Preface 13  
Data File Index 23

## **CHAPTER 1** Describing Data: Graphical 25

- 1.1** Decision Making in an Uncertain Environment 26
  - Random and Systematic Sampling* 26
  - Sampling and Nonsampling Errors* 28
- 1.2** Classification of Variables 29
  - Categorical and Numerical Variables* 29
  - Measurement Levels* 30
- 1.3** Graphs to Describe Categorical Variables 32
  - Tables and Charts* 32
  - Cross Tables* 33
  - Pie Charts* 35
  - Pareto Diagrams* 36
- 1.4** Graphs to Describe Time-Series Data 39
- 1.5** Graphs to Describe Numerical Variables 44
  - Frequency Distributions* 44
  - Histograms and Ogives* 48
  - Shape of a Distribution* 48
  - Stem-and-Leaf Displays* 50
  - Scatter Plots* 51
- 1.6** Data Presentation Errors 55
  - Misleading Histograms* 55
  - Misleading Time-Series Plots* 57

## **CHAPTER 2** Describing Data: Numerical 63

- 2.1** Measures of Central Tendency and Location 63
  - Mean, Median, and Mode* 64
  - Shape of a Distribution* 66
  - Geometric Mean* 67
  - Percentiles and Quartiles* 68
- 2.2** Measures of Variability 72
  - Range and Interquartile Range* 73
  - Box-and-Whisker Plots* 73
  - Variance and Standard Deviation* 75
  - Coefficient of Variation* 79
  - Chebyshev's Theorem and the Empirical Rule* 79
  - z-Score* 81
- 2.3** Weighted Mean and Measures of Grouped Data 84
- 2.4** Measures of Relationships Between Variables 88
  - Case Study: Mortgage Portfolio* 95

<b>CHAPTER 3</b>	<b>Probability</b>	<b>97</b>
3.1	Random Experiment, Outcomes, and Events	98
3.2	Probability and Its Postulates	105
	<i>Classical Probability</i>	105
	<i>Permutations and Combinations</i>	106
	<i>Relative Frequency</i>	110
	<i>Subjective Probability</i>	111
3.3	Probability Rules	115
	<i>Conditional Probability</i>	117
	<i>Statistical Independence</i>	120
3.4	Bivariate Probabilities	126
	<i>Odds</i>	130
	<i>Overinvolvement Ratios</i>	130
3.5	Bayes' Theorem	136
	<i>Subjective Probabilities in Management Decision Making</i>	142
<b>CHAPTER 4</b>	<b>Discrete Random Variables and Probability Distributions</b>	<b>150</b>
4.1	Random Variables	151
4.2	Probability Distributions for Discrete Random Variables	152
4.3	Properties of Discrete Random Variables	156
	<i>Expected Value of a Discrete Random Variable</i>	156
	<i>Variance of a Discrete Random Variable</i>	157
	<i>Mean and Variance of Linear Functions of a Random Variable</i>	159
4.4	Binomial Distribution	163
	<i>Developing the Binomial Distribution</i>	164
4.5	Poisson Distribution	171
	<i>Poisson Approximation to the Binomial Distribution</i>	175
	<i>Comparison of the Poisson and Binomial Distributions</i>	176
4.6	Hypergeometric Distribution	177
4.7	Jointly Distributed Discrete Random Variables	180
	<i>Conditional Mean and Variance</i>	184
	<i>Computer Applications</i>	184
	<i>Linear Functions of Random Variables</i>	184
	<i>Covariance</i>	185
	<i>Correlation</i>	186
	<i>Portfolio Analysis</i>	190
<b>CHAPTER 5</b>	<b>Continuous Random Variables and Probability Distributions</b>	<b>201</b>
5.1	Continuous Random Variables	202
	<i>The Uniform Distribution</i>	205
5.2	Expectations for Continuous Random Variables	207
5.3	The Normal Distribution	210
	<i>Normal Probability Plots</i>	219
5.4	Normal Distribution Approximation for Binomial Distribution	223
	<i>Proportion Random Variable</i>	227
5.5	The Exponential Distribution	229
5.6	Jointly Distributed Continuous Random Variables	232
	<i>Linear Combinations of Random Variables</i>	236
	<i>Financial Investment Portfolios</i>	236
	<i>Cautions Concerning Finance Models</i>	240

