<i>Prefacey</i>	xv
<b>PART I Single-Period Portfolio Choice and Asset Pricing</b>	<b>1</b>
1 Expected Utility and Risk Aversion	3
1.1 Preferences When Returns Are Uncertain	4
1.2 Risk Aversion and Risk Premia	11
1.3 Risk Aversion and Portfolio Choice	19
1.4 Summary	24
1.5 Exercises	25
2 Mean-Variance Analysis	27
2.1 Assumptions on Preferences and Asset Returns	28
2.2 Investor Indifference Relations	31
2.3 The Efficient Frontier	34
2.3.1 <i>A Simple Example</i>	35
2.3.2 <i>Mathematics of the Efficient Frontier</i>	37
2.3.3 <i>Portfolio Separation</i>	40
2.4 The Efficient Frontier with a Riskless Asset	44
2.4.1 <i>An Example with Negative Exponential Utility</i>	48
2.5 An Application to Cross-Hedging	50
2.6 Summary	53
2.7 Exercises	54

<b>3</b>	<b>CAPM, Arbitrage, and Linear Factor Models</b>	<b>57</b>
3.1	The Capital Asset Pricing Model	58
3.1.1	<i>Characteristics of the Tangency Portfolio</i>	59
3.1.2	<i>Market Equilibrium</i>	60
3.2	Arbitrage	66
3.2.1	<i>Examples of Arbitrage Pricing</i>	67
3.3	Linear Factor Models	70
3.4	Summary	16
3.5	Exercises	77
<b>4</b>	<b>Consumption-Savings Decisions and State Pricing</b>	<b>79</b>
4.1	Consumption and Portfolio Choices	80
4.2	An Asset Pricing Interpretation	84
4.2.1	<i>Real versus Nominal Returns</i>	85
4.2.2	<i>Risk Premia and the Marginal Utility of Consumption</i>	86
4.2.3	<i>The Relationship to CAPM</i>	86
4.2.4	<i>Bounds on Risk Premia</i>	88
4.3	Market Completeness, Arbitrage, and State Pricing	91
4.3.1	<i>Complete Markets Assumptions</i>	92
4.3.2	<i>Arbitrage and State Prices</i>	93
4.3.3	<i>Risk-Neutral Probabilities</i>	95
4.3.4	<i>State Pricing Extensions</i>	97
4.4	Summary	97
4.5	Exercises	98

## **PART II    Multiperiod Consumption, Portfolio Choice, and Asset Pricing    101**

<b>5</b>	<b>A Multiperiod Discrete-Time Model of Consumption and Portfolio Choice</b>	<b>103</b>
5.1	Assumptions and Notation of the Model	105
5.1.1	<i>Preferences</i>	105
5.1.2	<i>The Dynamic's of Wealth</i>	106
5.2	Solving the Multiperiod Model	107
5.2.1	<i>The Final Period Solution</i>	108

5.2.2 *Deriving the Bellman Equation'* 110  
 5.2.3 *The General Solution* 112  
 5.3 Example Using Log Utility 113  
 5.4 Summary 117 . -. ,  
 5.5 Exercises 118

**6 Multiperiod Market Equilibrium 121**

6.1 Asset Pricing in the Multiperiod Model 122  
 6.1.4 *The Multiperiod Pricing Kernel.* 122  
 6.2 The Lucas Model of Asset Pricing 124  
 6.2.1 *Including Dividends in Asset Returns* 125  
 6.2.2 • *Equating Dividends to Consumption* 127  
 6.2.3 *Asset Pricing Examples* 127  
 6.2.4 *A Lucas Model with Labor Income* 129  
 6.3 Rational Asset Price Bubbles 131  
 6.3.1 *Examples of Bubble Solutions* 133 {  
 6.3.2 *The Likelihood of Rational Bubbles* 133  
 6.4 Summary 135  
 6.5 Exercises 136

