The St. Gallen Management Model

English translation of the fourth generation of the German text

Preface to the English translation (2015)	1
Overview	5
How to best make use of the text	7
The resolution levels of the St. Gallen Management Model	10
0. The St Gallen Management Model – effectively articulating the concept of management	24
0.1 Management – opening a controversial black box	26
0.2 Understanding management as reflexive design praxis	27
0.3 Highlighting value creation as the design focus of management	30
<i>A look into praxis</i>	
Organizational value creation as the design focus of management	34
0.4 Modeling management in words and images	40
0.5 Reflexivity about management by zooming-in and zooming-out	45
0.6 Locating the St. Gallen Management Model in research	46
0.7 Conceptualizing the St. Gallen Management Model from a communication-centered perspective	48
0.8 Understanding management as communicative praxis	53

1.	Environment as a landscape of possibilities	56
1.0	Developing environment as a landscape of possibilities	60
1.0.1	Defining the existence-relevant space of opportunities	60
1.0.2	Enacting an organization-specific configuration of resources	61
1.0.3	Addressing the expectations of relevant actors	64
1.0.4	Communicatively developing the landscape of possibilities and configuration of resources	66
	<i>A look into praxis</i>	
	Understanding the interaction of environmental spheres, controversies, and stakeholders	68
1.1	Understanding environmental spheres	80
1.1.0	Environmental spheres are constituted as discourses	80
1.1.1	Environmental spheres are based on a focus	82
1.1.2	Environmental spheres are developed in procedures	83
1.1.3	Environmental spheres impose evaluation criteria	84
1.2	Dealing with controversies	88
1.2.0	Controversies question what is taken for granted	88
1.2.1	Controversies are sparked by issues	89
1.2.2	Controversies are formed around positions	90
1.2.3	Controversies are enacted in the media	91
1.3	Encountering stakeholders	95
1.3.0	Addressing stakeholders as relevant actors in the environment	95
1.3.1	Stakeholders have impact through relationships	97
1.3.2	Stakeholders condense expectations in the environment	99
1.3.3	Stakeholders care for the representation of positions	102

2.	Organization as a value-creation system	106
2.0	Stabilizing the organization as a value-creation system	110
2.0.1	Organizational value creation is a process and a result	110
2.0.2	Organizational value creation is based on collaborative specialization	114
2.0.3	Organizations are constituted as systems	116
2.0.4	Organizations structure themselves	121
2.0.5	Organizations construct themselves through communication	123
	<i>A look into praxis</i>	
	Structuring and dynamic development of organizational value creation	126
2.1	Developing organizational value-creation processes	134
2.1.0	Value creation requires dynamic development	134
2.1.1	Specialization requires differentiation	136
2.1.2	Processes integrate collaborative value creation	139
2.1.3	Dynamic stabilization is implemented in processes of opening and closing	142
2.2	Developing certainties through viable decision-making praxis	148
2.2.0	Decisions embody communicative achievements	148
2.2.1	Decision-making imperatives need to be addressed systematically	149
2.2.2	Efficient decision-making praxis requires routinized forms of processing	153
2.2.3	Effective decision-making praxis requires decision-making capacity	155
2.3	Mediating a collective orientation through a frame of reference	160
2.3.0	Coherent decision-making requires a clear view of values	160
2.3.1	The normative perspective clarifies identity and accountability	162
2.3.2	The strategic perspective provides orientation for safeguarding the future	165
2.3.3	The operational perspective coordinates everyday praxis	168

3.	Management as reflexive design praxis	172
3.0	Understanding management as reflexive design praxis	176
3.0.1	Reflexive design praxis is communication praxis	176
3.0.2	Reflexivity about organizational value creation and further development	178
3.0.3	Mobilizing management practices to deal with uncertainty	180
3.0.4	Shared anchoring in diverse communities of practice	182
	<i>A look into praxis</i>	
	Strategy work and management architecture	185
3.1	Management praxis	195
3.1.0	Management is realized in reflexive design	195
3.1.1	Management facilitates reflexivity	20Q
3.1.2	Management creates opportunities	202
3.1.3	Management endorses scalability	203
3.2	Corporate governance	210
3.2.0	Corporate governance shapes relationships with the environment	210
3.2.1	Defining system boundaries	212
3.2.2	Institutionalizing executive management	215
3.2.3	Structuring management architecture	217
3.3	Executive management	222
3.3.0	Executive management acts with a view to an organization as a whole	222
3.3.1	Defining ideas of success	223
3.3.2	Specifying management praxis	227
3.3.3	Stabilizing change processes	229

4.	Management innovation – reflecting on and shaping the future of management	236
4.1	Management innovation is controversial and necessary	238
4.2	Management innovation utilizes innovation resources	241
4.3	Management innovation requires partnerships of reflexivity and innovation	245
4.4	The St. Gallen Management Model is a language of reflexivity for management innovation	249
4.5	The St. Gallen Management Model itself is repeatedly subject to innovation	251