<b>CHAPTER 6</b>	<b>Sampling and Sampling Distributions</b>	<b>248</b>
6.1	Sampling from a Population	249
	<i>Development of a Sampling Distribution</i>	250
6.2	Sampling Distributions of Sample Means	253
	<i>Central Limit Theorem</i>	258
	<i>Monte Carlo Simulations: Central Limit Theorem</i>	258
	<i>Acceptance Intervals</i>	264
6.3	Sampling Distributions of Sample Proportions	269
6.4	Sampling Distributions of Sample Variances	274
<b>CHAPTER 7</b>	<b>Estimation: Single Population</b>	<b>288</b>
7.1	Properties of Point Estimators	289
	<i>Unbiased</i>	290
	<i>Most Efficient</i>	291
7.2	Confidence Interval Estimation for the Mean of a Normal Distribution: Population Variance Known	295
	<i>Intervals Based on the Normal Distribution</i>	296
	<i>Reducing Margin of Error</i>	299
7.3	Confidence Interval Estimation for the Mean of a Normal Distribution: Population Variance Unknown	301
	<i>Student's <math>t</math> Distribution</i>	301
	<i>Intervals Based on the Student's <math>t</math> Distribution</i>	303
7.4	Confidence Interval Estimation for Population Proportion (Large Samples)	307
7.5	Confidence Interval Estimation for the Variance of a Normal Distribution	310
7.6	Confidence Interval Estimation: Finite Populations	313
	<i>Population Mean and Population Total</i>	313
	<i>Population Proportion</i>	316
7.7	Sample-Size Determination: Large Populations	319
	<i>Mean of a Normally Distributed Population, Known Population Variance</i>	319
	<i>Population Proportion</i>	321
7.8	Sample-Size Determination: Finite Populations	323
	<i>Sample Sizes for Simple Random Sampling: Estimation of the Population Mean or Total</i>	324
	<i>Sample Sizes for Simple Random Sampling: Estimation of Population Proportion</i>	325
<b>CHAPTER 8</b>	<b>Estimation: Additional Topics</b>	<b>332</b>
8.1	Confidence Interval Estimation of the Difference Between Two Normal Population Means: Dependent Samples	333
8.2	Confidence Interval Estimation of the Difference Between Two Normal Population Means: Independent Samples	337
	<i>Two Means, Independent Samples, and Known Population Variances</i>	337
	<i>Two Means, Independent Samples, and Unknown Population Variances Assumed to Be Equal</i>	339
	<i>Two Means, Independent Samples, and Unknown Population Variances Not Assumed to Be Equal</i>	341
8.3	Confidence Interval Estimation of the Difference Between Two Population Proportions (Large Samples)	344

<b>CHAPTER 9</b>	<b>Hypothesis Testing: Single Population</b>	<b>350</b>
9.1	Concepts of Hypothesis Testing	351
9.2	Tests of the Mean of a Normal Distribution: Population Variance Known	356
	<i>p-Value</i>	358
	<i>Two-Sided Alternative Hypothesis</i>	364
9.3	Tests of the Mean of a Normal Distribution: Population Variance Unknown	366
9.4	Tests of the Population Proportion (Large Samples)	370
9.5	Assessing the Power of a Test	372
	<i>Tests of the Mean of a Normal Distribution: Population Variance Known</i>	373
	<i>Power of Population Proportion Tests (Large Samples)</i>	375
9.6	Tests of the Variance of a Normal Distribution	379
<b>CHAPTER 10</b>	<b>Hypothesis Testing: Additional Topics</b>	<b>389</b>
10.1	Tests of the Difference Between Two Normal Population Means: Dependent Samples	391
	<i>Two Means, Matched Pairs</i>	391
10.2	Tests of the Difference Between Two Normal Population Means: Independent Samples	395
	<i>Two Means, Independent Samples, Known Population Variances</i>	395
	<i>Two Means, Independent Samples, Unknown Population Variances Assumed to Be Equal</i>	397
	<i>Two Means, Independent Samples, Unknown Population Variances Not Assumed to Be Equal</i>	400
10.3	Tests of the Difference Between Two Population Proportions (Large Samples)	403
10.4	Tests of the Equality of the Variances Between Two Normally Distributed Populations	407
10.5	Some Comments on Hypothesis Testing	410
<b>CHAPTER 11</b>	<b>Simple Regression</b>	<b>421</b>
11.1	Overview of Linear Models	422
11.2	Linear Regression Model	425
11.3	Least Squares Coefficient Estimators	431
	<i>Computer Computation of Regression Coefficients</i>	433
11.4	The Explanatory Power of a Linear Regression Equation	435
	<i>Coefficient of Determination, <math>R^2</math></i>	437
11.5	Statistical Inference: Hypothesis Tests and Confidence Intervals	442
	<i>Hypothesis Test for Population Slope Coefficient Using the F Distribution</i>	447
11.6	Prediction	450
11.7	Correlation Analysis	456
	<i>Hypothesis Test for Correlation</i>	456
11.8	Beta Measure of Financial Risk	460
11.9	Graphical Analysis	462
<b>CHAPTER 12</b>	<b>Multiple Regression</b>	<b>477</b>
12.1	The Multiple Regression Model	478
	<i>Model Specification</i>	478
	<i>Model Objectives</i>	480
	<i>Model Development</i>	481
	<i>Three-Dimensional Graphing</i>	484

