

Land Restoration and Reclamation: Principles and Practice

James A. Harris, Paul Birch and John P. Palmer

Contents

Foreword			ix		
Pre	Preface				
Ac	knowled	gments	xiii		
Section 1		Causes of degradation and aims of restoration	1		
1	Land a	s a resource	3		
	1.1	Introduction	3		
	1.2	Function of terrestrial ecosystems, nutrient cycling,			
		soil structure, biological assemblages and interactions	5		
	1.3	Definitions	14		
	1.4	Types and sources of land disturbance and dereliction	19		
	1.5	Derelict land survey	23		
	1.6	Legislation and regulation governing derelict/contaminated			
		land	25		
	1.7	Conclusions	29		
		References	30		
		Further reading	30		
2	Assessr	nent strategies	31		
	2.1	Defining what constitutes environmental quality	31		
	2.2	Assessment of resources – overview	32		
	2.3	Site-specific investigations	38		
	2.4	Land classification approaches	45		
	2.5	Environmental audit and impact assessment	51		
	2.6	Integrated approaches	53		
	2.7	Conclusions	56		
		References	56		
		Further reading	57		
Section 2 Reclamation of land		59			
3	Green	field sites	61		
	3.1	Introduction	61		

ł

vi Contents

	3.2	Activities prior to soil movement	61
	3.3	Soil movement and care	63
	3.4	Microbiological, chemical and physical changes in soil	(7
	2.5	during storage	67
	3.5	Changes in soil as a result of agriculture or forestry	12
	3.0	The impact of recreational and amenity uses	15
	3.1	Conservation of on-site ecological resources	כן רר
	. 3.8	Protection of water courses	20
	5.9 2.10	Protection of water courses	80
	2.10	Protection of off site resources	00 81
	2.11	Conclusions	01
	5.12	Deferences	01 81
		References	01
4	Former	industrial sites	83
	4.1	Introduction	83
	4.2	Site assessment principles	84
	4.3	Assessment of contamination status	87
	4.4	Reclamation techniques	98
	4.5	Conclusions	118
		References	118
		Further reading	119

6.5 6.6 6.7	Moving from agro-forestry to self-sustaining systems Management and after-use Conclusions References Further reading	199 203 206 208 211
Why restorations fail		
7.1	Introduction	212
7.2.	Inadequate site surveys	213
7.3	Vegetation regression	214
7.4	Failure of aquatic systems	221
7.5	Objectives	222
7.6	Management plans	222
7.7	Conclusions	224
Conclusions		225
8.1	Land restoration – the state of the art?	225
8.2	Priorities for research	225
8.3	Priorities for legislation	226
8.4	Priorities for educators and activists	226
8.5	Prospects for restoration in the future	227
