Preface.....	xv
Acknowledgments.....	xvii
Introduction.....	xix

SECTION I Why a Book on Lean Information Technology (IT)?

Chapter 1	Why Look at IT? What Is the Problem?.....	3
	So What Does Lean Bring to the Table?.....	6
	What Does an IT System Look Like?.....	8
	IT Issues to Avoid.....	15
	A New Directive for IT Organizations.....	19
	Summary.....	20
Chapter 2	IT Background.....	21
	The Twenty-First Century Enterprise.....	22
	The IT Evolution.....	25
	The Enterprise Role of IT.....	30
	The Twenty-First Century Enterprise and IT.....	32
	Case Study: Wipro.....	38
	Summary.....	38
Chapter 3	Are We "Doing the Right Things"?.....	43
	A3 Problem Analysis.....	44
	The A3 Steps.....*	45
	"Team Members" Box.....	46
	"Approval Information/Signatures" Box.....	48
	"Clarify and Validate the Problem" Box.....	49
	"Perform a Purpose Expansion on the Problem" Box....	51
	"Break Down the Problem/Identify Performance Gaps" Box.....	53

"Set Improvement Targets" Box.....55
"Determine Root Cause" Box.....57
"Develop Improvement Task List" Box.....59
"Execute Improvement Tasks" Box.....61
"Confirm Results" Box.....63
"Standardize Successful Processes" Box.....63
Using the 9-Step A3 Tool.....64
What Loop Am I In?.....66
Case Study: Wipro (Continued).....67
Summary.....69

Chapter 4 The Art of Managing Change.....71
A Discussion of Change.....72
Models for Change.....74
Innoveering.....76
How Do We Manage Change?.....79
The People.....80
 Key Point 1: The Circle.....82
 Key Point 2: Goal Setting.....83
 Key Point 3: Leadership.....85
 Key Point 4: Values and Ethics.....85
 Key Point 5: Add Value to Society as an Enterprise.....88
 Key Point 6: Continuous Learning.....89
 Key Point 7: Innovation and Change Creation.....90
 Key Point 8: Measuring/Rewarding.....92
 Key Point 9: Stakeholders.....94
Successful Change Management.....95
Some Models for Change.....96
 Model I: Quality Functional Deployment (QFD).....100
 Model II: Total Quality Management (TQM).....102
 The TQM Process.....102
 Systematic Problem Solving (SPS) at AT&T.....106
 The Good News about TQM.....107
 Model III: Process Reengineering (PR).....108
 Model IV: ISO 9000.....111
 Model V: Change Acceleration Process (CAP).....111
 Model VI: Kotter.....113
 Model VII: USAF 8-Step.....113

Understanding Change.....	115
IT Pitfalls.....	118
Case Study: Wipro (Continued).....	119
Summary.....	119

SECTION II Bringing Lean into Information Technology (IT)

Chapter 5	How Can Lean Help IT?.....	123
	Leaning IT.....	124
	Measurable Benefits of Applying Lean to IT.....;	128
	How IT Is Changing.....	133
	Case Study: Wipro (Continued).....	139
	Some Final Thoughts.....	139
Chapter 6	What Is Lean?.....	141
	Denning Lean.....	142
	The Key Principles of Lean.....	147
	Define "Value" from the Customers Perspective.....	148
	Define the Process by Looking at and Analyzing All the Pieces of the SIPOC.....	148
	Remove Obstacles (Bottlenecks) That Disrupt the Value Flow.....	150
	Drive Product and Service Flow at the "Pull" of the Customer.....	150
	Empower Employees in the Change Process through Teaming.....	151
	Build a Strategic Plan.....	151
	Lean Tools.....	151
	Acceptance Tools.....	154
	Acceptance Tool #1—Breakthrough Thinking/ Concept Management/Purpose Expansion.....	154
	Acceptance Tool #2—Team Effectiveness Surveys.....	161
	Goals and Objectives.....	161
	Roles and Responsibilities.....	162
	Enthusiasm and Motivation.....	162