12.2	Estimation of Coefficients	485
	<i>Least Squares Procedure</i>	486
12.3	Explanatory Power of a Multiple Regression Equation	492
12.4	Confidence Intervals and Hypothesis Tests for Individual Regression Coefficients	497
	<i>Confidence Intervals</i>	499
	<i>Tests of Hypotheses</i>	501
12.5	Tests on Regression Coefficients	509
	<i>Tests on All Coefficients</i>	509
	<i>Test on a Subset of Regression Coefficients</i>	510
	<i>Comparison of F and t Tests</i>	512
12.6	Prediction	515
12.7	Transformations for Nonlinear Regression Models	518
	<i>Quadratic Transformations</i>	519
	<i>Logarithmic Transformations</i>	521
12.8	Dummy Variables for Regression Models	526
	<i>Differences in Slope</i>	529
12.9	Multiple Regression Analysis Application Procedure	533
	<i>Model Specification</i>	533
	<i>Multiple Regression</i>	535
	<i>Effect of Dropping a Statistically Significant Variable</i>	536
	<i>Analysis of Residuals</i>	538
<b>CHAPTER 13</b>	<b>Additional Topics in Regression Analysis</b>	<b>555</b>
13.1	Model-Building Methodology	556
	<i>Model Specification</i>	556
	<i>Coefficient Estimation</i>	557
	<i>Model Verification</i>	558
	<i>Model Interpretation and Inference</i>	558
13.2	Dummy Variables and Experimental Design	558
	<i>Experimental Design Models</i>	562
	<i>Public Sector Applications</i>	567
13.3	Lagged Values of the Dependent Variable as Regressors	571
13.4	Specification Bias	575
13.5	Multicollinearity	578
13.6	Heteroscedasticity	581
13.7	Autocorrelated Errors	586
	<i>Estimation of Regressions with Autocorrelated Errors</i>	590
	<i>Autocorrelated Errors in Models with Lagged Dependent Variables</i>	594
<b>CHAPTER 14</b>	<b>Analysis of Categorical Data</b>	<b>606</b>
14.1	Goodness-of-Fit Tests: Specified Probabilities	607
14.2	Goodness-of-Fit Tests: Population Parameters Unknown	613
	<i>A Test for the Poisson Distribution</i>	613
	<i>A Test for the Normal Distribution</i>	615
14.3	Contingency Tables	618
14.4	Nonparametric Tests for Paired or Matched Samples	623
	<i>Sign Test for Paired or Matched Samples</i>	623
	<i>Wilcoxon Signed Rank Test for Paired or Matched Samples</i>	626
	<i>Normal Approximation to the Sign Test</i>	627

	<i>Normal Approximation to the Wilcoxon Signed Rank Test</i>	628
	<i>Sign Test for a Single Population Median</i>	630
<b>14.5</b>	<b>Nonparametric Tests for Independent Random Samples</b>	<b>632</b>
	<i>Mann-Whitney U Test</i>	632
	<i>Wilcoxon Rank Sum Test</i>	635
<b>14.6</b>	<b>Spearman Rank Correlation</b>	<b>638</b>
<b>14.7</b>	<b>A Nonparametric Test for Randomness</b>	<b>640</b>
	<i>Runs Test: Small Sample Size</i>	640
	<i>Runs Test: Large Sample Size</i>	642
<b>CHAPTER 15</b>	<b>Analysis of Variance</b>	<b>649</b>
<b>15.1</b>	<b>Comparison of Several Population Means</b>	<b>649</b>
<b>15.2</b>	<b>One-Way Analysis of Variance</b>	<b>651</b>
	<i>Multiple Comparisons Between Subgroup Means</i>	658
	<i>Population Model for One-Way Analysis of Variance</i>	659
<b>15.3</b>	<b>The Kruskal-Wallis Test</b>	<b>662</b>
<b>15.4</b>	<b>Two-Way Analysis of Variance: One Observation per Cell, Randomized Blocks</b>	<b>665</b>
<b>15.5</b>	<b>Two-Way Analysis of Variance: More Than One Observation per Cell</b>	<b>674</b>
<b>CHAPTER 16</b>	<b>Time-Series Analysis and Forecasting</b>	<b>688</b>
<b>16.1</b>	<b>Components of a Time Series</b>	<b>689</b>
<b>16.2</b>	<b>Moving Averages</b>	<b>693</b>
	<i>Extraction of the Seasonal Component Through Moving Averages</i>	696
<b>16.3</b>	<b>Exponential Smoothing</b>	<b>701</b>
	<i>The Holt-Winters Exponential Smoothing Forecasting Model</i>	704
	<i>Forecasting Seasonal Time Series</i>	708
<b>16.4</b>	<b>Autoregressive Models</b>	<b>712</b>
<b>16.5</b>	<b>Autoregressive Integrated Moving Average Models</b>	<b>717</b>
<b>CHAPTER 17</b>	<b>Additional Topics in Sampling</b>	<b>720</b>
<b>17.1</b>	<b>Stratified Sampling</b>	<b>720</b>
	<i>Analysis of Results from Stratified Random Sampling</i>	722
	<i>Allocation of Sample Effort Among Strata</i>	727
	<i>Determining Sample Sizes for Stratified Random Sampling with Specified Degree of Precision</i>	729
<b>17.2</b>	<b>Other Sampling Methods</b>	<b>733</b>
	<i>Cluster Sampling</i>	733
	<i>Two-Phase Sampling</i>	736
	<i>Nonprobabilistic Sampling Methods</i>	738
	<b>APPENDIX TABLES</b>	<b>742</b>
	<b>INDEX</b>	<b>787</b>
