<i>Your Guide to Using this Book</i>	xiv
1 Introduction	1
Research in the business world	3
The nature of theories	5
An overview of the research process	6
The organization of the book	6
How to use this book	9
Part A Principles and Planning for Research	17
2 Theoretical Perspectives and Research Methodologies in Business	19
Inductive and deductive reasoning	20
Epistemological and ontological perspectives	22
Theoretical perspectives	24
Research methodologies	31
Selecting research approaches and strategies	37
3 Selecting and Planning Business Research Proposals and Projects	45
Selecting a research topic	46
Topics to avoid	54
Planning the project	56
Writing academic proposals	57
Writing organizational proposals	68
The final stages for academic and organizational proposals	70
4 Business Research Ethics	77
What do we mean by ethics?	78
The growth of ethical codes of practice	79
The focus of ethics	83
Ethical principles	83
Putting ethics into practice	90
Perspectives on research ethics	93
Ethics and the Internet	95
Researching ethically in your own organization	98

Ethics and research reports	98
A checklist of ethical issues	99
Safety issues for researchers	100
5 Searching, Critically Reviewing and Using the Literature in Business	107
What function does the literature serve?	108
The literature search journey	109
The literature search process	110
Searching source materials	112
The process of critically evaluating sources	121
Managing information	125
Synthesizing and integrating search results	126
Structure and content of the literature review	127
Positioning the literature review	128
Referencing sources	128
Doing a critical literature review	130
Undertaking a systematic review	131
Part B Research Methodology and Design	141
6 Quantitative Research Design	143
The structure of experimental research	144
Experimental and quasi-experimental research design	152
Generalizing from samples to populations	160
Designing valid and reliable research instruments	164
7 Qualitative Research Design	175
Some criticisms of quantitative research	176
Characteristics of qualitative research	177
Paradigms and strategies for qualitative research	178
Approaches to qualitative design	183
The role of the researcher	190
Using the literature in qualitative research	191
Collecting qualitative data	192
Ethics and qualitative research	195
Ensuring rigour in qualitative research	196
8 Mixed Methods Research Design	207
Differences between quantitative and qualitative research	208
What do we mean by mixed methods research?	212
The benefits of mixed methods designs	214

Looking at mixed methods research critically	216
Types of mixed methods design	217
9 Sampling Strategies in Business	225
Probability sampling	227
Non-probability sampling	231
Mixed methods sampling	240
Sampling hard to reach populations	242
Sample size – how much is enough?	244
10 Designing Descriptive and Analytical Surveys for Business	251
What is a survey?	252
Types of survey	253
Stages in the survey process	256
Selecting a survey method	261
Conducting a staff opinion survey	267
Reducing sources of error	270
Ethics and good practice in survey design	275
11 Designing Case Studies for Business	281
When should we use case studies?	283
The case study design process	284
Types of case study design	289
Data collection sources	292
Quality in case studies: validity and reliability	294
Analysing the evidence	296
Composing case study reports	301
12 Designing Evaluations in Business	311
The focus of evaluation	313
Schools of evaluation	319
Data collection sources	324
Data collection tools	326
Quality issues in evaluation	330
Planning the evaluation report	332
Enhancing the impact of evaluation	333
The ethics of evaluation	335
13 Action Research and Change in Business	343
What is action research?	345
The action research process	347
The role of researchers and participants	354

Contents

Methods of data gathering	354
Validating action research	357
Ethics and action research projects	358
Some of the limitations of action research	360
Part C Data Collection Methods	367
14 Questionnaires	369
Why use questionnaires?	371
Designing questionnaires	371
Making use of validated scales	387
Designing Internet and Web-based questionnaires	391
Piloting questionnaires	393
Maintaining quality: validity and reliability	396
Questionnaire administration	397
15 Interviewing	405
Why use interviews?	406
Selecting interview approaches	408
Designing credible interviews	411
Interviewing skills	414
Group interviews	425
Using telephone interviews	427
Interviewing in businesses – words of caution	430
Ethical issues	430
16 Non-participant Observation	439
Approaches to observation	441
Gathering and recording observational data	443
The process of observation	454
Validity and reliability issues	457
Presenting observational data	459
Ethical issues in observational studies	459
17 Ethnography and Participant Observation	465
The origins of ethnography	467
Guidelines for fieldwork	468
Gathering data: participant observation and field notes	475
Gathering data: interviewing	477
Gathering data: digital media	478
Ethical principles in ethnography	479