**PART III Contingent Claims Pricing 139**

**7 Basics of Derivative Pricing ^ 141**

7.1 Forward and Option Contracts 142  
 7.1.1 *Forward Contracts on Assets Paying Dividends* 142  
 7.1.2 *Basic Characteristics of Option Prices* 145  
 7.2 Binomial Option Pricing 149  
 7.2.1 *Valuing a One-Period Option* 150  
 7.2.2 *Valuing a Multiperiod Option* 153  
 7.3 Binomial Model Applications 156  
 7.3.1 *Calibrating the Model* 157  
 7.3.2 *Valuing an American Option* 158  
 7.3.3 *Options on Dividend-Paying Assets* 162  
 7.4 Summary 162  
 7.5 ^ Exercises 163

<b>8</b>	<b>Essentials of Diffusion Processes and Ito's Lemma</b>	<b>165</b>
8.1	Pure Brownian Motion	166
8.1.1	<i>The Continuous-Time Limit</i>	167
8.2	Diffusion Processes	169
8.2.1	<i>Definition of an Ito Integral</i>	170
8.3	Functions of Continuous-Time Processes and Ito's Lemma	172
8.3.1	<i>Geometric Brownian Motion</i>	174
8.3.2	<i>Kolmogorov Equation</i>	175
8.3.3	<i>Multivariate Diffusions and Ito's Lemma</i>	177
8.4	Summary	178
8.5	Exercises	179
<b>9</b>	<b>Dynamic Hedging and PDE Valuation</b>	<b>181</b>
9.1	Black-Scholes Option Pricing	182
9.1.1	<i>Portfolio Dynamics in Continuous Time</i>	182
9.1.2	<i>Black-Scholes Model Assumptions</i>	185
9.1.3	<i>The Hedge Portfolio</i>	186
9.1.4	<i>No-Arbitrage Implies a PDE</i>	187
9.2	An Equilibrium Term Structure Model	189
9.2.1	<i>A Bond Risk Premium</i>	193
9.2.2	<i>Characteristics of Bond Prices</i>	194
9.3	[ Option Pricing with Random Interest Rates	195
9.4	Summary	199
9.5	Exercises	200
<b>10</b>	<b>Arbitrage, Martingales, and Pricing Kernels</b>	<b>203</b>
10.1	Arbitrage and Martingales	204
10.1.1	<i>A Change in Probability: Girsanov's Theorem</i>	206
10.1.2	<i>Money Market Deflator</i>	208
10.1.3	<i>Feynman-Kac Solution</i>	209
10.2	Arbitrage and Pricing Kernels	210
10.2.1	<i>Linking the Valuation Methods</i>	212
10.2.2	<i>The Multivariate Case</i>	213
10.3	Alternative Price Deflators	213
10.4	Applications	215

10.4.1 *Continuous Dividends* .216 \ '

