Contents

Preface	ix
Acknowledgements	xiii
List of Contributors	xv
Introduction: A Brief	
History of Neuroeconomics	xvii

I

THE FUNDAMENTAL TOOLS OF NEUROECONOMICS

1. Basic Methods from Neoclassical Economics 3

ANDREW CAPLIN AND PAUL W. GLIMCHER

Introduction	3
Rational Choice and Utility Theory: Some Beginnings	4
The <i>Ordinal Revolution</i> and the Logic of Choice	6
Quantitative Tests of Qualitative Theories: <i>Revealed Preference</i>	7
Expected Utility Theory	12
Using Axioms: The Neoclassical Approach In Neuroeconomics	14
References	17

2. Experimental Economics and Experimental Game Theory 19

DANIEL HOUSER AND KEVIN MCCABE

Introduction	19
Game Theory Described	20
Game Theory Experiments	25
Neuroeconomics Experiments	28
Towards a Neuroeconomic Theory of Game Playing	32
References	33

Computational and Process Models of Decision Making in Psychology and Behavioral Economics 35

ERIC J. JOHNSON AND ROGER RATCLIFF

Introduction	35
Models of Risky Choice	36
Models of Riskless Choice	38
Models of Choice Over Time	39
Computational Process Models	40

Diffusion Models of Rapid Decisions	41
Judgment	44
Conclusion	45
References	45

4. Estimation and Testing of Computational Psychological Models 49

JEROME R. BUSEMEYER AND ADELE DIEDERICH

Introduction	49
Behavioral Data to be Modeled	51
Methods for Estimating Parameters	53
Model Comparisons	56
Conclusions	60
Acknowledgments	60
References	60

5. Introduction to Neuroscience 63

PAUL W. GLIMCHER

Introduction	63
The Cellular Structure of Information Encoding in the Brain	63
The Large-Scale Anatomical Structure of the Brain	68
Organizing Principles of Representation in the Brain	71
Plasticity and Memory	73
Summary and Conclusions	74
References	74

6. Experimental Methods in Cognitive Neuroscience 77

CHRISTIAN C. RUFF AND SCOTT A. HUETTEL

Introduction	77
Measurement Techniques	79
Manipulation Techniques	92
Conclusion: Convergence Across Methods	105
References	107

7. Evolutionary Anthropological Insights into Neuroeconomics: What Non-Human Primates Can Tell Us About Human Decision-Making Strategies 109

LAURIE R. SANTOS AND MICHAEL L. PLATT

Introduction: How an Evolutionary Perspective is Important for Neuroeconomics	109
Understanding Evolutionary Homologies Across Primates	111

Prospect Theory and Framing Effects in Non-Human Primates	113
Ambiguity Aversion and the Ellsberg Paradox in Non-Human Primates	117
What Comparative Work Means for Traditional Economics and Neuroeconomics	118
Acknowledgments	120
References	120

II

NEURAL AND PSYCHOLOGICAL FOUNDATIONS OF ECONOMIC PREFERENCES

8. The Computation of Stimulus Values in Simple Choice 125

ANTONIO RANGEL AND JOHN A. CLITHERO

Introduction	125
Theory: A Computational Model of Simple Choice	126
Methodology: How to Identify Stimulus Value Signals?	128
Evidence: Stimulus Value Signals in Basic Valuation Tasks	130
Complication: Attention Modulates the Computation and Comparison of Stimulus Values	137
Theory: How are Stimulus Values Computed?	142
Evidence for a Causal Role of the Stimulus Value Signals in vmPFC	144
Conclusions	145
Acknowledgments	146
References	146

9. Valuation for Risky and Uncertain Choices 149

PHILIPPE N. TOBLER AND ELKE U. WEBER

Introduction	149
Decisions Under Uncertainty and Risk	150
Models of Risky Choice	151
Neural Representation of Uncertainty and Risk	158
Conclusions	168
Acknowledgments	169
References	169

Valuation, Intertemporal Choice, and Self-Control 173

JOSEPH W. KABLE

Introduction	173
Valuation in Intertemporal Choice	173
Self-Control	182
Conclusion	189
References	189

