

PAT BAZELEY

A Practical Introduction to

MIXED METHODS

for Business & Management

 SAGE

Los Angeles | London | New Delhi
Singapore | Washington DC | Melbourne

CONTENTS

<i>List of Figures</i>	viii
<i>Acknowledgements</i>	ix
1 Foundations	1
Mixed methods exemplified in classic and recent studies	1
Introduction	3
What is mixed methods research?	4
Mixed methods research as a third methodological movement	5
Mixed methods in business and management research	7
<i>Uses and benefits of mixed methods</i>	8
Taking stock: What have we learned so far?	16
Going further: philosophical foundations and debates	17
<i>Ontological and epistemological perspectives</i>	17
<i>Paradigms, methodology, and methods</i>	19
Chapter summary	22
Questions for review and discussion	22
Writing about foundations	23
2 Developing a mixed methods study	24
Trip hazards in designing research	24
Maxwell's interactive design framework	25
<i>Integration in mixed methods research</i>	27
Research purposes: deciding on a focus and reason for research	29
Developing a conceptual framework	31
Developing and operationalising research questions	34
<i>Operationalising concepts to clarify what information is needed</i>	36
<i>Do the questions invite the use of mixed methods?</i>	37
Other matters to consider in planning a study	38
<i>Ethical concerns in business and management research</i>	38
<i>Skills and teamwork</i>	40

Chapter summary	41
Questions for review and discussion	41
Writing about the background to, and questions for, a mixed methods study	42
3 Designing and conducting a mixed methods study	43
Trip hazards in designing and conducting research	44
Making methods choices	45
Data types and sources for a mixed methods project	45
<i>Data options – which will answer your questions?</i>	48
Selecting a sample	54
<i>Sample designs for mixed methods studies</i>	55
Putting the pieces together into a coherent design framework	57
<i>Dimensions in the design of mixed methods studies</i>	58
<i>Design typologies</i>	59
<i>Visualising design</i>	62
Keeping a research diary	65
Gathering mixed methods data	67
<i>Sensitivity to discrepancies in data</i>	67
<i>Applying ethical considerations in recruitment</i>	68
<i>Managing data</i>	68
Chapter summary	69
Questions for review and discussion	69
Writing about design and methods (methodology)	70
4 Analysing mixed methods data	71
Integrative analysis strategies	72
<i>Preparing data sources</i>	72
<i>Use a notebook or word processor to aid complementary analysis</i>	73
<i>Juxtapose information in a joint display to compare and contrast</i>	75
<i>Extend the value of a spreadsheet for comparative analysis</i>	77
<i>Transforming qualitative coding into counts or variables</i>	79
<i>Integrating sequentially gathered and/or hybrid data sources</i>	80
<i>When integration doesn't work – what to do when there's conflict</i>	82
Going deeper, with analysis software	83
<i>Is using software worth the investment?</i>	86
Going further: developing theory	87
Chapter summary	90
Questions for review and discussion	91
Writing about analysis	91

5 Bringing it all together	92
Trip hazards in writing research	92
Reaching conclusions	93
Reporting the results of a mixed methods study	95
What makes for quality in a mixed methods study?	96
<i>Quality of planning</i>	97
<i>Quality of implementation</i>	97
<i>Quality of inferences</i>	98
<i>Quality of reporting</i>	98
The validity question	99
Generalisation/transferability of conclusions	100
Strengths and limitations of mixed methods research	101
How 'exemplary' researchers worked	102
A final note: Support for students (and others) doing mixed methods research	103
Chapter Summary	104
Questions for review and discussion	104
<i>Glossary</i>	105
<i>References</i>	111
<i>Index</i>	121
