Contents

Preface xv

PART I THE THEORY OF FINANCE 1

1 Introduction: Capital Markets, Consumption, and Investment 3

- | | | | |
|---|----|--|----|
| A. Introduction | 3 | E. Transaction Costs and the Breakdown of Separation | 13 |
| B. Consumption and Investment without Capital Markets | 4 | Summary | 14 |
| C. Consumption and Investment with Capital Markets | 8 | Problem Set | 14 |
| D. Marketplaces and Transaction Costs | 12 | References | 15 |

2 Investment Decisions: The Certainty Case 17

- | | | | |
|---|----|---|----|
| A. Introduction | 17 | F. Comparison of Net Present Value with Internal Rate of Return | 29 |
| B. Fisher Separation: The Separation of Individual Utility Preferences from the Investment Decision | 18 | G. Cash Flows for Capital Budgeting Purposes | 34 |
| C. The Agency Problem | 19 | H. Relaxing the Assumptions | 39 |
| D. Shareholder Wealth Maximization | 20 | Summary | 40 |
| E. Capital Budgeting Techniques | 24 | Problem Set | 40 |
| | | References | 43 |

3 The Theory of Choice: Utility Theory Given Uncertainty 45

- | | | | |
|--|----|---|----|
| A. Five Axioms of Choice under Uncertainty | 46 | F. Using Mean and Variance as Choice Criteria | 62 |
| B. Developing Utility Functions | 48 | G. A Mean Variance Paradox | 66 |
| C. Establishing a Definition of Risk Aversion | 52 | H. Recent Thinking and Empirical Evidence | 68 |
| D. Comparison of Risk Aversion in the Small and in the Large | 57 | Summary | 69 |
| E. Stochastic Dominance | 59 | Problem Set | 69 |
| | | References | 73 |

4 State Preference Theory 75

- A. Uncertainty and Alternative Future States 76
- B. Definition of Pure Securities 77
- C. Complete Capital Market 77
- D. Derivation of Pure Security Prices 78
- E. No-Arbitrage Profit Condition 80
- F. Economic Determinants of Security Prices 81
- G. Optimal Portfolio Decisions 84
- H. The Efficient Set with Two Risky Assets (and No Risk-Free Asset) 86
- I. Firm Valuation, the Fisher Separation Principle, and Optimal Investment Decisions 89
 - Summary 92
 - Problem Set 92
 - References 94
- Appendix 4A. Forming a Portfolio of Pure Securities 96
- Appendix 4B. Use of Prices of State-Contingent Claims in Capital Budgeting 97

5 Objects of Choice: Mean-Variance Portfolio Theory 101

- A. Measuring Risk and Return for a Single Asset 102
- B. Measuring Portfolio Risk and Return 109
- C. The Efficient Set with Two Risky Assets (and No Risk-Free Asset) 121
- D. The Efficient Set with One Risky and One Risk-Free Asset 125
- E. Optimal Portfolio Choice: Many Assets 127
- F. Portfolio Diversification and Individual Asset Risk 137
 - Summary 141
 - Problem Set 141
 - References 144

6 Market Equilibrium: CAPM and APT 147

- A. Introduction 147
- B. The Efficiency of the Market Portfolio 148
- C. Derivation of the CAPM 149
- D. Properties of the CAPM 152
- E. Use of the CAPM for Valuation: Single-Period Models with Uncertainty 156
- F. Applications of the CAPM for Corporate Policy 157
- G. Extensions of the CAPM 159
- H. Empirical Tests of the CAPM 164
- I. The Market Risk Premium 171
- J. The Empirical Market Line 174
- K. The Problem of Measuring Performance: Roll's Critique 174
- L. The Arbitrage Pricing Theory 176
- M. Empirical Tests of the Arbitrage Pricing Theory 186
 - Summary 188
 - Problem Set 188
 - References 193

7 Pricing Contingent Claims: Option Pricing Theory and Evidence 199

- A. Introduction 199
- B. A Description of the Factors that Affect Prices of European Options 201
- C. Combining Options: A Graphic Presentation 204
- D. Equity as a Call Option 206