11. Social Preferences and the Brain 193

ERNST FEHR AND IAN KRAJBICH

Behaviors and Motives	196
Exploring the Neural Circuitry of Social Preferences: Methodological Concerns	198
The Neurobiology of Simple Choice	201
Evidence for the Similarity Between Social Preference Decisions and Simple Reward-Based Decisions	201
Components of the Social Preferences Network	207
Conclusions	214
References	215

12. Neuroeconomics of Emotion and Decision Making 219

KAROLINA M. LEMPERT AND ELIZABETH A. PHELPS

Introduction: Heart or Head?	219
Studying Emotion	220
Incidental Affect: <i>Carry-Over Effects</i> on Decision Making	221
Emotion's Impact on Valuation During Choice	225
Changing Emotions, Changing Choices	228
General Conclusion: Beyond Two Systems	233
References	233

13. Multistage Valuation Signals and Common Neural Currencies 237

MICHAEL L. PLATT AND HILKE PLASSMANN

Introduction to Value-Based Decision Making	237
Stage 1: Valuation of Options – Predicted Valuation Signals	238
Stage 2: Choice–Action Valuation Signals	247
Stage 3: Outcome – Experienced Valuation Signals	252
Conclusion: Multistage Neuro-Cognitive Models of Choice	253
References	254

14. Pharmacology of Economic and Social Decision Making 259

MOLLY J. CROCKETT AND ERNST FEHR

Introduction to Psychopharmacology	259
Pharmacology of Time Preferences	262
Pharmacology of Risk Preferences	266
Pharmacology of Social Preferences	269
Conclusion	276
References	276

LEARNING AND VALUATION

15. Value Learning through Reinforcement: The Basics of Dopamine and Reinforcement Learning 283

NATHANIEL D. DAW AND PHILIPPE N. TOBLER

- Introduction 283
- Learning: Prediction and Prediction Errors 283
- Functional Anatomy of Dopamine and Striatum 285
- Responses of Dopamine Neurons to Outcomes 287
- Sequential Predictions: From Rescorla–Wagner to Temporal
Difference Learning 289
- Temporal Difference Learning and the Dopamine
Response 293
- From Error-Driven Learning to Choice 294
- Conclusions 296
- References 296

16. Advanced Reinforcement Learning 299

NATHANIEL D. DAW

- Introduction 299
- The RL Formalism 300
- Learning 301
- Rewards and Punishments 306
- States, Stimuli, and Perceptual Uncertainty 308
- Actions 313
- Conclusion 317
- References 317

17. The Basal Ganglia, Reinforcement Learning, and the Encoding of Value 321

KENJI DOYA AND MINORU KIMURA

- Introduction 321
- Value-Based and Procedure-Based Strategies 321
- Encoding of Values and Strategies by Striatal Neurons 323
- The Role of the Putamen in History-Based Action
Selection 326
- Encoding of Long-Term Values and Multistep Reward
Prediction Errors by Midbrain Dopamine Neurons 327
- Decision to Wait and the Activity of Dorsal Raphe
Serotonin Neurons 328
- Conclusion 331
- References 331

18. From Experienced Utility to Decision Utility 335

KENT C. BERRIDGE AND JOHN P. O'DOHERTY

- Introduction 335
- Experienced Utility 335
- Experienced Utility: Neuroimaging Brain Activations in
Humans 337

- Beyond Experienced Utility 339
- Identifying What Does What for Brain Mechanisms of
Outcome Utilities 340
- Berridge's Critique of the Dopamine Reward-Learning
Hypothesis 345
- O'Doherty's Response to the Critique of the
Reward-Learning Hypothesis 346
- Integration Between the Two Viewpoints? 346
- Conclusion 347
- Acknowledgment 348
- References 348

IV

THE NEURAL MECHANISMS FOR CHOICE

19. Neural Mechanisms for Perceptual Decision Making 355

JOSHUA I. GOLD AND HAUKE R. HEIKEREN

- Introduction 355
- Signal Detection Theory and Sensory Representation 358
- Sequential Sampling Models and the Decision Process 361
- Perceptual Decision Making in Humans 365
- Summary and Conclusions 370
- References 370

