

Empirical Dynamic Asset Pricing

Model Specification and Econometric Assessment

Kenneth J. Singleton

Princeton University Press
Princeton and Oxford

Contents

Preface	xi
Acknowledgments	xiii
1 Introduction	1
1.1. Model Implied Restrictions	3
1.2. Econometric Estimation Strategies	10
I Econometric Methods for Analyzing DAPMs	15
2 Model Specification and Estimation Strategies	17
2.1. Full Information about Distributions	17
2.2. No Information about, the Distribution	21
2.3. Limited Information: GMM Estimators	25
2.4. Summary of Estimators	34
3 Large-Sample Properties of Extremum Estimators	35
3.1. Basic Probability Model	35
3.2. Consistency: General Considerations	39
3.3. Consistency of Extremum Estimators	44
3.4. Asymptotic Normality of Extremum Estimators	48
3.5. Distributions of Specific Estimators	53
3.6. Relative Efficiency of Estimators	60
4 Goodness-of-Fit and Hypothesis Testing	71
4.1. GMM Tests of Goodness-of-Fit	71
4.2. Testing Restrictions on θ_0	77
4.3. Comparing LR, Wald, and LM Tests	84
4.4. Inference for Sequential Estimators	86

4.5.	Inference with Unequal-Length Samples	88
4.6.	Underidentified Parameters under HQ	94
5	Affine Processes	98
5.1.	Affine Processes: Overview	100
5.2.	Continuous-Time Affine Processes	101
5.3.	Discrete-Time Affine Processes	108
5.4.	Transforms for Affine Processes	114
5.5.	GMM Estimation of Affine Processes	117
5.6.	ML Estimation of Atrine Processes	118
5.7.	Characteristic Function-Based Estimators	124
6	Simulation-Based Estimators of DAPMs	130
6.1.	Introduction	130
6.2.	SME: The Estimation Problem	132
6.3.	Consistency of the SME	135
6.4.	Asymptotic Normality of the SME	142
6.5.	Extensions of the SME	144
6.6.	Moment Selection with SME	146
6.7.	Applications of SME to Diffusion Models	152
6.8.	Markov Chain Monte Carlo Estimation	153
7	Stochastic Volatility, Jumps, and Asset Returns	158
7.1.	Preliminary Observations about Shape	159
7.2.	Discrete-Time Models	164
7.3.	Estimation of Discrete-Time Models	171
7.4.	Continuous-Time Models	174
7.5.	Estimation of Continuous-Time Models	179
7.6.	Volatility Scaling	185
7.7.	Term Structures of Conditional Skewness and Kurtosis	187
II	Pricing Kernels, Preferences, and DAPMs	193
8	Pricing Kernels and DAPMs	195
8.1.	Pricing Kernels	195
8.2.	Marginal Rates of Substitution as q^*	198
8.3.	No-Arbitrage and Risk-Neutral Pricing	202

9	Linear Asset Pricing Models	211
9.1.	Economic Motivations for Examining Asset Return Predictability	211
9.2.	Market Microstructure Effects	214
9.3.	A Digression on Unit Roots in Time Series	219
9.4.	Tests for Serial Correlation in Returns	224
9.5.	Evidence on Stock-Return Predictability	231
9.6.	Time-Varying Expected Returns on Bonds	237
10	Consumption-Based DAPMs	246
10.1.	Empirical Challenges Facing DAPMs	247
10.2.	Assessing Goodness-of-Fit	251
10.3.	Time-Separable Single-Good Models	254
10.4.	Models with Durable Goods	260
10.5.	Habit Formation	265
10.6.	Non-State-Separable Preferences	274
10.7.	Other Preference-Based Models	276
10.8.	Bounds on the Volatility of mf	277
11	Pricing Kernels and Factor Models	282
11.1.	A Single-Beta Representation of Returns	283
11.2.	Beta Representations of Excess Returns	285
11.3.	Conditioning Down and Beta Relations	287
11.4.	From Pricing Kernels to Factor Models	290
11.5.	Methods for Testing Beta Models	297
11.6.	Empirical Analyses of Factor Models	302
III	No-Arbitrage DAPMs	309
12	Models of the Term Structure of Bond Yields	311
12.1.	Key Ingredients of a DTSM	312
12.2.	Affine Term Structure Models	316
12.3.	Continuous-Time Affine DTSMs	317
12.4.	Discrete-Time Affine DSTMs	327
12.5.	Quadratic-Gaussian Models	329
12.6.	Nonaffine Stochastic Volatility Models	331
12.7.	Bond Pricing with Jumps	332
12.8.	DTSMs with Regime Shifts	334

13 Empirical Analyses of Dynamic Term Structure Models	338
13.1. Estimation of DTSMs	338
13.2. Empirical Challenges for DTSMs	344
13.3. DTSMs of Swap and Treasury Yields	348
13.4. Factor Interpretations in Affine DTSMs	356
13.5. Macroeconomic Factors and DTSMs	359
14 Term Structures of Corporate Bond Spreads	364
14.1. DTSMs of Defaultable Bonds	364
14.2. Parametric Reduced-Form Models	369
14.3. Parametric Structural Models	371
14.4. Empirical Studies of Corporate Bonds	373
14.5. Modeling Interest Rate Swap Spreads	383
14.6. Pricing Credit Default Swaps	384
14.7. Is Default Risk Priced?	387
15 Equity Option Pricing Models	391
15.1. No-Arbitrage Option Pricing Models	392
15.2. Option Pricing	396
15.3. Estimation of Option Pricing Models	397
15.4. Econometric Analysis of Option Prices	401
15.5. Options and Revealed Preferences	404
15.6. Options on Individual Common Stocks	410
16 Pricing Fixed-Income Derivatives	412
16.1. Pricing with Affine DTSMs	413
16.2. Pricing Using Forward-Rate Models	417
16.3. Risk Factors and Derivatives Pricing	425
16.4. Affine Models of Derivatives Prices	428
16.5. Forward-Rate-Based Pricing Models	429
16.6. On Model-Basing Hedging	431
16.7. Pricing Eurodollar Futures Options	433
