

# Quantitative Trading with R

**Understanding Mathematical and  
Computational Tools from a  
Quant's Perspective**

Harry Georgakopoulos

macmillan

# Contents

<i>List of Figures</i> . . . . .	xi
<i>List of Tables</i> . . . . .	xv
<i>Acknowledgments</i> . . . . .	xvii
<b>1 An Overview</b> . . . . .	<b>1</b>
The mission statement . . . . .	1
Financial markets and instruments . . . . .	3
Trading strategies . . . . .	5
High-frequency trading . . . . .	5
About the orderbook . . . . .	6
Trading automation . . . . .	7
Where to get data from . . . . .	8
Summary . . . . .	9
<b>2 Tools of the Trade</b> . . . . .	<b>11</b>
The R language . . . . .	11
Getting started with R . . . . .	14
The <code>c()</code> object . . . . .	17
The <code>matrix()</code> object . . . . .	19
The <code>data.frame()</code> object . . . . .	21
The <code>list()</code> object . . . . .	23
The <code>new.env()</code> object . . . . .	25
Using the <code>plot()</code> function . . . . .	26
Functional programming . . . . .	30
Writing functions in R . . . . .	31
Branching and looping . . . . .	34
A recommended style guide . . . . .	35
A pairwise correlation example . . . . .	36
Summary . . . . .	41
<b>3 Working with Data</b> . . . . .	<b>43</b>
Getting data into R . . . . .	43
Installing packages in R . . . . .	45
Storing and transmitting data . . . . .	46
Extracting data from a spreadsheet . . . . .	48
Accessing a database . . . . .	50
The <code>dplyr</code> package . . . . .	53
Using the <code>xts</code> package . . . . .	56

	Using the <b>quantmod</b> package	64
	Charting with <b>quantmod</b>	65
	Graphing with <b>ggplot2</b>	67
	Summary	70
4	<b>Basic Statistics and Probability</b>	71
	What is a statistic?	71
	Population versus sample	71
	Central Limit Theorem in R	74
	Unbiasedness and efficiency	76
	Probability basics	83
	Random variables	83
	Probabilities	84
	Probability distributions	85
	Bayes versus frequentist approach	87
	Simulations of coins	88
	On the use of <b>RStan</b>	90
	Summary	90
5	<b>Intermediate Statistics and Probability</b>	91
	Random process	91
	Stock price distributions	92
	Stationarity	95
	Determining stationarity with <b>urca</b>	98
	Assumptions of normality	99
	Correlation	103
	Filtering data	105
	R formulas	107
	The linear in linear regression	112
	Volatility	114
	Summary	117
6	<b>Spreads, Betas and Risk</b>	119
	Defining the stock spread	119
	Ordinary Least Squares versus Total Least Squares	121
	Constructing the spread	123
	Signal generation and validation	126
	Trading the spread	132
	Considering the risk	137
	More on the equity curve	138
	Strategy attributes	143
	Summary	144
7	<b>Backtesting with Quantstrat</b>	147
	Backtesting methodology	147
	About <b>blotter</b> and <b>PerformanceAnalytics</b>	149

Initial setup . . . . .	149
The first strategy: A simple trend follower . . . . .	151
Backtesting the first strategy . . . . .	154
Evaluating the performance . . . . .	158
The second strategy: Cumulative Connors RSI . . . . .	162
Evaluating the mean-reverting strategy . . . . .	168
Summary . . . . .	175
<b>8 High-Frequency Data . . . . .</b>	<b>177</b>
High-frequency quotes . . . . .	178
Inter-quote arrival times . . . . .	182
Identifying liquidity regimes . . . . .	183
The micro-price . . . . .	186
Distributions and autocorrelations . . . . .	187
The <b>highfrequency</b> package . . . . .	196
Summary . . . . .	197
<b>9 Options . . . . .</b>	<b>199</b>
Option theoretical value . . . . .	199
A history of options . . . . .	200
Valuation of options . . . . .	200
Exploring options trade data . . . . .	203
Implied volatility . . . . .	208
Summary . . . . .	214
<b>10 Optimization . . . . .</b>	<b>217</b>
The motivating parabola . . . . .	217
Newton's method . . . . .	218
The brute-force approach . . . . .	222
R optimization routines . . . . .	224
A curve-fitting exercise . . . . .	225
Portfolio optimization . . . . .	230
Summary . . . . .	236
<b>11 Speed, Testing, and Reporting . . . . .</b>	<b>237</b>
Runtime execution improvements . . . . .	237
Benchmarking R code . . . . .	238
The <b>Rcpp</b> solution . . . . .	239
Calling R from C++ with <b>RInside</b> . . . . .	242
Writing unit tests with <b>testthat</b> . . . . .	243
Using <b>knitr</b> for documentation . . . . .	245
Summary . . . . .	250
<i>Notes . . . . .</i>	<i>251</i>
<i>References . . . . .</i>	<i>261</i>
<i>Index . . . . .</i>	<i>269</i>
