Fuzzy Portfolio Optimization

Advances in Hybrid Multi-criteria
Methodologies

Contents

1 Portfolio Optimization: An Overview	1
1.1 Mean-Variance Model	1
1.2 Mean-Semivariance Model	15
1.3 Mean-Absolute Deviation Model.....	21
1.4 Mean-Semiabsolute Deviation Model	28
1.5 Comparison of the Models	29
1.6 Comments	31
2 Portfolio Optimization with Interval Coefficients.....	33
2.1 Interval Numbers and Interval Arithmetic	33
2.2 Portfolio Selection Using Interval Numbers	42
2.2.1 Assumptions and Notation	42
2.2.2 Objective Functions	43
2.2.3 Constraints	45
2.2.4 The Decision Problem	46
2.3 Solution Methodology.....	48
2.4 Numerical Illustration.....	51
2.5 Comments	59
3 Portfolio Optimization in Fuzzy Environment	61
3.1 Fuzzy Decision Theory	61
3.2 Fuzzy Portfolio Selection Model	65
3.3 Solution Methodology.....	67
3.4 Numerical Illustration	69
3.5 Comments	79
4 Possibilistic Programming Approaches to Portfolio Optimization	81
4.1 Possibility Theory	81
4.2 Portfolio Selection Using Non-interactive Coefficients	89
4.2.1 Possibilistic Portfolio Selection Problem	89

4.2.2	The Classical Possibilistic Programming Approaches	91
4.2.3	Regret-Based Possibilistic Programming Approach	96
4.2.4	Numerical Illustration	102
4.3	Portfolio Selection Using Interactive Coefficients	105
4.3.1	Scenario Decomposed Fuzzy Numbers	106
4.3.2	Oblique Fuzzy Vector	111
4.3.3	Fuzzy Polytope	115
4.3.4	Numerical Illustration	118
4.4	Comments	124
5	Portfolio Optimization Using Credibility Theory	127
5.1	Credibility Theory	127
5.2	Portfolio Selection Based on Credibility Theory	143
5.2.1	Notation	143
5.2.2	Objective Functions	144
5.2.3	Constraints	144
5.2.4	The Decision Problem	145
5.3	Solution Methodology	145
5.3.1	First Phase: Crisp Equivalent Bi-objective Model	146
5.3.2	Second Phase: Fuzzy Interactive Approach	147
5.4	Numerical Illustration	150
5.5	Comments	160
6	Multi-criteria Fuzzy Portfolio Optimization	161
6.1	Multi-criteria Portfolio Selection Model	161
6.1.1	Notation	162
6.1.2	Objective Functions	162
6.1.3	Constraints	163
6.1.4	The Decision Problem	165
6.2	Fuzzy Multi-criteria Portfolio Selection Models and Solution Methodology	166
6.3	Numerical Illustration	174
6.4	Comments	186
7	Suitability Considerations in Multi-criteria Fuzzy Portfolio Optimization-I	187
7.1	Overview of AHP	187
7.2	Suitability Considerations	189
7.2.1	Investor Typology	189
7.2.2	Modeling Suitability with the AHP	192
7.3	Portfolio Selection Based on Suitability and Optimality	192
7.3.1	Notation	193
7.3.2	Objective Functions	194
7.3.3	Constraints	195

7.3.4	The Decision Problem	195
7.4	Fuzzy Portfolio Selection Models Based on Suitability and Optimality	197
7.5	Numerical Illustration	201
7.5.1	Asset Clusters	201
7.5.2	Calculation of AHP Weights	204
7.5.3	Asset Allocation	208
7.6	Comments	221
8	Suitability Considerations in Multi-criteria Fuzzy Portfolio Optimization-II	223
8.1	AHP Model for Suitability and Optimality Considerations	223
8.2	Fuzzy Multiobjective Portfolio Selection Model	225
8.2.1	Notation	226
8.2.2	Objective Functions	226
8.2.3	Constraints	227
8.2.4	The Decision Problem	227
8.3	Solution Methodology	228
8.4	Numerical Illustration	231
8.4.1	Calculation of AHP Weighted Scores	231
8.4.2	Asset Allocation	237
8.5	Comments	253
9	Ethicality Considerations in Multi-criteria Fuzzy Portfolio Optimization	255
9.1	Ethical Evaluation of Assets	255
9.1.1	Ethical Screening of Assets	255
9.1.2	Ethical Performance Scores	256
9.2	Financial Evaluation of Assets	262
9.3	Hybrid Portfolio Selection Models	266
9.3.1	Notation	266
9.3.2	Objective Function	266
9.3.3	Constraints	266
9.3.4	The Decision Problem	268
9.4	Numerical Illustration	269
9.4.1	Ethical Screening and Ethical Performance Scores	269
9.4.2	Financial Performance Scores	275
9.4.3	Asset Allocation	277
9.5	Comments	280
10	Multi-criteria Portfolio Optimization Using Support Vector Machines and Genetic Algorithms	283
10.1	Overview of Support Vector Machines	283
10.2	Multiobjective Portfolio Selection Model	288

10.2.1 Notation	288
10.2.2 Objective Functions	289
10.2.3 Constraints	290
10.2.4 The Decision Problem	291
10.3 Numerical Illustration.	291
10.3.1 Asset Classes	291
10.3.2 Classification of Assets Using SVM	292
10.3.3 Real Coded GA to Solve Portfolio Selection Model	296
10.3.4 Asset Allocation	301
10.4 Comments	309
References	311
