Contents

1	Introduction and Overview	15
1.1	Sales and Distribution in the SAP World	17
1.1.1	Meeting Customer Requirements	18
1.1.2	Shipping Materials to the Customer	20
1.1.3	Getting Paid for Services or Goods	20
1.2	Key Influence of the Organizational Structure	22
1.2.1	Organizational Units	23
1.2.2	Linking Organizational Structures	33
1.3	Key Processes in Sales and Distribution	36
1.3.1	Sales Document Structure	38
1.3.2	Sources of Document Data	39
1.3.3	Controlling Business Processes in Sales	41
1.4	What is New in mySAP ERP?	45
1.4.1	Functionality Enhancements Within SAP R/3 Releases	47
1.4.2	Sales Order Management	49
1.4.3	New Features in mySAP ERP 2005	51
1.4.4	SAP Analytics	52
1.5	Summary	54
1.6	The Information Contained in This Book	54
1.7	How to Read This Book	57
2	Sales and Distribution Master Data and Configuration: Applications and Processing	59
2.1	Master Data in Sales and Distribution	60
2.1.1	Customer Master Data	61
2.1.2	Material Master Data	66
2.1.3	Condition Master Data	70
2.2	Sales and Distribution Processes: Data Determination and Processing	73
2.2.1	Plant	75
2.2.2	Shipping Point Determination	75
2.2.3	Route Determination	76
2.3	Controlling Sales Document with Sales Document Type	77
2.3.1	Configuring Sales Document Types	79

2.3.2	Controlling Sales Document with Item Category	82
2.3.3	Controlling Sales Documents with Schedule Line Category	85
2.4	Summary	89
3 Key Techniques in Sales and Distribution		91
3.1	Pricing Fundamentals	92
3.1.1	Pricing Overview	93
3.1.2	Header Conditions	96
3.1.3	New Pricing	97
3.1.4	Pricing Configurations	97
3.1.5	Access Sequence	97
3.1.6	Condition Type	98
3.1.7	Procedure Determination	98
3.1.8	Working with Condition Records	101
3.1.9	Price Report	103
3.1.10	Special Functions	104
3.1.11	Special Condition Types	106
3.1.12	Determining Taxes, Rebates, and Agreements	109
3.2	Making Partner Determination Work for Your Business	113
3.2.1	Partner Functions	114
3.2.2	Customer Master and Account Group	116
3.3	Working with Text Items	118
3.3.1	Text in Sales and Distribution Documents	119
3.3.2	Copying and Referencing Sales Texts	121
3.4	Copy Control and Requirements	121
3.4.1	Configuring Copy Control in SD	122
3.4.2	Data Transfer Routines and Requirements	124
3.5	Summary	125
4 Influence of SD on Materials Management		127
4.1	Availability	128
4.1.1	Availability Check Control	130
4.1.2	Back-Order Processing	131
4.1.3	Configuration Setting	132
4.1.4	MRP Types	133
4.1.5	Transfer Requirements	135
4.1.6	Batches	137
4.1.7	Bill of Material	138

4.2	Cross-Company Sales	138
4.2.1	Sales Order for Cross-Company Sales	139
4.2.2	Inter-Company Billing	141
4.3	Inter-Company and Cross-Company Stock Transfer	144
4.3.1	Stock Transport Orders	144
4.3.2	Materials Resource Planning	145
4.3.3	Document Type	146
4.3.4	Configurations Steps for Stock Transport Order	146
4.3.5	Shipping Process	147
4.3.6	Goods Movement	148
4.4	Third-Party Processing	150
4.4.1	Ordering Through Third-Party Processing	151
4.4.2	Goods Receipt	153
4.4.3	Invoice Receipt	154
4.4.4	Customer Billing	154
4.5	Subcontracting	155
4.5.1	Procurement Process	156
4.5.2	Goods Movement	157
4.5.3	Sales and Distribution Delivery	158
4.5.4	Serial Numbers	160
4.6	Agreements	161
4.6.1	Scheduling Agreements	161
4.6.2	Contracts	161
4.6.3	Scheduling Agreements vs. Contracts	162
4.7	Summary	163

5 Supply Chain Extension of Sales and Distribution **165**

5.1	Transportation with Logistics Execution and Shipment	
	Execution	166
5.1.1	Shipment Documents	167
5.1.2	Individual vs. Collective Shipments	169
5.1.3	Stages of Shipments	171
5.1.4	Delivery Split	172
5.1.5	Transportation	173
5.2	Warehouse Management Basics and Business Process	
	Outsourcing	178
5.2.1	Basic Functions of Warehouse Management	179
5.2.2	Interfaces with Other Applications	180
5.2.3	Organizational Structure	180
5.2.4	Delivery Processes with Warehouse Management	182