20. Value-Based Decision Making 373

PAUL W. GLIMCHER

- Introduction 373
- The Twin Threads of Decision Neuroscience 374
- An Overview of the Standard Model for Value-Based
Decision Making 375
- Understanding the Choice Circuit 381
- Understanding the Valuation Circuit 385
- Relating the Standard Model To Economic
Theory: RUMs 389
- Putting it All Together: Relating the Standard Model
to Perceptual Decision 389
- References 390

Multiple Systems for Value Learning 393

NATHANIEL D. DAW AND JOHN P. O'DOHERTY

- Introduction 393
- Multiple Systems for Learning and Controlling
Behavior 394
- Computational Foundations of Multiple Learning
Systems 398
- Multiple Neural Systems for Value Learning 401
- What is the Nature of the Interactions Between the Different
Systems? 405
- Conclusions: Alternative Systems, More Systems 406
- References 408

22. Integrating Benefits and Costs in Decision Making 411

JONATHAN D. WALLIS AND MATTHEW R.S. RUSHWORTH

Introduction to Behavioral Ecological Approaches to Decision Making 411

Anatomy of Cost-Based Decision Making 412

Linking Stimuli and Actions to Rewards and Making Decisions 416

Anterior Cingulate Cortex and Effort-Based Decision Making 417

Contrasting Roles of Different Frontal Cortex Areas in Different Types of Cost-Based Decision Making 419

A Distributed Network for Making Cost-Benefit Decisions 421

Choice Representations in Anterior Cingulate Cortex are Invariantly Tied to a Reference Frame Suitable for Foraging 423

Neuropharmacology of Cost-Based Choice 428

Conclusions 429

References 429

23. Neuronal Circuit Computation of Choice 435

XIAO-JING WANG

Introduction 435

Models of Decision Making 435

Adaptive Value-Based Choice 441

Conclusion 450

Acknowledgments 451

References 451

24. The Neurobiology of Context-Dependent Valuation and Choice 455

KENWAY LOUIE AND BENEDETTO DE MARTINO

Introduction 455

Behavioral Context Effects in Choice 456

The Neurobiology of Context-Dependence in Decision-Related Systems 462

Electrophysiological Studies of Context-Dependence 466

Neuroimaging Studies of Context-Dependence in Decision Making 470

Bridging Context-Dependent Coding and Decision-Making Behavior 472

Conclusions 473

References 474

Components of Behavioral Game Theory 479

Neural Evidence 482

Conclusions and Future Research 490

References 491

25. Brain Circuitry for Social Decision Making in Non-Human Primates 493

DAEYEOL LEE AND MICHAEL C. DORRIS

Introduction 493

Game Theory 494

Primate Visuo-Saccadic Circuitry as a Model System for Studying the Neural Basis of Social Decision Making 496

Reinforcement Learning 499

Cortical Mechanisms of Reinforcement Learning During Iterative Games 503

Response Selection by the Frontal Eye Fields and Superior Colliculus 506

Conclusions 509

Acknowledgments 510

References 510

27. Understanding Others: Brain Mechanisms of Theory of Mind and Empathy 513

TANIA SINGER AND ANITA TUSCHKE

Introduction 513

Defining Concepts 516

The Study of Theory of Mind 517

The Study of Empathy and Feelings 519

Social Emotions: Emotional Contagion, Compassion, Envy, and Schadenfreude 525

Future Research Directions 526

References 528

Appendix: Prospect Theory and the Brain 533

CRAIG R. FOX AND RUSSELL A. POLDRACK

Introduction to Prospect Theory 533

Prospect Theory Measurement 544

Neuroscientific Data 557

Conclusions and Future Directions 561

References 563

Index 569

V

BRAIN CIRCUITRY OF SOCIAL VALUATION AND SOCIAL CHOICE

25. The Neural Basis of Strategic Choice 479

COLIN F. CAMERER AND TODD A. HARE
