# Contents

*Preface*      xv

## CHAPTER 1 Introduction      1

1. A Unique Instrument      1
2. A Money Market Problem      8
3. A Taxation Example      11
4. Some Caveats for What Is to Follow      14
5. Trading Volatility      15
6. Conclusions      18
- Suggested Reading      19
- Case Study      20

## CHAPTER 2 An Introduction to Some Concepts and Definitions      23

1. Introduction      23
2. Markets      23
3. Players      27
4. The Mechanics of Deals      27
5. Market Conventions      30
6. Instruments      37
7. Positions      37
8. The Syndication Process      41
9. Conclusions      42
- Suggested Reading      42
- Appendix 2-1: The Hedge Fund Industry      42
- Exercises      46

## CHAPTER 3 Cash Flow Engineering and Forward Contracts      47

1. Introduction      47
2. What Is a Synthetic?      47
3. Forward Contracts      51
4. Currency Forwards      54
5. Synthetics and Pricing      59
6. A Contractual Equation      59
7. Applications      60

8. A “Better” Synthetic	66
9. Futures	70
10. Conventions for Forwards	75
11. Conclusions	76
Suggested Reading	77
Exercises	78
Case Study	80

## CHAPTER 4 Engineering Simple Interest Rate Derivatives 83

1. Introduction	83
2. Libor and Other Benchmarks	84
3. Forward Loans	85
4. Forward Rate Agreements	92
5. Futures: Eurocurrency Contracts	96
6. Real-World Complications	100
7. Forward Rates and Term Structure	102
8. Conventions	103
9. A Digression: Strips	104
10. Conclusions	105
Suggested Reading	105
Exercises	106

## CHAPTER 5 Introduction to Swap Engineering 109

1. The Swap Logic	109
2. Applications	112
3. The Instrument: Swaps	117
4. Types of Swaps	120
5. Engineering Interest Rate Swaps	129
6. Uses of Swaps	137
7. Mechanics of Swapping New Issues	142
8. Some Conventions	148
9. Currency Swaps versus FX Swaps	148
10. Additional Terminology	150
11. Conclusions	151
Suggested Reading	151
Exercises	152

## CHAPTER 6 Repo Market Strategies in Financial Engineering 157

1. Introduction	157
2. What Is Repo?	158
3. Types of Repo	160
4. Equity Repos	165
5. Repo Market Strategies	165
6. Synthetics Using Repos	171
7. Conclusions	173
Suggested Reading	173
Exercises	174
Case Study	175

## CHAPTER 7 Dynamic Replication Methods and Synthetics 177

1. Introduction 177
  2. An Example 178
  3. A Review of Static Replication 178
  4. "Ad Hoc" Synthetics 183
  5. Principles of Dynamic Replication 186
  6. Some Important Conditions 197
  7. Real-Life Complications 198
  8. Conclusions 200
- Suggested Reading 200  
Exercises 201

## CHAPTER 8 Mechanics of Options 203

1. Introduction 203
  2. What Is an Option? 204
  3. Options: Definition and Notation 205
  4. Options as Volatility Instruments 211
  5. Tools for Options 221
  6. The Greeks and Their Uses 228
  7. Real-Life Complications 240
  8. Conclusion: What Is an Option? 241
- Suggested Reading 241  
Appendix 8-1 242  
Appendix 8-2 244  
Exercises 246

## CHAPTER 9 Engineering Convexity Positions 249

1. Introduction 249
  2. A Puzzle 250
  3. Bond Convexity Trades 250
  4. Sources of Convexity 262
  5. A Special Instrument: Quantos 267
  6. Conclusions 272
- Suggested Reading 272  
Exercises 273  
Case Study 275

## CHAPTER 10 Options Engineering with Applications 277

1. Introduction 277
  2. Option Strategies 280
  3. Volatility-Based Strategies 291
  4. Exotics 296
  5. Quoting Conventions 307
  6. Real-World Complications 309
  7. Conclusions 310
- Suggested Reading 310  
Exercises 311

CHAPTER 11 Pricing Tools in Financial Engineering 315

- 1. Introduction 315
- 2. Summary of Pricing Approaches 316
- 3. The Framework 317
- 4. An Application 322
- 5. Implications of the Fundamental Theorem 328
- 6. Arbitrage-Free Dynamics 334
- 7. Which Pricing Method to Choose? 338
- 8. Conclusions 339
- Suggested Reading 339
- Appendix 11-1 340
- Exercises 342

CHAPTER 12 Some Applications of the Fundamental Theorem 345

- 1. Introduction 345
- 2. Application 1: The Monte Carlo Approach 346
- 3. Application 2: Calibration 354
- 4. Application 3: Quantos 363
- 5. Conclusions 370
- Suggested Reading 370
- Exercises 371

