CONTENTS

7 | 1 Introduction

Ulrich Knaack

11 | 2 Components

11 | Functions and characteristics of constructions

11 | Separating function

12 | Loadbearing function

13 | Properties and performance rate

14 | Adjustable and active systems

16 | Tightness and permeability of constructions

18 | Opaque constructions

21 | Composite constructions

25 | Transparent constructions

29 | Loadbearing behaviour

29 | Force and tension

29 | Elasticity

30 | Buckling

31 | Span constructions

41 | Horizontal constructions

47 | Floor openings

49 | Vertical constructions

58 | Openings in walls

61 | 3 Connections

62 Internal and external connections

62 Internal connections

63 External connections

64 Type and function of connections

64 Joints according to positioning of components

67 Joints according to the form of components

71 Joints according to the material of components

71 Position of connections

71 Tolerances

74 Adjustment

77 Fixation

77 Roller bearings, hinges and restraints

78 Fixation through position, form and material

85 Fixation of layers, multiple skins and composite panels

92 | Forming technologies

92 | Basic forming processes

93 | Remodelling processes

94 | Separation processes

95 | Material and connections

95 | Timber connections

97 | Steel connections

98 | Concrete connections

100 | Connections between components of different build-up

101 | Designing a connection

102 | 4 Building Structure

102 | Three building methods: spaces and the relations between them

103 | Primary and complementary systems enclosing space

105 | Solid or cellular construction

106 | Examples of solid construction

112 | Slab construction

114 | Examples of Slab construction

119 | Skeleton construction

121 | Examples of skeleton construction

126 | Horizontal relations between spaces

126 | Division of space

128 | Multiplication of space

131 | Connection of space

132 | Vertical relations between spaces

132 | Multiplication of space

135 | Connection of space

Appendix

138 | Authors

139 | Selected Bibliography

140 | Index

143 | Illustration Credits
