Construction and Design Manual Parking Structures

Ilja Irmscher

With contributions by Ivan Kosarev and Angela Schiefenhovel

Volume 1: Planning Principles

Introduction by Ansgar Oswald

DOM publishers

1. Car Parks: An Integral Part of the Modern History of Architecture

1.1 How the Automobile Shapes Architecture and Urban Design ... 10
1.2 Ten Examples from a Hundred-Year Construction History ... 30

2. Basic Principles of Car Park Planning

2.1 Functional Architecture for the Interplay between Cars and their Drivers ... 42
2.2 The Automobile and its Driving Geometry ... 43
2.3 Objective and Subjective User Requirements ... 62
2.4 Requirements for Economic Operation ... 63
2.5 Typical Municipal Requirements ... 65
1.6 Regulations, Recommendations and Certificates ... 66

3. Choosing a Location: Basic Decisions

3.1 Traffic Planning Perspectives and Economic Perspectives ... 72
3.2 Urban Development Issues ... 73
3.3 Dimensioning ... 75
3.4 Traffic Integration ... 78

4. Car Parks as Holistic Systems

4.1 Design Philosophy ... 86
4.2 Internal Traffic Functionality ... 87
4.3 Car Park Types ... 88
4.4 Parking Streets as Basic Design Elements ... 98
4.5 Ramps as Basic Design Elements ... 102
4.6 Multi-Storey Car Parks ... 109

5. Further Technical Features of Car Parks

5.1 Entry and Exit Drives ... 130
5.2 Parking Management Systems ... 139
5.3 Driving Lanes and Parking Spaces ... 148
5.4 Walkways and Route Guidance Systems ... 151
5.5 Driving Surfaces and Driving Surface Markings ... 162
5.6 Planning Interior Heights: Special Aspects to Consider ... 168
5.7 Drainage ... 169
5.8 Lighting ... 178
5.9 Ventilation and Smoke Extraction ... 181
5.10 Carbon Monoxide and Smoke Alarm Systems ... 181
5.11 Further Building Services Aspects ... 182
5.12 Facades and Safety Barriers ... 184
5.13 High-Quality Interiors ... 191

6. Mechanical Parking Systems

6.1 Introduction 196
6.2 Parking Lifts 197
63 Sliding Pallets 199
6.4 Turntables 201
6.5 Car Lifts 201
6.6 Other Mechanical Parking Aids 201
6.7 Semi-Automated Parking Systems 202

7. Automated Parking Systems

71 Introduction 206
7.2 Mode of Operation 206
7.3 Area and Space Requirements 207
7.4 Permissible Vehicle Dimensions 210
7.5 Space Tolerances and Minimum Distances 211
7.6 Stacking Principles 211
7.7 Main Types of Automated Parking Systems 213
78 Load-Lifting Systems 216
7.9 Planning Automated Parking Systems 220
7.10 Operation and Services 226
7.11 Innovative Applications 227

8. Appendix

8.1 Model Car Park Ordinance 238
8.2 Model Inspection Ordinance 242
8.3 Important Reference Values
from the Car Park Ordinances of the German Federal States 243
8.4 References and Further Reading 243
8.5 Keyword Index 248
8.6 About the Authors 251

9. Examples of Car Parks (Volume 2)

9.1 Freestanding Multistorey Car Parks
9.2 Self-contained Underground Car Parks
9.3 Integrated Underground Car Parks
9.4 Small Garages
9.5 Automated Parking Systems
9.6 Semi-Automated Parking Systems
9.7 Mechanical Parking Systems
