

Handbook of Research Methods and Applications in Empirical Finance

Edited by

Adrian R. Bell

University of Reading, UK

Chris Brooks

University of Reading, UK

Marcel Prokopczuk

Zeppelin University, Germany

HANDBOOKS OF RESEARCH METHODS AND APPLICATIONS

Edward Elgar

Cheltenham, UK • Northampton, MA, USA

Contents

<i>List of contributors</i>	vii
<i>Preface</i>	x
PART I ASSET PRICING AND INVESTMENTS	
1 Markov switching models in asset pricing research <i>Massimo Guidolin</i>	3
2 Portfolio optimization: theory and practical implementation <i>William T. Ziemba</i>	45
3 Testing for speculative bubbles in asset prices <i>Keith Anderson, Chris Brooks and Apostolos Katsaris</i>	73
PART II DERIVATIVES	
4 Estimating term structure models with the Kalman filter <i>Marcel Prokopczuk and Yingying Wu</i>	97
5 American option pricing using simulation with an application to the GARCH model <i>Lars Stentoft</i>	114
6 Derivatives pricing with affine models and numerical implementation <i>Ke Chen and Ser-Huang Poon</i>	148
7 Markov Chain Monte Carlo with particle filtering <i>Yongwoong Lee and Ser-Huang Poon</i>	169
PART III BANKING AND MICROSTRUCTURE	
8 Competition in banking: measurement and interpretation <i>Hong Liu, Phil Molyneux and John O.S. Wilson</i>	197
9 Using heteroskedastic models to analyze the use of rules versus discretion in lending decisions <i>Geraldo Cerqueiro, Hans Degryse and Steven Ongena</i>	216
10 Liquidity measures <i>Thomas Johann and Erik Theissen</i>	238
11 Testing for contagion: the impact of US structured markets on international financial markets <i>Woon Sau Leung and Nicholas Taylor</i>	256

PART IV CORPORATE FINANCE

- 12 Empirical mergers and acquisitions research: a review of methods, evidence and managerial implications 287
Audrey Golubov, Dimitris Petmezas and Nickolaos G. Travlos
- 13 The construction and valuation effect of corporate governance indices 314
Manuel Ammann, David Oesch and Markus Schmid
- 14 Does hedging reduce economic exposure? Hurricanes, jet fuel prices and airlines 341
David A. Carter, Daniel A. Rogers, Betty J. Simkins and Stephen D. Treanor

PART V RISK MODELLING

- 15 Quantifying the uncertainty in VaR and expected shortfall estimates 357
Silvia Stanescu and Radu Tunaru
- 16 Econometric modeling of exchange rate volatility and jumps 373
Deniz Erdemlioglu, Sebastien Laurent and Christopher J. Neely
- 17 Predicting financial distress of companies: revisiting the Z-Score and ZETA® models 428
Edward J. Altman
- 18 Quantifying time variation and asymmetry in measures of covariance risk: a simulation approach 457
Olan T. Henry, Nilss Olekalns and Kalvinder K. Shields
- Index* 477
