*Preface* ix

**1 Contradiction: experiencing the reality of uncertainty but still believing that executives choose an organization's 'direction'** **1**
*Uncertainty and the actions of organizational executives over the past few years 3*
*The dominant management discourse of managers choosing 10*
*The lack of a scientific evidence base for the prescriptions of the dominant discourse 13*
*The difficulty of providing traditional scientific evidence in an uncertain world 19*
*The spread of dominant thinking to the public sector despite the lack of evidence 20*
*Conclusion 22*

**2 How we came to believe that leaders and managers, choose an organization's direction: professional identification with the sciences of certainty** **27**
*Etymology of 'leading' and 'managing' and the origins of the modern corporation 27*
*Striving for a professional management identity on the basis of the reductionist sciences of certainty 29*
*Sustaining a professional management identity on the basis of the systemic sciences of certainty 37*
*The emergence of investment capitalism and the mathematics of certainty 43*
*The problematic continuing role of the sciences of certainty and notions of systems 46*
*Conclusion 49*

**3 Complexity and the sciences of uncertainty: the importance of local interaction in the emergence of population-wide patterns of continuity and change** **53**
*Chance and adaptation: Darwin's evolutionary theory, 53*
*The complexity sciences 56*

*Types of scientific model 57*
*Equilibrium models: controllable futures 58*
*Models of chaos: unfolding an enfolded future 59*
*Models of dissipative structure: spontaneously moving from one given pattern to another 61*
*Complex evolutionary models: constructing an unknowable future 63*
*Models of complex adaptive systems: a life of their own 64*
*Causality: certainty and uncertainty 66*
*Conclusion 66*

**4 Complexity and what writers on organizations do with it: obscuring local interaction and mostly re-presenting the dominant discourse 73**
*The application of complexity science to industries: unpredictability and the importance of deviant behavior 74*
*The application of complexity science to organizations: re-presenting the dominant management discourse in- new jargon 79*
*The complexity sciences as metaphor: justifying existing ideological positions 84*
*More critical views 89*
*Conclusion 90*

**5 Understanding organizations as games we are pre-occupied in: finding ourselves immersed in local interaction and using abstract management tools at the same time 96**
*From porous selves in an enchanted world to buffered selves in a disenchanted world 97*
*Involved and detached thinking 99*
*Taking an overview from the center 102*
*Local resistance 104*
*Pre-occupation in the game 106*
*The activities of generalizing/idealizing and particularizing in local interaction 108*
*Abstracting from the experience of local interaction 111*
*Immersing in local interaction 112*
*Local interaction and the production of abstractions 113*
*Conclusion 115*

**6 Understanding organizations as social processes: the interplay of abstracting and immersing producing outcomes no one chooses 118**
*Second order systems thinking 119*
*Different ways in which the term 'system' is used 122*
*The spatial metaphor in systems thinking 125*
*The notion of'embodiment' 127*
*Time 128*
*Complex adaptive systems as source domain for analogies of human acting: the theory of complex responsive processes 129*

*Hegel and the social process 134*
*Conclusion 136*

**7 Managers accomplish whatever they accomplish in processes of communication 139**
*The civilizing process and the personality structure of modern human agents 140*
*The emergence of social order 142*
*Social processes and communicative interaction 143*
*Communication as conversation of gestures 144*
*The social attitude and the emergence of self 147*
*Back to the complexity sciences as source domain for analogies 148*
*The key features of communicative interaction and the narrativeAike patterning of experience 149*
*The thematic patterning of experience 154*
*The conversation of gestures, the interplay of local communicative actions and the nature of organizational life 156*
*Conclusion 158*

**8 Turning the dominant management discourse on its head: organizational continuity and transformation emerging in local interaction rather than being chosen by managers 160**
*Generalizing/idealizing and functionalizing: social objects and cult values 162*
*The relationship between local interaction and global patterns 165*
*An example: the National Health Service (NHS) 169*
*Long-term social trends 170*
*An example: the development of the internet 171*
*A different understanding of social forces/structures 172*
*Technology as social object 173*
*An alternative way of taking account of the social: complex responsive processes and technology 176*
*The relationship between people and technology: social objects . and meaning 177*
*Conclusion 178*

**9 Local and population-wide patterns of power relations and ideology: the dynamics of inclusion and exclusion in organizations 180**
*Understanding social processes through the metaphor of games 181*
*Turn-taking, power and ideology 183*
*The dynamics of inclusion-exclusion, gossip and identity 185*
*The dynamics of inclusion and exclusion in organizational life 188*
*Desires, values and norms 190*
*Norms, values and ideology 192*
*Complex responsive processes and spirituality 194*
*Values and spirituality in organizational discourse 197*
*Values and organizational practice 199*

*Institutions and legitimate structures of authority 200.*
*Conclusion 202*

**10 Implications of a theory of complex responsive processes for policy making, consultancy, leadership, management, organizational research and management education** **204**
*Policy making and public sector governance 207*
*The roles of leaders and managers after the collapse of investment capitalism 213*
*Organizational and management research 221*
*Management education 227*
*Management consultancy 228*
*Conclusion 229*