5.3	Decentralized Warehouse Management	186
5.3.1	WMS Applications	186
5.3.2	Prerequisites for Connecting Decentralized WMS to an ERP System	188
5.3.3	Inbound and Outbound Deliveries	188
5.3.4	Distributed Model	189
5.4	Summary	190

6 Financials and Controlling: Key Influence and Interface 193

6.1	Integration of Billing in SD Processes	194
6.1.1	Special Billing	196
6.1.2	Creating Billing Documents	198
6.1.3	Payment Processing	202
6.1.4	Reference Data for Account Posting	203
6.2	Account Determination	205
6.2.1	Ex Stock Sale Process	206
6.2.2	Sale of Services	206
6.2.3	Account Assignment Criteria	206
6.3	Financials Supply Chain Management	209
6.3.1	Financials Accounting	209
6.3.2	Electronic Bill Presentment and Payment	210
6.3.3	Credit and Risk Management	212
6.3.4	Settings	213
6.3.5	Value Contract	214
6.4	Interface with Profitability Analysis (CO-PA)	217
6.4.1	Evaluation and Reporting	218
6.4.2	Profitability Analysis Procedures	219
6.5	Summary	220

7 Influence of SM and QM in SD Processes 223

7.1	Service Management	224
7.1.1	Documents in Customer Services	226
7.1.2	Notification Types	228
7.1.3	Catalogs	231
7.1.4	Solution Database	232
7.2	Processing Service Orders	232
7.2.1	Order Components	233
7.2.2	Advance Shipment	234
7.2.3	Customer Consignment	234
7.2.4	Paging and Mobile	236

7.3	Complaints and Returns	238
7.3.1	Business Processes and Scenarios	240
7.3.2	Customizing Settings	241
7.4	Quality Processes in SD	244
7.4.1	Certification Planning	245
7.4.2	Certificate Processing	247
7.4.3	Batch Determination	248
7.4.4	QM In Delivery	249
7.5	Workflow	250
7.5.1	Workflow Architecture	251
7.5.2	Workflow Design	253
7.6	Summary	254

8 Reports, Analysis, User Interface and Development Tools for SD 257

8.1	Quick Views, Query, Lists, and Reports	258
8.1.1	QuickViewer and Query	258
8.1.2	SAP Query	260
8.1.3	Lists and Report	262
8.2	Sales Information System	265
8.2.1	Analysis	266
8.2.2	Information Structures	268
8.3	SAP BW and Reporting Requirements	271
8.3.1	InfoObject	273
8.3.2	InfoCube	273
8.3.3	InfoProviders	274
8.3.4	Types of Data Stores	274
8.3.5	BW Architecture	274
8.3.6	Business Content	276
8.3.7	Sales Analytics	277
8.4	User Productivity	278
8.4.1	Internet Sales Representative Role	280
8.4.2	Enterprise Portal	285
8.5	Modifications and Enhancements—Concepts and Application	287
8.5.1	Concepts	287
8.5.2	Personalization	289
8.5.3	Modifications and Enhancements	290
8.6	Summary	297

9	Data Transfer, Outputs, Communication, and Interfaces with Other SAP Systems	299
9.1	Data Transfer	300
9.1.1	Techniques in Detail	301
9.1.2	Data Transfer Workbench	303
9.1.3	Legacy System Migration Workbench	304
9.1.4	Direct Input	305
9.1.5	Intermediate Documents	305
9.1.6	Business Application Programming Interfaces	306
9.2	Output Control	306
9.2.1	Output Determination: Applications	306
9.2.2	Output Determination: Condition Techniques	308
9.3	Communication	309
9.3.1	Synchronous and Asynchronous RFCs	310
9.3.2	Configuration Set-Up	311
9.3.3	RFC Utilities	313
9.4	Interfaces with Other Systems	314
9.4.1	Basic Parts of the Business Framework	314
9.4.2	Function Builder	316
9.4.3	Business Application	318
9.5	Access Shared Data	319
9.5.1	ALE Applications	320
9.5.2	IDoc Applications	324
9.6	Interfacing with the GTS System	329
9.6.1	SAP Foreign Trade and GTS	330
9.6.2	Plug-In	331
9.6.3	Configuration	333
9.7	Sales Process with mySAP CRM	337
9.7.1	MySAP CRM Architecture	339
9.7.2	Internet Sales and Customer Self-Service	341
9.7.3	Interaction Center	342
9.7.4	Integrating mySAP CRM with mySAP ERP	342
9.7.5	MySAP CRM Customization	343
9.8	Summary	344
9.9	Book Conclusion	345
