PREFACE xiii

1 *Difference Equations*

1.1. First-Order Difference Equations 1
1.2. pth-Order Difference Equations 7

APPENDIX 1.A. *Proofs of Chapter 1 Propositions 21*
References 24

2 Lag Operators 25

2.1. Introduction 25
2.2. First-Order Difference Equations 27
2.3. Second-Order Difference Equations 29
2.4. pth-Order Difference Equations 33
2.5. Initial Conditions and Unbounded Sequences 36

References 42

3 *Stationary* ARMA *Processes 43*

3.1. Expectations, Stationarity, and Ergodicity 43
3.2. White Noise 47
3.3. Moving Average Processes 48
3.4. Autoregressive Processes 53
3.5. Mixed Autoregressive Moving Average Processes 59

3.6. The Autocovariance-Generating Function 61
3.7. Invertibility 64

APPENDIX 3. A. *Convergence Results for Infinite-Order Moving A verage Processes 69*
Exercises 70 References 71

4 *Forecasting* *72*

4.1. Principles of Forecasting 72
4.2. Forecasts Based on an Infinite Number of Observations 77
4.3. Forecasts Based on a Finite Number of Observations 85
4.4. The Triangular Factorization of a Positive Definite Symmetric Matrix 87
4.5. Updating a Linear Projection. 92
4.6. Optimal Forecasts for Gaussian Processes 100
4.7. Sums of *ARMA* Processes 102
4.8. Wold's Decomposition and the Box-Jenkins Modeling Philosophy 108

„ **APPENDIX 4.A.** *Parallel Between* OLS *Regression and Linear Projection 113*
APPENDIX 4.B. *Triangular Factorization of the Covariance Matrix for an* MA(1) *Process 114*
Exercises 115 References 116

5 *Maximum Likelihood Estimation* *117*

5.1. Introduction 117
5.2. The Likelihood Function for a Gaussian *AR(1)* Process 118
5.3. The Likelihood Function for a Gaussian *AR(p)* Process 123
5.4. The Likelihood Function for a Gaussian *MA(1)* Process 127
5.5. The Likelihood Function for a Gaussian *MA(q)* Process 130
5.6. The Likelihood Function for a Gaussian *ARMA(p, q)* Process 132
5.7. Numerical Optimization 133

5.8. Statistical Inference with Maximum Likelihood Estimation 142
5.9. Inequality Constraints 146

APPENDIX 5.A. *Proofs of Chapter 5 Propositions 148*
Exercises 150 *References 150*

6 *Spectral Analysis* *152*

6.1. The Population Spectrum 152
6.2. The Sample Periodogram 158
6.3. Estimating the Population Spectrum 163
6.4. Uses of Spectral Analysis 167

APPENDIX 6.A. *Proofs of Chapter 6 Propositions 172*
Exercises 178 *References 178*

7 *Asymptotic Distribution Theory* *180*

7.1. Review of Asymptotic Distribution Theory 180
7.2. Limit Theorems for Serially Dependent Observations 186

APPENDIX 7.A. *Proofs of Chapter 7 Propositions 195*
Exercises 198 *References 199*

8 *Linear Regression Models* *200*

8.1. Review of Ordinary Least Squares with Deterministic Regressors and i.i.d. Gaussian Disturbances 200
8.2. Ordinary Least Squares Under More General Conditions 207
8.3. Generalized Least Squares 220

APPENDIX 8. A. *Proofs of Chapter 8 Propositions 228*
Exercises 230 *References 231*

9 Linear Systems of Simultaneous Equations 233

9.1. Simultaneous Equations Bias 233
9.2. Instrumental Variables and Two-Stage Least Squares 238

9.3. Identification 243
9.4. Full-Information Maximum Likelihood Estimation 247
9.5. Estimation Based on the Reduced Form 250
9.6. Overview of Simultaneous Equations Bias 252

APPENDIX 9.A. *Proofs of Chapter 9 Proposition 253*
Exercise 255 *References 256*

10 *Covariance-Stationary Vector Processes* *257*

10.1. Introduction to Vector Autoregressions 257
10.2. Autocovariances and Convergence Results for Vector Processes 261
10.3. The Autocovariance-Generating Function for Vector Processes 266
10.4. The Spectrum for Vector Processes 268
10.5. The Sample Mean of a Vector Process 279

APPENDIX 10.A. *Proofs of Chapter 10 Propositions 285*
Exercises 290 *References 290*

11 *Vector Autoregressions* *291*

11.1. Maximum Likelihood Estimation and Hypothesis Testing for an Unrestricted Vector Autoregression 291
11.2. Bivariate Granger Causality Tests 302
11.3. Maximum Likelihood Estimation of Restricted Vector Autoregressions 309
11.4. The Impulse-Response Function 318
11.5. Variance Decomposition 323
11.6. Vector Autoregressions and Structural Econometric Models 324
11.7. Standard Errors for Impulse-Response Functions 336

