Building with Infra-Lightweight Concrete

Design | Detailing | Construction

Birkhauser

Basel

Contents

Acknowledgments	5
1 Introduction	11
2 Theoretical Background	13
2.1 Definition and Classification of Infra-Lightweight Concrete	14
2.2 The Development of Lightweight and Infra-Lightweight Concrete	14
2.3 Conceptual Design Potential of the Material	19
3 Material Technology	25
3.1 Composition and Bulk Density Classes	26
3.2 Properties	27
4 Building Typologies	31
4.1 Example Design of a Building	33
4.2 Infill Building	38
4.3 Linear Buildings	43
4.4 Single-Family House	45
4.5 High-Rise Building	49
5 Key Building Construction Details	55
5.1 Wall Construction Details	58
5.2 Floor Slab Connections	60
5.3 Balconies and Cantilevers	64
5.4 Window Connections	68
5.5 Foundations	78
5.6 Detail of Joint between Parapet and Flat Roof	86

6	Fundamentals of Design	91
6.1	Table of Parameters for Initial Design Considerations	92
6.2	Infra-Lightweight Concrete in the Context of the Energy Conservation Directive (EnEV)	94
6.3	Building Physics Properties	95
6.4	Dynamic Simulation-Based Investigations	104
6.5	Eco-Balance	110
6.6	Costs	112
6.7	Legal Background	113
7	Calculation Procedures for Structural Design	117
7.1	Structural Design Principles	118
7.2	Durability	120
7.3	Ductile Building Component Behavior	122
7.4	Base Values for Structural Design	123
7.5	Structural Design for the Ultimate Limit State	126
7.6	Structural Design for the Serviceability Limit State	133
7.7	Special Considerations for the Design of Components with GRP Reinforcement	141
7.8	Bonding Behavior and Concrete Cover	142

8	Practical Construction Aspects	145
8.1	Suitable Formwork	146
8.2	Surface Design	146
8.3	Production and Building with ILC	154
8.4	Stripping Times and After-Treatment	155
8.5	Surface Protection – Water-Repellent Coating	156
8.6	Concrete Cosmetics and After-Treatment	156
9	Selected Buildings	161
9.1	Single-Family House in Infra-Lightweight Concrete, Berlin	162
9.2	Betonoase, Berlin	164
9.3	Single-Family House, Aiterbach	166
9.4	Small House I, Kaiserslautern Technical University	168
10	Appendix	171
10.1	Calculation of Design Values – Examples	173
10.2	co-tables with Design Values	182
10.3	Editors and Authors	202
10.4	Literature	203
10.5	Index of Figures	209
10.6	Index of Tables	212
10.7	Index of Keywords	213
