Introduction.....	15
-------------------	----

PART I: Basics

1 "Introduction to Object-Oriented Programming"

1.1	The Need for a Better Abstraction.....	23
1.2	Classes and Objects.....	24
1.3	Establishing Boundaries.....	27
1.4	Reuse.....	29
1.4.1	Composition.....	29
1.4.2	Inheritance.....	30
1.4.3	Polymorphism.....	31
1.5	Object Management.....	33
1.6	UML Tutorial: Class Diagram Basics.....	33
1.6.1	Classes.....	34
1.6.2	Attributes.....	36
1.6.3	Operations.....	37
1.6.4	Associations.....	38
1.6.5	Notes.....	39
1.7	Summary.....	39

2 Working with Objects

2.1	Syntax Overview.....	41
2.1.1	Defining Classes.....	42
2.1.2	Declaring Components.....	42
2.1.3	Implementing Methods.....	51
2.2	Creating and Using Objects.....	52
2.2.1	Object References.....	52
2.2.2	Creating Objects.....	53
2.2.3	Object Reference Assignments.....	53
2.2.4	Working with Instance Components.....	54
2.2.5	Working with Class Components.....	57
2.2.6	Creating Complex Expressions Using Functional Methods.....	61

2.3	Building Your First Object-Oriented Program.....	64
2.4	Getting Started with the Class Builder.....	71
2.4.1	Class Pools.....	71
2.4.2	Accessing the Class Builder.....	71
2.4.3	Creating Classes.....	72
2.4.4	Defining Class Components.....	74
2.4.5	Editing the Class Definition Section Directly.....	82
2.5	Case Study: Working with Regular Expressions.....	82
2.6	UML Tutorial: Object Diagrams.....	84
2.7	Summary.....	86

PART II: Core Concepts

3 Encapsulation and ImplementatipnvHiding -

3.1	Lessons Learned from the Procedural Approach.....	89
3.1.1	Decomposing Functional Decomposition.....	90
3.1.2	Case Study: A Procedural Code Library in ABAP.....	91
3.1.3	Moving Toward Objects.....	94
3.2	Data Abstraction with Classes.....	94
3.3	Defining Component Visibilities.....	95
3.3.1	Visibility Sections.....	96
3.3.2	Friends.....	99
3.4	Hidingthe Implementation.....	101
3.5	Designing by Contract.....	102
3.6	UML Tutorial: Sequence Diagrams.....	103
3.7	• Summary.....	105

4: Object Initialization arid Cleanup

4.1	Creating Objects.....	107
4.2	Controlling Object Initialization with Constructors.....	111
4.3	Taking Control of the Instantiation Process.....	117
4.4	Garbage Collection.....	121
4.5	Tuning Performance.....	122
4.5.1	Design Considerations.....	123
4.5.2	Lazy Initialization.....	123
4.5.3	Reusing Objects.....	124
4.5.4	Using Class Attributes.....	124

4.6	UML Tutorial: State Machine Diagrams.....	125
4.7	Summary.....	126

•ffifB|gg|

5.1	Generalization and Specialization.....	128
5.2	Inheriting Components.....	133
5.2.1	Designing the Inheritance Interface.....	133
5.2.2	Visibility of Instance Components in Subclasses.....	135
5.2.3	Visibility of Class Components in Subclasses.....	136
5.2.4	Redefining Methods.....	136
5.2.5	Instance Constructors.....	138
5.2.6	Class Constructors.....	140
5.3	The Abstract and Final Keywords.....	140
5.3.1	Abstract Classes and Methods.....	140
5.3.2	Final Classes.....	143
5.3.3	Final Methods.....	144
5.4	Inheritance Versus Composition.....	145
5.5	Using the Refactoring Assistant.....	148
5.6	UML Tutorial: Advanced Class Diagrams Part I.....	150
5.6.1	Generalization.....	150
5.6.2	Dependencies and Composition.....	151
5.6.3	Abstract Classes and Methods.....	152
5.7	Summary.....	153
6.1	Object Reference Assignments Revisited.....	155
6.1.1	Static and Dynamic Types.....	156
6.1.2	Casting.....	158
6.2	Dynamic Method Call Binding.....	160
6.3	Interfaces.....	163
6.3.1	Interface Inheritance Versus Implementation Inheritance ...	164
6.3.2	Defining Interfaces.....	165
6.3.3	Implementing Interfaces.....	167
6.3.4	Working with Interfaces.....	170
6.3.5	Nesting Interfaces.....	177
6.4	UML Tutorial: Advanced Class Diagrams Part II.....	180
6.4.1	Interfaces.....	180

