

Cost-Benefit Analysis

Sixth edition

E.J. Mishan and Euston Quah

Routledge
Taylor & Francis Group

LONDON AND NEW YORK

Contents

<i>Preface to the sixth edition</i>	xiii
<i>Acknowledgements</i>	xv

PART I	
Scope and method	1
1 Brief historical background to cost-benefit analysis	3
2 What is cost-benefit analysis?	7
3 Framework to cost-benefit analysis	11
PART II	
Basic concepts of benefits and costs	15
4 Measurements of consumer surplus	17
5 Consumer surplus when several prices change	25
6 Consumer surplus when other things change	31
7 Introduction to the compensating variation	36
8 Measurements of rent	39
9 Is producer surplus a rent?	45
PART III	
Shadow prices and transfer payments	49
10 Introductory remarks	51
11 Opportunity cost of labour	53
12 Opportunity cost of unemployed labour	57
13 The additional benefits of using unemployed labour	60

x *Contents*

- 14 The opportunity costs of imports
- 15 Transfer payments and double counting

PART IV

External effects

- 16 Introduction to external effects
- 17 Adverse spillovers
- 18 Internalizing externalities
- 19 Evaluating spillovers
- 20 Compensating for environmental damage

PART V

Investment criteria

- 21 Introduction to investment criteria
- 22 Crude investment criteria
- 23 The discounted present value criterion
- 24 The internal rate of return
- 25 The alleged superiority of the discounted present value criterion compared with the internal rate of return criterion and the net benefit ratio
- 26 Investment criteria in an ideal capital market
- 27 Calculation of rates of return and of time preference
- 28 Critique of the discounted present value criterion (I)
- 29 Critique of the discounted present value criterion (II)
- 30 The normalized compounded terminal value criterion (I)
- 31 The normalized compounded terminal value criterion (II)
- 32 The Pareto criterion and generational time
- 33 Cost-benefit analysis, weights and normative economics

PART VI

Uncertainty

- 34 Risk and certainty equivalence
- 35 Decision rules and heuristics (I)

36	Decision rules and heuristics (II)	178
37	How practical are decision rules and heuristics?	184
38	Simple probability in decision making	187
39	Mixed strategies in decision making	189
40	Four additional strategems for coping with uncertainty	193
PART VII		
Topics frequently encountered in cost-benefit analysis		201
41	Valuation issues and methods	203
42	Benefit transfers	213
43	Pair-wise comparison	222
44	Cost-benefit analysis and behavioural economics	228
45	Cost-benefit analysis in developing countries	241
46	The value of time	248
47	Measuring the benefits of recreational areas	251
48	Travel cost method	256
49	Cost-benefit analysis and public health	260
50	The value of statistical life	264
51	Estimating the economic cost of air pollution on health	273
52	Economic cost of diseases	287
53	Cost-benefit analysis and the problem of locating environmentally noxious facilities (NIMBYs): an informal discussion	297
PART VIII		
Further notes and advanced materials		309
54	Cost-benefit analysis and the economist	311
	<i>Appendix 1: Cost-effectiveness analysis</i>	317
	<i>Appendix 2: The alleged contradiction of the Kaldor-Hicks criterion</i>	320
	<i>Appendix 3: The problem of second-best</i>	323
	<i>Appendix 4: Origins of the Hicksian measures of consumer surplus</i>	327
	<i>Appendix 5: Marginal curve measures of consumer surplus</i>	332
	<i>Appendix 6: The concept and measure of rent</i>	338
	<i>Appendix 7: Marginal curve measures of rent</i>	343

xii *Contents*

<i>Appendix 8: The limited applicability of property rights</i>	347
<i>Appendix 9: Deadweight loss or love's labour lost</i>	349
<i>Appendix 10: The value of human life</i>	352
<i>Appendix 11: The rate of time preference</i>	354
<i>Appendix 12: Selecting a set of investment projects for given political objectives</i>	357
<i>Appendix 13: Why cost-benefit analysis is useful for regulatory reform</i>	361
<i>Appendix 14: Valuing household production</i>	365
<i>Bibliography and further reading</i>	368
<i>Index</i>	382