10.4.2 *The Term Structure Revisited* 219

10.5 Summary 220- • • . \

10.6 Exercises -'221

**11 Mixing Diffusion and Jump Processes 225**

11.1 Modeling Jumps in Continuous Time 226

11.2 Ito's Lemma for Jump-Diffusion Processes 227

11.3 Valuing Contingent Claims 228

11.3.1 *An Imperfect Hedge* 229

11.3.2 *Diversifiable Jump Risk* 231

' 11.3.3 *Lognormal Jump Proportions* 232

11.3.4 *Nondiversifiable Jump Risk* .233

11.3.5 *Black-Scholes versus Jump-Diffusion Model* 234

11.4 Summary 235 .!'•'..

<sup>1</sup> 11.5- Exercises 236

**PART IV Asset Pricing in Continuous Time 239**

**12 Continuous-Time Consumption and Portfolio Choice ••. 241**

12.1 Model Assumptions 242

12.2 Continuous-Time Dynamic Programming 244

12.3; Solving the Continuous-Time Problem '246

12.3.1 *Constant Investment Opportunities* 247

12.3.2 *Changing Investment Opportunities.* -252

12.4 The Martingale Approach to Consumption and Portfolio Choice 258

12.4.1 *Market Completeness Assumptions* 259

12.4.2 *The Optimal Consumption Plan* 260

12.4.3 *The Portfolio Allocation* 263

12.4.4 *An Example* 264

12.5 Summary 268

12.6 Exercises 268

<b>13</b>	<b>Equilibrium Asset Returns</b>	<b>275</b>
13.1	An Intertemporal Capital Asset Pricing Model	276
13.1.1	<i>Constant Investment Opportunities</i>	276
13.1.2	<i>Stochastic Investment Opportunities</i>	278
13.1.3	<i>An Extension to State-Dependent Utility</i>	280
13.2	Breeden's Consumption CAPM	280
13.3	A Cox, Ingersoll, and Ross Production Economy	283
13.3.1	<i>An Example Using Log Utility</i>	289'
13.4	Summary	292
13.5	Exercises	293

**Time-Inseparable Utility** **295**

14.1	Constantiriides'internal Habit Model	296
14.1.1	<i>Assumptions,</i>	297
14.1.2	<i>Consumption and Portfolio Choices</i>	300
14.2	Campbell and Cochrane's External Habit Model	304
14.2.1	<i>Assumptions</i>	304
14.2.2	<i>Equilibrium Asset Prices</i>	305
14.3-	<i>Recursive;Utility</i>	-308,
14.3:1	<i>A Model by Obstfeld</i>	309
14.3.2	<i>Discussion of the Model</i>	313
14.4	Summary	315
14.5	Exercises	316

**PART V Additional Topics in Asset Pricing 319**

<b>15</b>	<b>Behavioral Finance and Asset Pricing</b>	<b>321</b>
15-1	The Effects of Psychological Biases on Asset Prices	323
15.1.1	<i>Assumptions</i>	323
15.1.2	<i>Solving the Model</i>	326'''
15.1.3	<i>Model Results</i>	329'
15.2	The Impact of Irrational Traders on Asset Prices	329
15.2.1	<i>Assumptions</i>	329
15.2.2	<i>Solution Technique</i>	331

15.2.3 *Analysis of the Results* 335, ; • : -  
 15.3 Summary 341  
 15.4 Exercises 341

r \ i

**16 Asset Pricing with Differential Information 343**

16.1 Equilibrium with Private Information 344 : • . . • • '  
 16.1.1 *Grossman Model Assumptions* 344  
 16.1.2 *Individuals' Asset Demands* 345  
 16.1.3 *A Competitive Equilibrium* 346  
 16.1.4 *A Rational Expectations Equilibrium* 347  
 16.1.5 *A Noisy Rational Expectations Equilibrium* 349  
 16.2 Asymmetric Information, Trading, and Markets 352  
 16.2.1 *Kyle Model Assumptions* 352  
 16.2.2 *Trading and Pricing Strategies* 353  
 16.2.3 *Analysis of the Results* 356  
 16.3 Summary 358  
 16.4 Exercises 358

**17 Models of the Term Structure of Interest Rates 361**

17.1 Equilibrium Term Structure Models 361  
 17.1.1 *Affine Models* 364  
 17.1.2 *Quadratic Gaussian Models* 368  
 17.1.3 *Other Equilibrium Models* 371  
 17.2 Valuation Models for Interest Rate Derivatives 371  
 17.2.1 *Heath-Jarrow-Morton Models* 372  
 17.2.2 *Market Models* 382  
 17.2.3 *Random Field Models* 389  
 17.3 Summary 394  
 17.4 Exercises 394

**18 Models of Default Risk 397**

18.1 The Structural Approach 398  
 18.2 The Reduced-Form Approach 401  
 18.2.1 *A Zero-Recovery Bond* 402

18.2.2	<i>Specifying Recovery Values</i>	404
18.2.3	<i>Examples</i>	408
18.3	Summary	411
18.4	Exercises	412