6.4.2	Providing and Required Relationships with Interfaces.....	181
6.4.3	Static Attributes and Methods.....	182
6.5	Summary.....	182
7.1	Understanding the SAP Component Model.....	183
7.2	The Package Concept.....	185
7.2.1	What Is a Package?.....	186
7.2.2	Creating and Organizing Packages Using the Package Builder.....	188
7.2.3	Embedding Packages.....	191
7.2.4	Defining Package Interfaces.....	192
7.2.5	Creating Use Accesses.....	194
7.2.6	Performing Package Checks.....	195
7.2.7	Package Design Concepts.....	196
7.3	UML Tutorial: Package Diagrams.....	197
7.4	Summary.....	199
8.1	Lessons Learned from Prior Approaches.....	201
8.2	The Class-Based Exception Handling Concept.....	203
8.3	Dealing with Exceptions.....	205
8.3.1	Handling Exceptions.....	205
8.3.2	Cleaning up the Mess.....	209
8.4	Raising and Forwarding Exceptions.....	210
8.4.1	System-Driven Exceptions.....	211
8.4.2	The RAISE EXCEPTION Statement.....	211
8.4.3	Propagating Exceptions.....	215
8.5	Creating Exception Classes.....	219
8.5.1	Understanding Exception Class Types.....	220
8.5.2	Local Exception Classes.....	221
8.5.3	Global Exception Classes.....	221
8.5.4	Defining Exception Texts.....	223
8.5.5	Mapping Exception Texts to Message IDs.....	227
8.6	UML Tutorial: Activity Diagrams.....	229
8.7	Summary.....	231

9 Unit Testing with ABAP Unit?

9.1	ABAP Unit Overview.....	234
9.1.1	The Need,for Unit Testing Frameworks.....	234
9.1.2	Unit Testing Terminology.....	235
9.1.3	Understanding How ABAP Unit Works.....	236
9.2	Creating Unit Test Classes.....	237
9.2.1	Test Attributes.....	238
9.2.2	Test Methods.....	239
9.2.3	Managing Fixtures.....	239
9.2.4	Generating Test Classes for Global Classes.....	240
9.3	Case Study: Creating a Unit Test in ABAP Unit.....	241
9.4	Executing Unit Tests.....	244
9.4.1	Integration with the ABAP Workbench.....	245
9.4.2	Integration with the Code Inspector.....	245
9.5	Evaluating Unit Test Results.....	246
9.6	Moving Toward Test-Driven Development.....	247
9.7	UML Tutorial: Use Case Diagrams.....	248
9.7.1	Use Case Terminology.....	249
9.7.2	An Example Use Case.....	249
9.7.3	The Use Case Diagram.....	251
9.7.4	Use Cases for Requirements Verification.....	252
9.7.5	Use Cases and Testing.....	252
9.8	Summary.....	253

PART III: Case Studies

10 Working with the SAP List Viewer ..

10.1	Overview of the SAP Control Framework.....	257
10.1.1	Control Framework Architecture.....	258
10.1.2	Survey of Available Controls.....	259
10.2	Overview of the ALV Object Model.....	260
10.3	Getting Started with the Flight Query Report.....	261
10.3.1	Understanding the Report Requirements.....	261
10.3.2	Report Design Using the MVC Design Pattern.....	261
10.3.3	Developing the Flight Model Class.....	262
10.3.4	Developing the Report Controller Class.....	264
10.3.5	Implementing the Report View.....	267

10.4	Event Handling with the ALV Object Model.....	271
10.4.1	Integrating Event Handler Methods into the Controller. . . .	271
10.4.2	Registering Event Handler Methods.....	272
10.4.3	Responding to Events.....	273
10.4.4	Triggering Events on the Frontend.....	274
10.4.5	Timing of Event Handling.....	275
10.5	UML Tutorial: Communication Diagrams.....	275
10.6	Summary.....	277
11.1	Object-Relational Mapping Concepts.....	280
11.2	Persistence Service Overview.....	280
11.2.1	Managed Objects.....	282
11.2.2	Mapping Concepts.....	284
11.2.3	Understanding the Class Agent API.....	285
11.3	Building Persistent Classes.....	286
11.3.1	Creating a Persistent Class in the Class Builder.....	287
11.3.2	Defining Persistent Attributes with the Mapping Assistant.....	288
11.3.3	Working with Object References.....	292
11.4	Working with Persistent Objects.....	293
11.4.1	Creating New Persistent Objects.....	294
11.4.2	Reading Persistent Objects Using the Query Service.	295
11.4.3	Updating Persistent Objects.....	297
11.4.4	Deleting Persistent Objects.....	298
11.5	UML Tutorial: Advanced Sequence Diagrams.....	298
11.5.1	Creating and Deleting Objects.....	298
11.5.2	Depicting Control Logic with Interaction Frames.....	300
11.6	Summary.....	301

12 Working with XML

12.1	XML Overview.....	303
12.1.1	Why Do We Need XML?.....	304
12.1.2	Understanding XML Syntax.....	305
12.1.3	Defining XML Semantics.....	307
12.2	XML Processing Concepts.....	309
12.2.1	Processing XML Using a Parser.....	309

12.2.2	Modeling XML with the DOM	310
12.2.3	Features of the iXML Library.....	310
12.3	Case Study: Developing a Reading List ADT.....	311
12.4	Case Study: Building an XML Document.....	314
12.5	Case Study: Reading an XML Document.....	320
12.6	UML Tutorial: Advanced Activity Diagrams.....	325
12.7	Summary.....	327

APPENDIX

A Debugging Objects

A.1	Debugging Objects Using the Classic ABAP Debugger.....	333
A.1.1	Displaying and Editing Attributes.....	333
A.1.2	Tracing Through Methods.....	336
A.1.3	Displaying Events and Event Handler Methods.....	336
A.1.4	Viewing Reference Assignments for an Object.....	337
A.1.5	Troubleshooting Class-Based Exceptions.....	338
A.2	Debugging Objects Using the New ABAP Debugger.....	340

Index.....	345