APPENDIX **ll.A.** *Proofs of Chapter 11 Propositions 340*
APPENDIX 11. B. *Calculation of Analytic Derivatives 344*
Exercises 348 *References 349*

12 *Bayesian Analysis* *351*

12.1. Introduction to Bayesian Analysis 351
12.2. Bayesian Analysis of Vector Autoregressions 360
12.3. Numerical Bayesian Methods 362

APPENDIX 12. A. *Proofs of Chapter 12 Propositions 366*
Exercise 370 *References 370*

13 *The Kalman Filter* *372*

13.1. The State-Space Representation of a Dynamic System 372
13.2. Derivation of the Kalman Filter 377
13.3. Forecasts Based on the State-Space Representation 381
13.4. Maximum Likelihood Estimation of Parameters 385
13.5. The Steady-State Kalman Filter 389
13.6. Smoothing 394
13.7. Statistical Inference with the Kalman Filter 397
13.8. Time-Varying Parameters 399

APPENDIX 13. A. *Proofs of Chapter 13 Propositions 403*
Exercises 406 *References 407*

14 *Generalized Method of Moments* *409*

14.1. Estimation by the Generalized Method of Moments 409
14.2. Examples 415
14.3. Extensions 424
14.4. *GMM* and Maximum Likelihood Estimation 427

APPENDIX 14.A. *Proofs of Chapter 14 Propositions 431*
Exercise 432 *References 433*

15 *Models of Nonstationary Time Series* *435*

15.1. Introduction 435
15.2. Why Linear Time Trends and Unit Roots? 438

15.3. Comparison of Trend-Stationary and Unit Root Processes 438
15.4. The Meaning of Tests for Unit Roots 444
15.5. Other Approaches to Trended Time Series 447

APPENDIX 15.A. *Derivation of Selected Equations for Chapter 15* 451
References 452

16 *Processes with Deterministic Time Trends* 454

16.1. Asymptotic Distribution of *OLS* Estimates of the Simple Time Trend Model 454
16.2. Hypothesis Testing for the Simple Time Trend Model 461
16.3. Asymptotic Inference for an Autoregressive Process Around a Deterministic Time Trend 463

APPENDIX 16.A. *Derivation of Selected Equations for Chapter 16* 472
Exercises 474 *References* 474

17 *Univariate Processes with Unit Roots* 475

17A. Introduction 475
17.2. Brownian Motion 477
17.3. The Functional Central Limit Theorem 479
17.4. Asymptotic Properties of a First-Order Autoregression when the True Coefficient Is Unity 486
17.5. Asymptotic Results for Unit Root Processes with General Serial Correlation 504
17.6. Phillips-Perron Tests for Unit Roots 506
17.7. Asymptotic Properties of a pth-Order Autoregression and the Augmented Dickey-Fuller Tests for Unit Roots 516
17.8. Other Approaches to Testing for Unit Roots 531
17.9. Bayesian Analysis and Unit Roots 532

APPENDIX 17.A. *Proofs of Chapter 17 Propositions* 534
Exercises 537 *References* 541

18 *Unit Roots in Multivariate Time Series* *544*

18.1. Asymptotic Results for Nonstationary Vector Processes 544
18.2. Vector Autoregressions Containing Unit Roots 549
18.3. Spurious Regressions 557

APPENDIX 18. A. *Proofs of Chapter 18 Propositions 562*
Exercises 568 *References 569*

19 *Cointegration* *571*

19.1. Introduction 571
19.2. Testing the Null Hypothesis of No Cointegration 582
19.3. Testing Hypotheses About the Cointegrating Vector 601

APPENDIX 19.A. *Proofs of Chapter 19 Propositions 618*
Exercises 625 *References 627*

20 *Full-Information Maximum Likelihood Analysis of Cointegrated Systems* *630*

20.1. Canonical Correlation 630
20.2. Maximum Likelihood Estimation 635
20.3. Hypothesis Testing 645
20.4. Overview of Unit Roots—To Difference or Not to Difference? 651

APPENDIX 20. A. *Proofs of Chapter 20 Propositions 653*
Exercises 655 *References 655*

21 *Time Series Models of Heteroskedasticity* *657*

21.1. Autoregressive Conditional Heteroskedasticity *(ARCH)* 657
21.2. Extensions 665

APPENDIX 21.A. *Derivation of Selected Equations for Chapter 21 673*
References 674

22 *Modeling Time Series with Changes in Regime* *677*

22.1. Introduction 677
22.2. Markov Chains 678
22.3. Statistical Analysis of i.i.d. Mixture Distributions 685
22.4. Time Series Models of Changes in Regime 690

APPENDIX 22.A. ***Derivation of Selected Equations for Chapter 22 699***
Exercise 702 ***References 702***

A *Mathematical Review* *704*

A.I. Trigonometry 704
A.2. Complex Numbers 708
A.3. Calculus 711
A.4. Matrix Algebra 721
A.5. Probability and Statistics 739

References 750

B *Statistical Tables* *751*

Answers to Selected Exercises *769*

D *Greek Letters and Mathematical Symbols Used in the Text* *786*
