<i>An introductory glossary</i>	<i>xviii</i>
Andre Viljoen and Katrin Bohn	
Part One Carrot and City: The Concept of CPULs	1
1 New space for old space: An urban vision	3
<i>Katrin Bohn and Andre Viljoen</i>	
Continuous Productive Urban Landscapes: London in 2045	4
Ecological Intensification	7
London in 2045: Postscript	8
2 More space with less space: An urban design strategy	10
<i>Katrin Bohn and Andre Viljoen</i>	
What are CPULs?	11
Why CPULs?	12
Where will CPULs be?	15
Part Two Planning for CPULs: Urban Agriculture	17
3 More food with less space: Why bother?	19
<i>Andre Viljoen, Katrin Bohn and Joe Howe</i>	
Food and urban design	21
Why urban food?	21
The environmental case for urban agriculture	22
Organic urban agriculture	25
Seasonal consumption	26
Local growing and trading of crops	29
4 Urban agriculture and sustainable urban development	32
<i>Herbert Girardet</i>	
Taking stock	33
Energy and land-use	33
Nutrient flows	34
Relearning Urban Agriculture	35
Cities as sustainable systems	38
5 Food Miles	40
<i>Angela Paxton</i>	
Introduction	41
The food miles food chain	41
Implications of the food miles chain	44
Forces behind the food miles	45
Solutions	46
6 Sandwell: A rich country and food for the poor	48
<i>Andre Viljoen</i>	
7 Plant it: An inclusive approach to environmentally sustainable planning	52
<i>Dr Susannah Hagan</i>	

8	New cities with more lite: Benefits and obstacles	56
	<i>Joe Howe, Andre Viljoen and Katrin Bohn</i>	
	Socio-cultural benefits	57
	Economic benefits	57
	Health benefits	59
	Obstacles to urban agriculture	60
9	The economics of urban and peri-urban agriculture	65
	<i>James Petts</i>	
	Introduction	66
	Micro-economic aspects	68
	Motives for UPA	68
	Supply	69
	Market entry, demand, and prices	71
	Macro-economic aspects	72
	Policy conclusions	73
10	Changing consumer behaviour: The role of farmers' markets	78
	<i>Nina Planck</i>	
11	The social role of community farms and gardens in the city	82
	<i>Jeremy lies</i>	
	What is a community garden or a city farm?	83
	The benefits of a community garden or city farm project	83
	Policy on food production and sustainability	85
	Encouraging an existing or new project	86
	A vision for the future	87
	The Federation of City Farms and Community Gardens	87
	Notes	88
12	Recycling systems at the urban scale	89
	<i>Dr Margi Lennartsson</i>	
Part Three Planning for CPULs: Open Urban Space		93
13	Food in time: The history of English open urban space as a European example	95
	<i>Joe Howe, Katrin Bohn and Andre Viljoen</i>	
	Where we live is where we grow	97
	Industrial revolution and suburban Utopias: the divorce of cities and food production	98
	Urban food and conflict	101
	Urban rebuilding and urban food decline	104
	Revival and diversification of urban food growing	105
	Urban agriculture and sustainability	106
14	Food in space: CPULs amongst contemporary open urban space	108
	<i>Katrin Bohn and Andre Viljoen</i>	
	CPULs for European cities	109
	The Open Urban Space Atlas	109
15	Designs on the plot: The future for allotments in urban landscapes	124
	<i>Professor David Crouch and Richard Wiltshire</i>	
	Allotments as (open) green space	125
	Allotments as urban landscape	127
	Allotments as negotiated communities	129
	The plot for designers	130
Part Four Planning for CPULs: International Experience		133
16	Urban agriculture in Havana: Opportunities for the future	135
	<i>Jorge Pena Diaz and Professor Phil Harris</i>	
	The challenge	136
	People's and government's response	137

Rural agriculture and urban horticulture in Cuba	138
Urban and peri-urban agriculture in Havana	140
Havana: antecedents and current development	140
The experience of the 1990s	142
Conclusions	143
References	145
17 Cuba: Laboratory for urban agriculture	146
<i>Andre Viljoen and Joe Howe</i>	
The spatial characteristics of Cuban urban agriculture	147
Urban agriculture at the city scale	149
The urban agriculture site	153
Infrastructure and urban agriculture	188
Urban agriculture in residential areas	189
Organic urban agriculture	190
18 Urban and peri-urban agriculture in East and Southern Africa: Economic, planning and social dimensions	192
<i>Dr Beacon Mbiba</i>	
Research Patterns since the 1970s: regional and subject focus	193
Summary of the context of urban and peri-urban agriculture in africa in critical research areas	195
Actors and institutions	197
Conclusion	198
19 Moulsecoomb: Discovering a Micro-PUL	200
<i>Andre Viljoen and Katrin Bohn</i>	
20 Allotments, plots and crops in Britain	206
<i>H.F. Cook, H.C. Lee and A. Perez-Vazquez</i>	
The organisation of allotments	207
Practical production issues	210
The economic implications of UPA	214
Conclusions	215
21 Urban food growing: New landscapes, new thinking	217
<i>Simon Michaels</i>	
Food growing in urban areas	218
The landscape character of urban food growing projects	218
Conclusion	220
22 Permaculture and productive urban landscapes	221
<i>Graeme Sherriff</i>	
Permaculture	222
23 Utilitarian dreams: Examples from other countries	229
<i>Andre Viljoen</i>	
Delft, The Netherlands	230
Kathmandu Valley, Nepal	230
Gaborone, Botswana	231
Another model	233
Part Five Carrot and City: Practical Visioning	237
24 New space for old cities: Vision for landscape	239
<i>Katrin Bohn and Andre Viljoen</i>	
Size	240
Sense of openness	242
Local interactions	244
Urban nature	245
Persistent visual stimulation	249