CHAPTER 13 Fixed-Income Engineering 373

- 1. Introduction 373
- 2. A Framework for Swaps 374
- 3. Term Structure Modeling 383
- 4. Term Structure Dynamics 385
- 5. Measure Change Technology 394
- 6. An Application 399
- 7. In-Arrears Swaps and Convexity 404
- 8. Cross-Currency Swaps 408
- 9. Differential (Quanto) Swaps 409
- 10. Conclusions 409
- Suggested Reading 410
- Appendix 13-1: Practical Yield Curve Calculations 411
- Exercises 414

CHAPTER 14 Tools for Volatility Engineering, Volatility Swaps,  
and Volatility Trading 415

- 1. Introduction 415
- 2. Volatility Positions 416
- 3. Invariance of Volatility Payoffs 417
- 4. Pure Volatility Positions 424
- 5. Volatility Swaps 427
- 6. Some Uses of the Contract 432
- 7. Which Volatility? 433
- 8. Conclusions 434
- Suggested Reading 435
- Exercises 436

## CHAPTER 15 Volatility as an Asset Class and the Smile 439

1. Introduction to Volatility as an Asset Class 439
  2. Volatility as Funding 440
  3. Smile 442
  4. Dirac *Delta* Functions 442
  5. Application to Option Payoffs 444
  6. Breeden-Litzenberger Simplified 446
  7. A Characterization of Option Prices as *Gamma* Gains 450
  8. Introduction to the Smile 451
  9. Preliminaries 452
  10. A First Look at the Smile 453
  11. What Is the Volatility Smile? 454
  12. Smile Dynamics 462
  13. How to Explain the Smile 462
  14. The Relevance of the Smile 469
  15. Trading the Smile 470
  16. Pricing with a Smile 470
  17. Exotic Options and the Smile 471
  18. Conclusions 475
- Suggested Reading 475  
Exercises 476

## CHAPTER 16 Credit Markets: CDS Engineering 479

1. Introduction 479
  2. Terminology and Definitions 480
  3. Credit Default Swaps 482
  4. Real-World Complications 492
  5. CDS Analytics 494
  6. Default Probability Arithmetic 495
  7. Structured Credit Products 500
  8. Total Return Swaps 504
  9. Conclusions 505
- Suggested Reading 505  
Exercises 507  
Case Study 510

## CHAPTER 17 Essentials of Structured Product Engineering 513

1. Introduction 513
  2. Purposes of Structured Products 513
  3. Structured Fixed-Income Products 526
  4. Some Prototypes 533
  5. Conclusions 543
- Suggested Reading 544  
Exercises 545

CHAPTER 18 Credit Indices and Their Tranches 547

- 1. Introduction 547
- 2. Credit Indices 547
- 3. Introduction to ABS and CDO 548
- 4. A Setup for Credit Indices 550
- 5. Index Arbitrage 553
- 6. Tranches: Standard and Bespoke 555
- 7. Tranche Modeling and Pricing 556
- 8. The Roll and the Implications 560
- 9. Credit versus Default Loss Distributions 562
- 10. An Important Generalization 563
- 11. New Index Markets 566
- 12. Conclusions 568
- Suggested Reading 568
- Appendix 18-1 569
- Exercises 570

CHAPTER 19 Default Correlation Pricing and Trading 571

- 1. Introduction 571
- 2. Some History 572
- 3. Two Simple Examples 572
- 4. The Model 575
- 5. Default Correlation and Trading 579
- 6. *Delta* Hedging and Correlation Trading 580
- 7. Real-World Complications 585
- 8. Conclusions 587
- Suggested Reading 587
- Appendix 19-1 588
- Exercises 590
- Case Study 591

CHAPTER 20 Principal Protection Techniques 595

- 1. Introduction 595
- 2. The Classical Case 596
- 3. The CPPI 597
- 4. Modeling the CPPI Dynamics 599
- 5. An Application: CPPI and Equity Tranches 601
- 6. A Variant: The DPPI 604
- 7. Real-World Complications 605
- 8. Conclusions 606
- Suggested Reading 606
- Exercises 607

CHAPTER 21 Caps/Floors and Swaptions with an Application to Mortgages 611

- 1. Introduction 611
- 2. The Mortgage Market 612
- 3. Swaptions 618

4. Pricing Swaptions	620	
5. Mortgage-Based Securities	625	
6. Caps and Floors	626	
7. Conclusions	631	
Suggested Reading	631	
Exercises	632	
Case Study	634	
<b>CHAPTER 22</b>	<b>Engineering of Equity Instruments: Pricing and Replication</b>	<b>637</b>
1. Introduction	637	
2. What Is Equity?	638	
3. Engineering Equity Products	644	
4. Financial Engineering of Securitization	654	
5. Conclusions	657	
Suggested Reading	657	
Exercises	658	
Case Study	659	
References	663	
Index	667
