|   |           |
|---|-----------|
| <b>Preface</b>  | <b>ix</b> |
| <b>1 Customer relationship management</b>                         | <b>1</b>  |
| 1.1 Introduction  | 1         |
| 1.2 What is CRM?  | 2         |
| 1.3 What is needed to implement CRM strategies?                   | 3         |
| 1.3.1 Database  | 3         |
| 1.3.2 Technology  | 6         |
| 1.3.3 Metrics   | 7         |
| 1.4 Analytical methods  | 9         |
| 1.5 Conclusion  | 9         |
| References  | 10        |
| <b>2 CRM in action</b>  | <b>11</b> |
| 2.1 Introduction  | 11        |
| 2.2 The importance of customer acquisition                        | 13        |
| 2.3 The significance of customer retention                        | 15        |
| 2.4 The impact of customer churn                                  | 17        |
| 2.5 The benefits of customer win-back                             | 18        |
| 2.6 Conclusion  | 20        |
| References  | 20        |
| <b>3 Customer acquisition</b>                                     | <b>22</b> |
| 3.1 Introduction  | 22        |
| 3.1.1 Data for empirical examples                                 | 27        |
| 3.2 Response probability  | 28        |
| 3.2.1 Empirical example: Response probability                     | 32        |
| 3.2.2 How do you implement it?                                    | 34        |
| 3.3 Number of newly acquired customers and initial order quantity | 35        |
| 3.3.1 Empirical example: Number of newly acquired customers       | 37        |
| 3.3.2 How do you implement it?                                    | 38        |
| 3.3.3 Empirical example: Initial order quantity                   | 39        |
| 3.3.4 How do you implement it?                                    | 42        |
| 3.4 Duration/time   | 42        |
| 3.4.1 Empirical example: Duration/time                            | 44        |

|  |            |
|--|------------|
| 3.4.2 How do you implement it?                             | 46         |
| 3.5 Firm's performance (LTV, CLV, and CE)                  | 47         |
| 3.5.1 Empirical example: Firm's performance                | 49         |
| 3.5.2 How do you implement it?                             | 52         |
| 3.6 Chapter summary  | 52         |
| Customer acquisition – SAS code                            | 53         |
| Customer acquisition – SAS output                          | 55         |
| References   | 61         |
| <b>4 Customer retention</b>                                | <b>63</b>  |
| 4.1 Introduction   | 63         |
| 4.1.1 Data for empirical examples                          | 66         |
| 4.2 Repurchase or not (stay or leave)                      | 69         |
| 4.2.1 Will a customer repurchase?                          | 69         |
| 4.2.2 When will a customer no longer repurchase?           | 71         |
| 4.2.3 Empirical example: Repurchase or not (stay or leave) | 73         |
| 4.2.4 How do you implement it?                             | 78         |
| 4.3 Lifetime duration                                      | 78         |
| 4.3.1 Empirical example: Lifetime duration                 | 83         |
| 4.3.2 How do you implement it?                             | 85         |
| 4.4 Order quantity and order size                          | 85         |
| 4.4.1 How much (in \$) will a customer order?              | 85         |
| 4.4.2 How many items will a customer order?                | 86         |
| 4.4.3 What is the average order size?                      | 87         |
| 4.4.4 Empirical example: Order quantity                    | 87         |
| 4.4.5 How do you implement it?                             | 91         |
| 4.5 Cross-buying   | 91         |
| 4.5.1 Empirical example: Cross-buying                      | 92         |
| 4.5.2 How do you implement it?                             | 97         |
| 4.6 SOW  | 97         |
| 4.6.1 Empirical example: SOW                               | 98         |
| 4.6.2 How do you implement it?                             | 101        |
| 4.7 Profitability (CLV)                                    | 102        |
| 4.7.1 Empirical example: Profitability (CLV)               | 103        |
| 4.7.2 How do you implement it?                             | 105        |
| 4.8 Chapter summary  | 105        |
| Customer retention – SAS code                              | 106        |
| Customer retention – SAS output                            | 111        |
| References   | 119        |
| <b>5 Balancing acquisition and retention</b>               | <b>121</b> |
| 5.1 Introduction   | 121        |
| 5.1.1 Data for empirical examples                          | 122        |
| 5.2 Acquisition and retention                              | 124        |

|  |            |
|--|------------|
| 5.2.1 Empirical example: Balancing acquisition and retention                     | 128        |
| 5.3 Optimal resource allocation  | 137        |
| 5.3.1 How do you implement it?   | 140        |
| 5.4 Chapter summary  | 141        |
| Balancing acquisition and retention – SAS code                                   | 142        |
| Balancing acquisition and retention – SAS output                                 | 144        |
| References   | 147        |
| <b>6 Customer churn</b>  | <b>149</b> |
| 6.1 Introduction   | 149        |
| 6.1.1 Data for empirical examples  | 150        |
| 6.2 Customer churn   | 151        |
| 6.2.1 Empirical example: Customer churn  | 156        |
| 6.2.2 How do you implement it?   | 161        |
| 6.3 Chapter summary  | 161        |
| Customer churn – SAS code  | 162        |
| Customer churn – SAS output  | 163        |
| References   | 164        |
| <b>7 Customer win-back</b>   | <b>166</b> |
| 7.1 Introduction   | 166        |
| 7.1.1 Data for empirical examples  | 167        |
| 7.2 Customer win-back  | 168        |
| 7.2.1 Empirical example: Customer win-back                                       | 169        |
| 7.2.2 How do you implement it?   | 178        |
| 7.3 Chapter summary  | 179        |
| Customer win-back – SAS code   | 180        |
| Customer win-back – SAS output   | 182        |
| References   | 185        |
| <b>8 Implementing CRM models</b>   | <b>186</b> |
| 8.1 Introduction   | 186        |
| 8.2 CLV measurement approach   | 187        |
| 8.3 CRM implementation at IBM  | 190        |
| 8.3.1 IBM background   | 190        |
| 8.3.2 Implementing a CLV management framework at IBM                             | 191        |
| 8.4 CRM implementation at a B2C firm   | 202        |
| 8.4.1 The focal firm background  | 202        |
| 8.4.2 Implementing the CLV management framework<br>at a fashion retailer         | 202        |
| 8.4.3 Process to implement the CLV management framework<br>at a fashion retailer | 203        |
| 8.5 Challenges in implementing the CLV management framework                      | 219        |

|  |            |
|--|------------|
| 8.5.1 Challenges in data collection and internal collaboration | 219        |
| 8.5.2 Challenges in implementing the customer-centric approach | 220        |
| References   | 222        |
| <b>9 The future of CRM</b>                                     | <b>223</b> |
| 9.1 Introduction   | 223        |
| 9.2 Social media   | 223        |
| 9.3 Mobile marketing   | 226        |
| 9.4 Customized marketing campaigns                             | 227        |
| 9.5 Conclusion   | 229        |
| References   | 229        |
| <b>Appendix A: Maximum likelihood estimation</b>               | <b>230</b> |
| <b>Appendix B: Log-linear model—an introduction</b>            | <b>232</b> |
| <b>Appendix C: Vector autoregression modeling</b>              | <b>235</b> |
| <b>Appendix D: Accelerated lifetime model</b>                  | <b>241</b> |
| <b>Appendix E: Type-1 Tobit model</b>                          | <b>244</b> |
| <b>Appendix F: Multinomial logit model</b>                     | <b>246</b> |
