MANUAL

of Multi-Storey Timber Construction

Contents

	7
Foreword	
Part A Introduction	
1 The development of multi-storey timber construction	10
2 Wood as a resource	14
3 Solid wood and wood-based products	18
4 Life-cycle assessment	24
5 Interior air quality – the influence of timber construction	30
Part B Support structures	
1 Structures and support structures	38
2 Structural components and elements	50
Part C Construction	
1 Protective functions	72
2 Thermal insulation for summer	88
3 The layer structure of building envelopes	92
4 The layer structure of interior structural components	114
5 Building technology – some special features of timber construction	122
Part D Process	
1 Planning	130
2 Production	138
3 Prefabrication	142
4 Solutions for modernising buildings	150
Part E Examples of buildings in detail	
Joints in detail	160
Project examples 1–22	166
Appendix	
Authors	258
Glossary	260
DIN standards	264
Literature	266
Image credits	268
Index	270
Supporters / Sponsors	272