Contents

Trust and Openness.....	162
Leadership and Direction.....	162
Information and Communication.....	162
Acceptance Tool #3—Change Readiness Surveys.....	163
Acceptance Tool #4—Myers-Briggs.....	164
Acceptance Tool #5—JoHari Window.....	171
Technical Tools.....	175
Technical Tool #1—7 Wastes.....	176
Overproduction.....	176
Waiting.....	177
Unnecessary Transportation.....	177
Overprocessing.....	178
Excess Inventory.....	178
Unnecessary Movement by Employees.....	178
Production of Defective Parts.....	179
Underused Employee Abilities or Creativity.....	179
Technical Tool #2—Value Stream Mapping (Current State/Ideal State/Future State).....	180
Mapping the Process.....	181
Preparation.....	182
Mapping Process.....	182
Ideal State Value Stream Map/Future State Value Stream Map.....	187
Develop an Action Item List of Improvement Opportunities.....	188
Classify the Action Item List.....	188
Select Improvement Events Based on the Highest Priority Areas of Improvement.....	191
Technical Tool #3—SIPOC (Supplier/Input/Process/ Output/Customer).....	191
Technical Tool #4—SWOT (Strengths/Weaknesses/ Opportunities/Threats).....	192
Technical Tool #5—VOC (Voice of the Customer).....	193
Technical Tool #6—Systems Flowchart/Information Flow Diagrams.....	194
Technical Tool #7—Gemba Walk (Go and See Analysis).....	195
Technical Tool #8—B-SMART Targets.....	197
Technical Tool #9—JIT (Just-In-Time)/Kanban/Cells	198

Technical Tool #10—Spaghetti Chart.....	199
Technical Tool #11—Lean Events/RIE (Rapid Improvement Events)/Kaizen Events.....	200
Technical Tool #12—Improvement Project.....	201
Technical Tool #13—Just-Do-It.....	202
Technical Tool #14—5S.....!	202
Sort.....•	203
Set in Order (Straighten).....	207
Shine.....	210
Standardize.....	211
Sustain.....	212
A Sixth "S"—Safety.....	212
Technical Tool #15—Poka-Yoke.....	214
Technical Tool #16—Six Sigma/DMAIC.....	215
Technical Tool #17—TPM (Total Product Maintenance).....	220
Technical Tool #18—Standard Work.....	221
Technical Tool #19—5 Whys.....	222
Technical Tool #20—Brainstorming.....	223
Technical Tool #21—Fishbone Charts.....	224
Technical Tool #22—Pareto Charts.....	225
Technical Tool #23—Affinity Diagrams.....	226
Technical Tool #24—Control Charts.....	227
Technical Tool #25—PICK (Possible, Implement, Challenge, Kill) Chart/Impact/Effort Matrix.....	230
Technical Tool #26^Theory of Constraints (TOC)/ Bottleneck Analysis.....	233
Management Philosophy.....	233
Operating Principles.....	234
•Technical Tool #27—Project Charter.....	236
Sustainment.....	237
Comparison of Methods.....	238
Some Success Stories.....	238
Case Study: Wipro (Continued).....	241
Summary.....	241
Appendix 6-A.....	244
The JoHari Window Assessment Test.....	244
Directions.....	244
Interpretation.....	245

	JoHari Window Test.....	247
Chapter 7	Are We Working on the Correct Problem? Or Are We Creating More Problems?.....	249
	A Quick Review of A3 Problem Analysis.....	250
	The A3 Steps.....	250
	The Two Case Examples.....	251
	Case#1.....	253
	Project Charter.....	254
	Facilitator Activities.....	256
	Event Pre-Work.....	258
	Event Execution.....	259
	Contents of the A3.....	267
	Post-Event Activities.....	267
	Case #2.....	270
	Project Charter.....	271
	Facilitator Activities.....	274
	RIE Event Pre-Work.....	275
	Event Execution.....	276
	Post-Event Activities.....	281
	Using the 9-Step A3 Tool.....	282
	Summary.....	283
Chapter 8	The Lean IT Event.....	285
	TheRIE.....	286
	The Role of the Facilitator.....	287
	Lean Training.....	287
	Lean Tools.....	289
	How the Lean Process Works.....	289
	Acceptance Stage.....	289
	Technical Stage.....	290
	Sustainment Stage.....	291
	Case Study: Wipro (Continued).....	291
	Summary.....	292
Chapter 9	Meaningful Metrics.....	295
	The Role and Purpose of Measures.....	297

The Role and Purpose of Control Systems.....	297
An Industrial Example—Managing Your Supply Chain Using Event Management.....	298
Defining the Measurement System.....	304
What Is the Best Measure for Your Organization?.....	306
Measurement Reporting Tools.....	307
Summary.....	308

**SECTION III Lean Information
Technology (IT) on into the Future**

Chapter 10 IT Maturity.....	313
Evaluating Your World-Class Status.....	314
IT Best Practices.....	325
Summary.....	328
Chapter 11 Wrap-Up.....	329
Bibliography.....	333
Index.....	337
About the Author..... ;.....	343
