

QUALITATIVE DATA ANALYSIS

PAT BAZELEY

Table of contents

List of figures	x
List of tables	xiv
List of boxes	xv
About the author	xix
Preface	xx
Software, symbols, and sample data	xxi
Acknowledgements	xxiii

PART 1 PREPARING THE WAY: LAYING THE FOUNDATIONS FOR ANALYSIS

1 Foundations for thinking and working qualitatively	3
Thinking qualitatively	3
Thinking methods (and methodology)	8
Working qualitatively	12
Working qualitatively - using software	17
Foundations for working qualitatively	19
Working qualitatively - implications for analysis	27
Writing about foundations	28
Exercises	29
Further reading	30
2 Designing for analysis	32
Design: giving form to ideas	32
Focusing the study	35
Designing for data that can be analysed	47
Planning for quality and credibility of conclusions	55
Putting it all together	58
Writing about design	60
Exercises	61
Further reading	61

3 , Managing and preparing data for analysis	63
Before data collection	63
Keeping organised, available, and usable data records	64
Recording and preparing data for analysis	67
The importance of context	81
Recording sample details for analysis	84
Checks and balances for data	89
Managing relationships in the research team	90
Writing about data management	91
Exercises	91
PART 2 WORKING WITH DATA: A PATHWAY INTO ANALYSIS	93
Data samples: becoming and being a researcher	95
4 Read, reflect, and connect: initial explorations of data	101
Read, and read again	101
Write as you read	102
Reflect in a research journal and/or memos	102
Annotate text	105
Purposeful play: preliminary explorations of each data source	106
Explore the storylines	113
Exploring context	119
Identify relevant categories and concepts	120
Involving participants in early analysis	121
Refocus, ready for the next phase	122
Writing about preliminary analysis	123
Exercises	124
Further reading	124
5 Codes and coding: principles and practice	125
Using codes to work with data	125
Practical tools for coding	132
Methods decisions in coding	142
Issues of validity and reliability in coding	148
Managing the process of coding	152
A final reminder: codes and coding in context	154
Writing about coding processes	155

Exercises	155
Further reading	156
6 Naming, organising, and refining codes	157
What's in a name?	157
Naming broad topic areas	159
Naming codes to capture substance and meaning	160
Automating coding	172
Developing a coding system	177
Reviewing and refining codes and the coding structure	185
Writing about codes	185
Exercises	186
Further reading	187
7 Alternative approaches to breaking open and connecting data	188
Building on cases	188
Themes as an alternative to codes?	190
Focus on interaction: working with focus group data	198
Focus on stories and accounts: identifying structure, interpreting meaning	200
Focus on discourse: the intersubjective space	216
The value of case-based approaches	220
Writing about your use of case-based, thematic, and narrative methods	221
Exercises	221
Further reading	221
PART 3 DESCRIBE, COMPARE, AND RELATE: MOVING ON FROM CODES AND THEMES	223
8 Describing, evolving, and theorising concepts	227
Describing categories and concepts (or themes) as a step in analysis	227
Evolving concepts with analytic, meta-, or pattern codes	232
Theorising concepts	238
Writing about describing and analysing concepts	251
Exercises	251
Further reading	253

9, Comparative analyses as a means of furthering analysis	254
Why compare? >	254
The comparative process	256
Managing data to make subgroup, contextual, or case comparisons	258
Comparing concepts or categories across groups or situations	263
Comparing cases	272
Interpreting comparative analyses	279
Writing about comparisons	280
Exercises •	281
Further reading	281
10 Relational analyses	282
Coding and connecting working together	282
Investigating relational patterns	284
Cross-case analyses	285
Visual strategies for cross-case analyses	290
Identifying patterns of association between sets of related phenomena, using coded data	296
Relating data to a theoretical model	306
Investigating relationships between specific categories and concepts	308
Writing about exploring and testing relationships in data	321
Exercises	322
Further reading	323
PART 4 BRINGING IT TOGETHER: MOVING TOWARD CLIMAX AND CLOSURE	325
11 If ... then ... is it because? Developing explanatory models and theories	327
Analytic progression	328
Explanatory theory as a goal of research	329
Foundations for explanatory theory	331
Logic-based questioning: finding the major premise	337
Puzzle solving with 'conjectures and refutations'	339
Case-based strategies	345
Theoretical development and integration in grounded theory	355
Visual tools for theory building	358
Writing about your developing theory	369
Further reading	369

12 Developing coherent understanding	371
Coherent understanding?	371
Coherence through description	374
Theoretical coherence	384
Coherence through display	392"
A collection of tips and tricks for bringing it together	399
Writing about developing coherence	400
Further reading	400
13 Defending and extending: issues of quality and significance	401
The issue of quality	402
Generalisation and transferability	410
Theoretical extension	411
Audiences and representation	415
A final reflection	419
Writing about quality and significance	420
Exercises	420
Further reading	421
After-Words	422
References	423
Index	441
