

# **The Reviewer's Guide to Quantitative Methods in the Social Sciences**

**Editors**

**Gregory R. Hancock**  
**Ralph O. Mueller**

**13 Routledge**

Taylor & Francis Group  
NEW YORK LONDON

<i>List of Figures</i>	x
<i>List of Tables</i>	xi
<i>Preface</i>	xiii
<i>Acknowledgements</i>	xvi
<b>1 Analysis of Variance: Between-Groups Designs</b>	1
ALAN J. KLOCKARS	
<b>2 Analysis of Variance: Repeated Measures Designs</b>	15
LISA M. LIX AND H. J. KESELMAN	
<b>3 Canonical Correlation Analysis</b>	29
XITAO FAN AND TIMOTHY R. KONOLD	
<b>4 Cluster Analysis</b>	41
DENAA. PASTOR	
<b>5 Correlation and Other Measures of Association</b>	55
JASON'W. OSBORNE	
<b>6 Discriminant Analysis</b>	71
CARL J HUBERTY	
<b>7 Effect Sizes and Confidence Intervals</b>	79
GEOFF CUMMING AND FIONA FIDLER	
<b>8 Factor Analysis: Exploratory and Confirmatory</b>	93
DEBORAH L. BANDALOS AND SARA J. FINNEY	
<b>9 Generalizability Theory</b>	115
AMY HENDRICKSON AND PING YIN	
<b>10 Hierarchical Linear Modeling</b>	123
D. BETSY MCCOACH	
<b>11 Interrater Reliability and Agreement</b>	141
WILLIAM T. HOYT	
<b>12 Item Response Theory</b>	
R. J. DE AYALA	

- 13 Latent Class Analysis  
KAREN M. SAMUELSEN AND C. MITCHELL DAYTON
- 14 Latent Growth Curve Models  
KRISTOPHER J. PREACHER
- 15 Latent Transition Analysis  
DAVID RINDSKOPF
- 16 Latent Variable Mixture Models  
GITTA LUBKE
- 17 Logistic Regression  
ANN A. O'CONNELL AND K. RIVET AMICO
- 18 Log-Linear Analysis  
RONALD C. SERLIN AND MICHAEL A. SEAMAN
- 19 Meta-Analysis  
S. NATASHA BERETVAS
- 20 Multidimensional Scaling  
MARK L. DAVISON, CODY S. DING, AND SE-KANG KIM
- 21 Multiple Regression  
KEN KELLEY AND SCOTT E. MAXWELL
- 22 Multitrait-Multimethod Analysis  
KEITH F. WIDAMAN
- 23 Multivariate Analysis of Variance  
STEPHEN OLEJNIK
- 24 Power Analysis  
KEVIN R. MURPHY
- 25 Reliability and Validity of Instruments  
THOMAS R. KNAPP AND RALPH O. MUELLER
- 26 Research Design  
SHARON ANDERSON DANNELS
- 27 Single Subject Design and Analysis  
ANDREW L. EGEL AND CHRISTINE H. BARTHOLD
- 28 Structural Equation Modeling  
RALPH O. MUELLER AND GREGORY R. HANCOCK

29	Structural Equation Modeling: Multisample Covariance and Mean Structures RICHARD G. LOMAX	385
30	Survey Sampling, Administration, and Analysis LAURA M. STAPLETON	397
31	Survival Analysis PAUL D. ALLISON	413
