
| 16.6. Conclusion | 665 |
| 16.7. Bibliography | 667 |
| Chapter 17. Aggregation Functions for Decision Making | 673 |
| Jean-Luc MARICHAL | |
| 17.1. Introduction | 673 |
| 17.2. Aggregation properties | 676 |
| 17.2.1. Elementary mathematical properties | 677 |
| 17.2.2. Stability properties related to scale types | 678 |
| 17.2.3. Algebraic properties | 680 |
| 17.3. Means | 682 |
| 17.3.1. Quasi-arithmetic means | 685 |
| 17.3.2. Lagrangian and Cauchy means | 687 |
| 17.4. Associative aggregation functions | 688 |
| 17.4.1. Strictly increasing functions | 689 |
| 17.4.2. Archimedean semigroups | 690 |
| 17.4.3. A class of non-decreasing and associative functions | 693 |
| 17.4.4. Internal associative functions | 695 |
| 17.4.5. t-norms, t-conorms, and uninorms | 697 |
| 17.5. Non-additive integrals | 698 |
| 17.5.1. Motivations | 698 |
| 17.5.2. The Choquet integral | 700 |
| 17.5.3. The Sugeno integral | 704 |
| 17.6. Aggregation on ratio and interval scales | 709 |
| 17.7. Aggregation on ordinal scales | 711 |
| 17.8. Conclusion | 714 |
| 17.9. Bibliography | 714 |
| Chapter 18. Subjective Evaluation | 723 |
| Michel GRABISCH | |
| 18.1. Introduction | 723 |
| 18.2. What is subjective evaluation? | 725 |
| 18.2.1. General definition and related domains | 725 |
| 18.2.2. Definition of our scope | 726 |
| 18.3. A multicriteria approach to subjective evaluation | 727 |
| 18.3.1. The importance of affect in evaluation | 728 |
| 18.3.2. Measurement theory, notion of scale | 729 |
| 18.3.3. Unipolar and bipolar scales | 733 |

| | |
|--|-----|
| 18.3.4. The MACBETH approach | 735 |
| 18.3.5. Construction of the model of subjective evaluation | 738 |
| 18.4. Construction of the aggregation function | 740 |
| 18.4.1. Case of cardinal unipolar scales | 740 |
| 18.4.2. Case of cardinal bipolar scales | 743 |
| 18.5. The case of ordinal scales | 747 |
| 18.5.1. Introduction | 747 |
| 18.5.2. The Sugeno integral | 749 |
| 18.5.3. The symmetric Sugeno integral and bipolar models | 750 |
| 18.6. Identification of the parameters of the aggregation function | 752 |
| 18.6.1. Cardinal case | 753 |
| 18.6.2. Ordinal case | 755 |
| 18.7. Interpretation of the aggregation function | 758 |
| 18.7.1. Index of importance of a criterion | 759 |
| 18.7.2. Index of interaction | 760 |
| 18.7.3. Maximum improving index | 764 |
| 18.7.4. Conjunction and disjunction indices | 765 |
| 18.7.5. Veto and index of veto | 765 |
| 18.8. Particular families of capacities and bicapacities | 766 |
| 18.9. Applications | 768 |
| 18.10. Conclusion | 771 |
| 18.11. Bibliography | 771 |

Chapter 19. Social Choice Theory and Multicriteria Decision Aiding 779

Denis BOUYSSOU, Thierry MARCHANT, Patrice PERNY

| | |
|--|-----|
| 19.1. Introduction | 779 |
| 19.2. Introductory examples | 780 |
| 19.2.1. Uninominal systems | 781 |
| 19.2.2. Systems based on rankings | 786 |
| 19.3. Some theoretical results | 789 |
| 19.3.1. Arrow's theorem | 789 |
| 19.3.1.1. Arrow's theorem and fuzzy preferences | 794 |
| 19.3.2. Some other results | 795 |
| 19.3.2.1. Impossibility results | 796 |
| 19.3.2.2. Characterizations | 796 |
| 19.3.2.3. Generalizations of the Borda method | 799 |
| 19.3.2.4. A characterization of simple majority | 799 |
| 19.3.2.5. Analysis | 801 |
| 19.4. Multicriteria decision aiding and social choice theory | 801 |
| 19.4.1. Relevance and limits of social choice results | 801 |
| 19.4.2. Some results in close relation with multicriteria analysis | 803 |
| 19.4.2.1. TACTIC | 803 |
| 19.4.2.2. Multi-attribute value theory (MAVT) | 804 |

19.4.2.3. Weighted sum 804

19.4.2.4. ELECTRE and PROMETHEE 804

19.5. Bibliography 805

Chapter 20. Metric and Latticial Medians 811
Olivier HUDRY, Bruno LECLERC, Bernard MONJARDET,
Jean-Pierre BARTHÉLEMY

20.1. Introduction 811

20.1.1. Medians in general 811

20.1.2. Medians of binary relations 812

20.1.3. Medians in lattices 813

20.2. Median relations 814

20.2.1. The model 814

20.2.2. The median procedure 815

20.2.3. The \mathcal{R} -medians of a profile of relations 816

20.2.4. The \mathcal{M} -medians of a profile of relations 820

20.2.5. The \mathcal{T} -medians of a profile of tournaments 820

20.3. The median linear orders (\mathcal{L} -medians) of a profile of linear orders 822

20.3.1. Binary linear programming formulation 822

20.3.2. Formulation using weighted directed graphs 824

20.3.3. Equivalent formulations for the search of a median order of a profile of linear orders 825

20.3.4. Complexity of the search of a median order of a profile of linear orders 829

20.3.5. Exact and approximate methods 830

20.3.6. Properties of median orders 833

20.4. Medians in lattices and semilattices 836

20.4.1. Ordered structures 837

20.4.2. Symmetric difference distance in semilattices and remoteness 840

20.4.3. Medians in median semilattices 841

20.4.4. Other semilattices 844

20.4.5. Applications 845

20.5. Conclusion 846

20.6. Acknowledgements 849

20.7. Bibliography 849