E. Put-Call Parity	208	K. Empirical Evidence on the Option Pricing Model	244
F. Some Dominance Theorems that Bound the Value of a Call Option	209	Summary	250
G. Derivation of the Option Pricing Formula— The Binomial Approach	217	Problem Set	250
H. Valuation of a Call On a Stock with No Dividends	230	References	252
I. Pricing American Put Options	237	Appendix 7A. Two Alternative Derivations of the Black-Scholes Option Pricing Model	255
J. Extensions of the Option Pricing Model	240		
8 The Term Structure of Interest Rates, Forward Contracts, and Futures	259		
A. The Term Structure of Interest Rates	259	F. Synthetic Futures and Options on Futures	293
B. Models of the Term Structure	265	Summary	296
C. Forward and Futures Contracts	273	Problem Set	297
D. The Theory of Futures Markets and Futures Contract Pricing	281	References	299
E. Empirical Evidence	291		
9 Multiperiod Capital Budgeting under Uncertainty: Real Options Analysis	305		
A. Introduction	305	G. Valuing Compound Options	325
B. Comparing NPV with Decision Trees and Real Options	306	H. Switching Options	333
C. Three Key Assumptions for Pricing Real Options	313	I. An Example of How to Evaluate an Investment Program	337
D. Valuing Real Options on Dividend-Paying Assets	317	J. Empirical Evidence	344
E. Types of Real Options	321	Summary	345
F. Valuing Combinations of Simple Real Options	322	Problem Set	346
		References	349
10 Efficient Capital Markets: Theory	353		
A. Defining Capital Market Efficiency	353	E. Market Efficiency with Costly Information	364
B. A Formal Definition of the Value of Information	355	F. Statistical Tests Adjusted for Risk	366
C. The Relationship between the Value of Information and Efficient Capital Markets	359	G. The Joint Hypothesis of Market Efficiency and the CAPM	370
D. Rational Expectations and Market Efficiency	360	Summary	372
		Problem Set	373
		References	375

11 Efficient Capital Markets: Evidence 377

- | | |
|---|--|
| A. Empirical Models Used for Residual Analysis 377 | F. Semistrong-Form Anomalies: Long Term 391 |
| B. Relevant Information (Earnings versus Cash Flow) 378 | G. Semistrong-Form Anomalies: Short Term 399 |
| C. Speed of Adjustment 383 | H. Cross-Sectional Puzzles 404 |
| D. Rejection of Strong-Form Efficiency 389 | Summary 406 |
| E. Common Errors of Empirical Studies 389 | Problem Set 406 |
| | References 409 |

12 Information Asymmetry and Agency Theory 415

- | | |
|----------------------------------|-----------------|
| A. Information Asymmetry 415 | Summary 460 |
| B. Agency Theory 439 | Problem Set 461 |
| C. Agency Theory and Finance 449 | References 462 |

PART II CORPORATE POLICY: THEORY, EVIDENCE, AND APPLICATIONS 465

13 The Role of the CFO, Performance Measurement, and Incentive Design 469

- | | |
|--|-----------------|
| A. The Role of the Chief Financial Officer 470 | Summary 494 |
| B. Performance Measurement 471 | Problem Set 494 |
| C. Incentive Design 482 | References 495 |

14 Valuation and Tax Policy 497

- | | |
|---|---------------------------------------|
| A. Formula Approach for Valuing Companies 497 | C. Corporate Tax Policy and Value 541 |
| B. Spreadsheet Approach for Valuing Companies 506 | Summary 553 |
| | Problem Set 553 |
| | References 554 |

15 Capital Structure and the Cost of Capital: Theory and Evidence 557

- | | |
|--|---|
| A. The Value of the Firm Given Corporate Taxes Only 559 | E. A Model with Business Disruption and Tax-Deductible Interest 588 |
| B. The Value of the Firm in a World with Both Personal and Corporate Taxes 570 | F. Business Disruption Costs: Evidence 593 |
| C. Introducing Risk—A Synthesis of the Modigliani-Miller Model and CAPM 574 | G. Agency Costs—Another Equilibrium Theory of Optimal Capital Structure 594 |
| D. The Cost of Capital with Risky Debt 579 | H. Nonequilibrium Effects 596 |

