

Embracing Complexity

Strategic Perspectives for an Age of Turbulence

Jean G. Boulton, Peter M. Allen, and Cliff Bowman

OXFORD
UNIVERSITY PRESS

Contents

List of Figures

ix

1. Introduction	1
1.1 What is this book about and why are we writing it?	1
1.2 For whom are we writing this book?	6
1.3 Complexity thinking in brief	8
1.4 Limits to knowledge	11
1.5 What this book is not	12
2. The Nature of a Complex World	15
2.1 The life cycle of forests	15
2.2 When the environment is relatively stable	17
2.3 When the environment is not stable	21
2.4 A word of warning: the social world is not so neat and tidy	23
2.5 Messiness and variety are key	26
3. Unpacking Complexity	27
3.1 Introduction	27
3.2 The world really is complex	27
3.3 The key insight: the future is a dance between patterns and events	29
3.4 The birth of complexity theory: Prigogine and open systems	32
3.5 What is a complex system?	34
3.6 Characteristics of a complex world	35
3.7 So where does this take us?	46
4. Have We Thought Like This Before?	48
4.1 Introduction	48
4.2 Flow, change, particularity, and emergence	53
4.3 Plato and Aristotle	56
4.4 Newton and mathematical laws	56
4.5 Statistical mechanics and thermodynamics	59
4.6 Evolution and Darwin	61
4.7 The impact of Darwin's thinking	63
4.8 The emergence of systems thinking and complexity theory	65
4.9 Almost full circle back to pre-modernism	69

5. The Complexity of Complexity Theories	71
5.1 Introduction	71
5.2 Models and equations	72
5.3 A trip into state space	74
5.4 The rocky road from reality to anticipated understanding	77
5.5 Evolutionary, complex models	79
5.6 Probabilistic dynamics: the Master Equation	85
5.7 Assuming stationarity	89
5.8 Dynamical systems	93
5.9 Discussion: what we are trying to emphasize	96
6. Complexity and the Social World	105
6.1 Can we be sure complexity theory is relevant for the social world?	105
6.2 Complexity theory and human systems: are humans different from molecules?	108
6.3 Researching the complex world in the flesh!	110
6.4 We are not dismissing the place of large-scale research	120
7. Complexity and Management	122
7.1 Introduction	122
7.2 Methods for exploring implicit beliefs and worldviews	122
7.3 What does complexity thinking imply for managing change?	130
7.4 Complexity-informed management behaviours	135
8. Complexity and Strategy	138
8.1 What is strategy?	138
8.2 Starting outside-in	142
8.3 Dynamics of the strategy landscape and implications for practice	145
8.4 Strategy in practice: a case study	152
8.5 Deliberate and emergent strategy	157
8.6 Advice to the strategist from the complexity perspective	164
8.7 Pause for thought: the issue of dominance	167
8.8 Complexity and strategy: concluding comments	169
9. Complexity and International Development	171
9.1 This chapter: a personal view	171
9.2 Turkana through a complexity lens	171
9.3 Savings groups	186
9.4 Context analysis	192
9.5 Conclusions	198
10. Complexity and Economics	202
10.1 Introduction	202
10.2 A very brief history of economic thought	202
10.3 A complexity/evolutionary perspective	204

10.4	What is wrong with neo-classical thinking?	206
10.5	Implications	212
10.6	Conclusion	219
11.	Final Reflections: What We Hope You Take Away from This Book	220
11.1	Introduction	220
11.2	We start with modelling	220
11.3	A focus on 'local'	228
11.4	Mindsets and principles, not tools	229
11.5	Empiricism	234
11.6	The pesky topic of self-organization	236
11.7	A concluding comment	239