The ethnographic self	481
Feminist ethnography	482
Critical ethnography	484
Sculpting the truth in ethnographic accounts	486
Recording the miracle	487
18 Focus Groups	493
The uses and benefits of focus groups	495
The limitations of focus groups	496
Organizing focus groups – an overview	497
Focus groups and research design	510
Special issues in focus group research	514
Epistemological considerations and focus groups	514
Ethical considerations and focus groups	518
19 Unobtrusive Measures	525
Identifying physical measures	526
Documents	529
New unobtrusive measures: digital archives	529
Ethical issues in using digital technology	532
20 Visual Methods	541
Empirical approaches to visual research	543
Theoretical approaches to visual research	549
Advantages of using visual data in organizational research	553
Challenges of using visual methods	553
Categories of visual organizational research	554
Types of visual media research methods	556
Visual ethics in context	560
21 Digital Research Methods	567
Why digital research methods?	569
A framework of digital research methods	569
Using social media platforms in digital business research	581
Approaches to data analysis	586
Big data and digital research methods	587
Document analysis in digital business research	588
Sampling issues in digital business research	589
Recruiting digital research participants	591
Ethics in digital business research	594
The future of digital research methods	597

22	Secondary Data Analysis	603
	Advantages and disadvantages of using secondary data	605
	Sources of secondary data	606
	Qualitative data sources	614
	Secondary data analysis	614
	Criteria for selecting a dataset	616
	A systems approach to using secondary data	618
	Secondary data methodologies	619
	Secondary data in mixed methodologies	622
	Researching company websites and social media presence	622
	Ethical considerations in secondary analysis	628
	Part D Analysis and Report Writing	635
23	Getting Started with SPSS	637
	Getting around the SPSS interface	639
	Naming and defining variables	643
	Entering and modifying data	647
	Navigating the Windows interfaces	648
	Handling missing data	650
	Recoding or transforming data	650
	Exporting into MS Word	651
	Getting help	652
24	Analysing and Presenting Quantitative Data	655
	Categorizing data	656
	Data entry, layout and quality	660
	Presenting data using descriptive statistics	663
	Analysing data using descriptive statistics	668
	The process of hypothesis testing: inferential statistics	671
	Statistical analysis: comparing variables	674
	Statistical analysis: associations between variables	682
25	Getting Started with NVivo	703
	About NVivo	704
	Using this chapter	705
	Getting around the NVivo workspace	706
	Linking to files and externals	710
	Exploring nodes and coding	712
	Exploring case classifications and attributes	715

Exploring data	718
Getting started on a project	722
Developing ideas: journals, memos, annotations and links	726
Analysing visual data	728
26 Analysing and Presenting Qualitative Data	735
Elements of qualitative data analysis	737
Analysing qualitative data	743
Other approaches to qualitative analysis	756
Quality in qualitative analysis	757
Software for qualitative data analysis	759
27 Writing up the Research in a Business Report	765
The report writing process	766
The report structure	771
Ethical and legal considerations	782
Developing a writing style and tone	784
Undertaking a review process	787
28 Preparing for Business Presentations and for Vivas	795
Preparing the presentation	796
Structuring the presentation: beginning, middle and end	798
Structuring the presentation: the density of ideas	799
Creating interest in presentations	801
Delivering the presentation	802
Team presentations	804
Preparing for and surviving vivas	806
Innovative assessment methods	812
<i>Glossary</i>	823
<i>References</i>	834
<i>Index</i>	860
