Detailed Contents

Preface	xiii
Acknowledgments	xv
About the Author	xvii
1. Reviewing the Literature: Why? For Whom? How?	1
A Reader's Guide	1
Purpose of This Chapter	2
What Is a Research Literature Review? Why Do One?	3
Write Proposals for Funding	6
Write Proposals for Academic Degrees	7
Describe and Explain Current Knowledge to Guide Professional Practice	8
Identify Effective Research and Development Methods	9
Identify Experts to Help Interpret Existing Literature and Identify Unpublished Sources of Information	9
Identify Funding Sources and Works in Progress	10
Satisfy Personal Curiosity	10
Gaining Control: Experiments and Observations	13
An Experimental Study	14
An Observational Study	15
<i>Systematic, Explicit, Comprehensive, and Reproducible:</i> Four Key Words	15
Choosing an Online Bibliographic Database	16
Public and Private Online Bibliographic Databases	16
What Exactly Do You Need to Find?	20
How Do You Search for What You Want to Find? Key Words, Descriptors, Identifiers, and the Thesaurus	21

How Do You Ask for Information? Searching	
With Boolean Operators	28
Three Examples of Boolean Logic	28
Using the Web of Science: A Case Study	33
Pausing During the Search	35
Changing the Course of the Search	35
Changing the Course of a Literature Review	
Search: Expanding the Scope	36
Supplementing the Online Search	36
Reasons to Supplement Electronic Searches	36
Reviewing References in High-Quality Studies	37
Is Everything Worthwhile Published?	38
Bring in the Experts	39
Cautiously Approach the Web	41
Organizing the Research Literature: Building	
a Virtual Filing Cabinet	43
Summary of Key Points	44
Exercises	45
Answers	49
Online Literature Reviews	51
Suggested Readings	53
Notes	54
2. Searching and Screening: The Practical Screen	
 and Methodological Quality (Part 1—Research	
 Design and Sampling)	55
A Reader's Guide	55
Purpose of This Chapter	56
Search Screen 1: The Practical Screen	59
Including and Excluding Studies: Typical Practical	
Screening Criteria for Literature Review Searches	59
Practical Screening Criteria: Using Inclusion	
and Exclusion Criteria	61
Search Screen 2: Methodological Quality Screening	
Criteria, Part 1—Research Design and Sampling	62
Criterion for Quality: Research Design	63
Random Selection and Random Assignment:	
Two Examples	66

Concurrent Controls but No Random Assignment	69
Self-Controls	71
Historical Controls or Existing Data	73
Observational Designs in Brief	74
Cohort Designs	74
Case Control Designs	78
A Note on Other Designs and Studies: Cross-Sectional	
Surveys and Consensus Statements	80
Cross-Sectional Surveys	80
Consensus Statements	84
Books	84
Internal and External Validity	84
Criterion for Quality: Sampling	88
What Is a Sample?	88
Inclusion and Exclusion Criteria or Eligibility of Subjects	89
Methods of Sampling	91
Simple Random Sampling	92
Systematic Sampling	92
Stratified Sampling	92
Cluster Sampling	93
Convenience Sampling	94
The Sampling Unit	94
The Size of the Sample	95
Response Rate	95
Nonresponse: Subjects and Items	96
Summary of Key Points	99
Exercises	103
Answers	105
Suggested Readings	106
3. Searching and Screening: Methodological Quality	
(Part 2—Collection, Interventions, Analysis,	
Results, and Conclusions)	109
A Reader's Guide	109
Purpose of This Chapter	110
Data Collection and Data Sources: Methods and Measures	110
Reliability	114
Validity	116

Interventions and Programs: Reviewing the Research Literature to Find Out What Works	120
Two Versions of a Program Description	121
Information Analysis: Statistical Methods in the Research Literature	123
Statistical Methods and What to Look For:	
An Overview	123
Independent and Dependent Variables	124
Measurement Scales and Their Data	126
Statistical and Practical Significance	128
Confidence Intervals	131
Which Analytic Method Is Best?	133
The Results	139
Conclusions	140
Using Formal Systems to Evaluate Research	143
Reviewing Qualitative Research: A Special Note	144
Summary of Key Points	151
Exercises	154
Answers	155
Suggested Readings	157
4. Doing the Review: A Reader's Guide Chapter	161
A Reader's Guide	161
Purpose of This Chapter	161
Types of Information: Methods and Content	162
Eligibility and Actuality	165
Reliable and Valid Reviews	172
Measuring Reliability: The Kappa Statistic	172
Uniform Data Collection: The Literature Review	
Survey Questionnaire	174
Uniform Data Collection: Definitions and More	181
Training Reviewers	182
Pilot Testing the Review Process	184
Establishing Validity	185
Monitoring Quality	186
Collecting Data From the Literature: A Checklist	186
Summary of Key Points	187
Exercises	188
Answers	189

5. What Did You Find? Synthesizing Results	193
A Reader's Guide	193
Purpose of This Chapter	194
Now That You Have Done It, What Do You Do With It?	194
Reviews Describe Current Knowledge	196
Reviews Support the Need for and Significance of New Research	198
Reviews Explain Research Findings	199
Reviews Describe the Quality of Current Research	200
Descriptive Syntheses or Reviews	206
Examples of Descriptive Literature Reviews	206
Meta-Analysis	209
What to Look for in a Meta-Analysis:	
The Seven Steps	210
Fixed Versus Random Effects	221
Cumulative Meta-Analysis	223
Large Studies Versus Meta-Analysis of Smaller Trials: Comparing Results	224
Supporters and Critics	224
Displaying Meta-Analysis Results	225
Meta-Analyses in Practice: Examples	225
Statistical Interlude	230
Descriptive Review Versus Meta-Analysis	233
Summary of Key Points	234
Exercises	236
Answers	239
Suggested Readings	239
Notes	241
Author Index	242
Subject Index	246
