Timber Construction

Third edition

BIRKHAUSER
BASEL

Contents

FOREWORD _7

INTRODUCTION _8

BUILDING MATERIAL _9

Wood _9

Growth _9

Timber moisture _11

Types of cut _13

Properties _ 14

Loadbearing capacity _16

Timber construction products _18

Solid wood _18

Timber-based products _21

Structural board _24

Timber protection _25

Choice of wood _25

Structural timber protection _26

Chemical timber protection _26

CONSTRUCTION _29

Structural stability _29

Loadbearing system _29

Reinforcement _29

Timber construction systems _31

Log construction _32

Traditional timbered structures _36

Timber frame construction _38

Skeleton construction _44

Timber panel construction _47

Solid panel construction _49

COMPONENTS _56

Foundations _56

Slab foundations _56

Strip foundations _57

Individual footings _58

Base _58

External wall _61

Layered structure _61

Building science _61

External cladding _64

Surface treatment _72

Internal cladding and service installation

Apertures _75

Internal wall _77

Structure _77

Fixing _78

Ceilings _80

Joisted ceilings _80

Structure _80

Joists _82

Seating _83

Solid ceilings _86

Roofs _89

Pitched roofs _89

Flat roofs _95

IN CONCLUSION _99

APPENDIX _100

Standards _100

Literature _101

Picture credits _101
