DETAIL Practice
Photovoltaics

Contents

7	<i>Introduction</i>
	<i>Generating and using solar electricity</i>
11	The sun as a source of energy
14	Solar cells - turning light into electricity
19	Modules
22	Performance
25	Photovoltaic systems
26	System technology
29	Yields and economics
32	Ecology
	<i>Designing with photovoltaics</i>
35	Features of crystalline photovoltaics
36	Differences between traditional and PV materials and products
39	Photovoltaics and its relationship with the building
40	Design strategies
41	Design options
46	Transparency and design potential
	<i>Construction and integration</i>
50	Designing with photovoltaics
52	Fixing
55	Roof installations
62	Facade installations
66	Sunshade installations
	<i>Technical rules and building legislation</i>
71	Type approval of PV modules - Electrical installation and safety
72	An overview of building legislation
73	Building products and forms of construction
76	Non-regulated building products and forms of construction
77	Experimental testing
79	Fire protection
	<i>Photovoltaics case studies</i>
82	Federal Environment Agency offices in Dessau
84	Institute premises in Beijing
87	Local government offices in Ludesch
90	Paul Horn Arena in Tübingen
92	Sports hall in Burgweinting
94	Mixed commercial and residential building in Munich
97	Additional residential storeys and new office building in Darmstadt
100	Private house in Hegenlohe
	<i>Appendix</i>
103	Glossary
106	Standards, directives, statutory instruments and recommendations (selection)
107	Bibliography
108	Manufacturers, companies and trade associations (selection)
109	Index
111	Picture credits
