About the Author xv

Part 1: Understanding What Surveys Are and How They Are Used 1

1. What Is a Survey? 3
2. How Are Surveys Used? 4
3. What Are the Benefits of Doing a Survey? 5
4. What Is the Survey Research Process From Beginning to End? 6
5. How Are Good Empirical Research Questions Developed? 7
6. What Are the Various Types of Survey Design? 8
7. How Do We Choose the Right Survey Design? 10

Part 2: Addressing Ethical Concerns in Survey Research 11

8. What Are the Main Ethical Concerns of Research? 13
9. If Surveys Are Just About Asking People Questions, Why Are Ethical Considerations Important? 14
10. Who Ensures That Research Is Ethical? 15
11. How Do IRBs Monitor Research Ethics? 16
12. What Is the Process of Submitting a Survey Study to the IRB? 17
13. What Is Informed Consent? 18
14. What Are Confidentiality and Anonymity, and How Are They Maintained? 19
15. What Are the Ethical Concerns for Collecting and Analyzing Data? 20

Part 3: Selecting A Sample **21**

16. Who Is Asked to Take the Survey? 23
17. What Is a Sample, and What Is Sampling? 24
18. What Is a Sampling Frame? 25
19. How Do We Know if the Sample Size Is Large Enough? 26
20. How Does Probability Work? 28
21. What Is Sampling Theory? 29
22. What Is the Central Limit Theorem? 31
23. What Is Random Sampling Error? 32
24. What Are the Types of Probability Samples? 33
25. How Is a Simple Random Sample Collected? 34
26. What Is Stratified Random Sampling? 35
27. How Is a Proportionate Stratified Probability Sample Collected? 36
28. How Is a Disproportionate Stratified Probability Sample Collected? 37
29. How Do We Make Disproportionate Stratified Samples Representative of the Population? 39
39. How Is a Cluster Sample Collected? 41
31. How Do We Select a Sample if the Population Is Not Easy to Find? 42
32. What Is a Response Rate? 43

Part 4: Writing Good Survey Questions **45**

33. What Is Involved in Writing Good Survey Questions? 47
34. How Do We Connect a Theoretical Concept to a Survey Question? 48
35. How Do We Write Survey Questions for Complex Theoretical Concepts? 49
36. Do We Need to Create New Questions, or Can We Use Existing Questions? 50

37. What Are the Basic Rules to Writing Good Survey Questions? 51

38. Are There More Advanced Rules to Writing Survey Questions? 52

39. What Are the Best Response Options to Use With Survey Questions? 53

40. What Is the Measurement Level of a Survey Question, and Why Is That Important? 54

41. When Are Open-Ended Questions Used in Survey Research? 55

42. How Do We Order the Survey Questions? 56

Part 5: Establishing the Reliability and Validity of Survey Questions 57

43. How Do We Ensure Our Survey Questions Measure What They Are Supposed To? 59

44. How Is Content Validity Established? 60

45. What Is Criterion Validity? 61

46. What Is Construct Validity? 62

47. What Is Measurement Reliability, and How Is It Established? 63

48. What Is Measurement Error? 64

49. How Can Measurement Error Be Minimized? 65

50. How Can Pretesting and Pilot Testing Improve Reliability and Validity? 66

Part 6: Conducting the Survey 67

51. Once the Survey Is Designed, How Is the Survey Conducted? 69

52. How Often Can We Contact the Sample to Get Them to Participate? 71

53. How Are the Potential Members of the Sample Contacted? 72

54. How Are the Sample Members Persuaded to Participate? 73

55. What Should Be Included in a Cover Letter? 74
56. What Other Strategies Can Increase Survey Participation? 75
57. How Do We Keep Track of Who Has and Has Not Participated? 76
58. How Do We Conduct a Longitudinal Study? 77
59. What Other Survey Administration Issues May Arise? 78
60. How Do We Take Care of Survey Participants? 79

Part 7: Entering and Cleaning the Data 81

61. Do We Need to Plan Ahead for Data Entry, Cleaning, and Analysis? 83
62. My Data Is Collected. Now What Do I Do? 84
63. How Do We Do Data Entry? 85
64. What Issues Might Arise With Data Entry? 86
65. What Types of Survey Questions Are Difficult to Enter Into the Database? 87
66. What Is a Codebook, and Why Is It Important? 88
67. What Other Sorts of Documentation Are Needed, and Why? 89
68. What Is Data Cleaning? 90
69. How Are "Other Specify" Responses Coded? 92
70. How Are Open-Ended Questions Coded? 94

Part 8: Exploring the Data With Univariate Statistical Analysis 95

71. What Are the Goals of Data Analysis? 97
72. What Are Variables? 98
73. What Are Descriptive Statistics? 99
74. How Do We Estimate Central Tendency and Variation in Categorical and Ordinal Variables? 101

75. How Do We Examine Central Tendency in Continuous Variables? 103
76. How Do We Examine Variation in Continuous Variables When Using the Median? 105
77. How Do We Examine Variation in Continuous Variables When Using the Mean? 107
78. What Are Inferential Statistics? 109
79. How Do We Infer the Population Parameter? 110
80. What Is Significance Testing? ▮▮▮

Part 9: Assessing Associations With Bivariate Statistical Tests and Regression 113

81. What Is Meant by Association Between Variables? 115
82. How Do We Assess an Association Between Two Continuous Variables? 117
83. How Do We Determine if a Correlation Between Two Continuous Variables Is Statistically Significant? 118
84. How Do We Assess Association Between a Categorical and a Continuous Variable? 120
85. How Do We Assess Association Between Two Categorical Variables? 122
86. How Do We Display and Report These Bivariate Statistics? 124
87. What Is Linear Regression, and What Are Its Benefits? 125
88. What Is OLS Regression With a Continuous Independent Variable? 126
89. How Do We Know if the Regression Coefficients Are Statistically Significant? 128
90. How Do We Interpret OLS Regression With a Categorical Independent Variable? 129
91. How Do We Interpret Linear Regression With More Than One Predictor Variable? 131

92. How Do We Display and Report These Regression Statistics? **133**

Part 10: Writing Up the Analyses in Report Form **135**

93. Who Is My Audience, and Why Does It Matter? 137
94. What Is a Good Report Outline? 138
95. How Much of the Methodology Needs to Be Included in the Report? 140
96. What Are the Most Important Parts of the Analyses to Include in the Report? 141
97. How Do We Report on the Sample of Respondents? 142
98. How Many Charts and Tables Should We Include in the Report? 144
99. How Do We Describe Charts and Tables in the Report? 145
100. What Is an Executive Summary, and Why Is It Important? 146
