## Contents

**Introduction**

Foreword	7
Innovative Architecture - Research and Development	8
Cooperation between Producers and Designers	11
Portrait	13

**Part 1 - Steel and Glass Constructions**

<b>European Investment Bank, Luxembourg</b>	<b>17</b>
Design and Implementation	18
Energy Concept and Facade Design	20
Fire Protection Planning	22
Structure and Teamwork	23

<b>Westfield London</b>	<b>28</b>
Digital Process Chain from Design to Execution	30
The Westfield Roof- from Concept to Fitting	34
The Role of the Facade Consultant	37

Minimised Shell Structures - Challenges and Prospects	<b>39</b>
--	-----------

**Part 2 - Foils and Membranes**

<b>Allianz Arena, Munich</b>	<b>41</b>
From the Idea to the Detail	44
Roof Structure and Vertical Facade	46
Design Aspects of ETFE Foil Cushions	48

Development of Lightweight Building Shells	53
--	----

**Part 3 - Element Facades**

The Future of the Element Facade	<b>59</b>
<b>7 More London</b>	<b>60</b>
Developing the Production of the Aluminium Element Facade	60
Construction Management	64
Tender Process and Design	66

Facades of High-Rise Buildings - Trends and Tendencies	70
---	----

**Part 4 - Structural use of Glass**

Innovative Processes in the All-Glass Sector	75
Possible Applications of Cold-Bending	80
Fascinated by Glass	81

<b>Glass Bridge and Glass Staircase</b>	<b>82</b>
Applied Research Projects	82
Developing the Details	86

The Floating Seat	90
TriPyramid Structures	91
Challenges and Potential of Structural Glass	92

<b>Testing and Inspection Procedures</b>	<b>94</b>
--	-----------

**Appendix**

List of seele projects	103
Testing standards	110
Bibliography	111
Illustration Credits	112