I. Empirical Evidence Concerning Capital Structure	604	Summary	625
		Problem Set	625
J. How Does a Practitioner Use the Theory to Determine Optimal Capital Structure?	611	References	631
K. The Maturity Structure of Debt	615	Appendix 15A. Duration and Optimal Maturity Structure of the Balance Sheet	637
L. The Effect of Other Financial Instruments on the Cost of Capital	617	References	643

16 Dividend Policy: Theory and Empirical Evidence 645

A. The Irrelevance of Dividend Policy in a World without Taxes	646	F. Dividend Announcement Date Effects: The Signaling Hypothesis	669
B. Dividend Policy in a World with Personal and Corporate Taxes	650	G. The Relationship between Dividends and Value	674
C. Toward a Theory of Optimal Dividend Policy	654	H. Corporate Equity Repurchases	682
D. Behavioral Models of Dividend Policy	661	I. Other Dividend Policy Issues	686
E. Clientele Effects and Ex Date Effects	663	Summary	688
		Problem Set	689
		References	691

17 Applied Issues in Corporate Finance 697

A. Introduction	697	F. Leveraged Buyouts and Management Buyouts	744
B. Leasing	697	Summary	747
C. Interest Rate Swaps	714	Problem Set	747
D. Risk Management	718	References	749
E. Pension Fund Management	728		

18 Acquisitions, Divestitures, Restructuring, and Corporate Governance 753

A. Merger Activity	753	I. Shedding Assets to Create Value	785
B. Alternative Growth Strategies	753	J. Changes in Ownership Structure	791
C. M&As as an Adjustment Process	756	K. Merger Defenses	794
D. Theories of Mergers, Implications, and Empirical Evidence	760	L. Accounting Aspects	796
E. Potential Sources of Synergy in Conglomerate Mergers	772	M. Corporate Governance	802
F. The Performance of M&As	778	N. Corporate Governance in Germany and Japan	805
G. Joint Ventures	781	Summary	806
H. Alliances and Partnerships	783	Problem Set	808
		References	813

19 International Financial Management 819	
A. Volatility in Exchange Rates 819	F. Management of Foreign Exchange Risks 839
B. International Financial Systems 821	G. International Asset Pricing Models 844
C. Analysis of International Transactions 825	H. The Cost of Capital and Currency Risk 848
D. The International Parity Relationships 829	Summary 856
E. Empirical Evidence and Exchange Rate Forecasting 837	Problem Set 858
	References 862
20 Unsolved Issues, Undiscovered Territory, and the Future of Finance 865	
A. Corporate Finance 866	H. Security Markets and Market Microstructure 873
B. Risk Management 870	I. The Cross-Section of Returns 873
C. Managerial Finance 871	J. Individual Decision-Making 875
D. Real Option Pricing 871	K. Experimental Economics 876
E. Valuation—Expert Systems and Neural Networks 872	Summary 876
F. Regulation 872	References 876
G. Empirical Studies 872	
Appendix A Discounting 881	
A. Introduction 881	C. The Time Value of Money: Continuous Compounding 889
B. The Time Value of Money: Discrete Compounding 881	Summary 892
Appendix B Matrix Algebra 893	
A. Matrices and Vectors 893	G. Determinants 898
B. The Operations of Matrices 894	H. The Inverse of a Square Matrix 900
C. Linear Equations in Matrix Form 896	I. Solving Linear Equation Systems 901
D. Special Matrices 897	J. Cramer’s Rule 902
E. Matrix Inversion Defined 897	K. Applications 903
F. Matrix Transposition 898	
Appendix C An Introduction to Multiple Regression 909	
A. Ordinary Least Squares, Linear Estimation 909	Summary 922
B. Bias and Efficiency 916	References 924
