

Jan Recker

Scientific Research in Information Systems

A Beginner's Guide

Second Edition

Springer

Contents

Part I Basic Principles of Research

1 Introduction.....	3
1.1 Welcome to the Information Systems Field!.....	3
1.2 Understanding Your Motivation to Pursue Research.....	7
1.3 The PhD Challenge.....	8
1.4 What This Book Is About.....	11
1.5 Further Reading.....	12
References.....	13
2 Information Systems Research as a Science.....	17
2.1 About Science.....	17
2.2 Scientific Knowledge.....	19
2.3 Scientific Inquiry.....	22
2.4 Essential Scientific Concepts.....	26
2.5 Further Reading.....	29
References.....	29

Part II Conducting Research

3 Planning Your Research.....	33
3.1 Research Questions.....	33
Motivation of the Research Question.....	36
Specification of the Research Question.....	37
Justification of the Research Question.....	38
3.2 Research Design.....	39
Intellectual Reasoning: Induction, Deduction, and Abduction....	40
Exploration, Rationalisation, and Validation.....	42
Choosing a Research Design.....	45
3.3 Research Methodology.....	48

3.4	The Role of Literature in the Research Process.....	52
3.5	Further Reading.....	55
	References.....	56
4	Theorising.....	59
4.1	What Is Theory?.....	59
	Definition of Theory.....	60
4.2	Building Blocks of Theory.....	61
	Constructs, Relationships, Mechanisms, and Boundary Conditions.....	61
	Constructs Can Play Multiple Roles in Theories.....	66
4.3	Types of Theory.....	68
4.4	Theorising as a Process.....	71
	An Example.....	74
4.5	Guidelines and Techniques for Theorising.....	78
4.6	Further Reading.....	81
	References.....	82
5	Research Methods.....	87
5.1	Quantitative Methods.....	88
	Quantitative Methods Depend on Measurement.....	91
	Validity.....	93
	Reliability.....	96
	Processes for Developing and Assessing Measures and Measurements.....	97
	Types of Quantitative Methods: Survey Research.....	100
	Types of Quantitative Methods: Experimental Research.....	106
5.2	Qualitative Methods.....	114
	Data Collection Techniques.....	117
	Data Analysis Techniques.....	120
	Rigor in Qualitative Research.....	123
	Types of Qualitative Methods: Case Study.....	123
	Types of Qualitative Methods: Action Research.....	129
	Types of Qualitative Methods: Grounded Theory.....	132
5.3	Design Science Methods.....	135
5.4	Computational Methods.....	138
	Digital Trace Data.....	138
	Computational Data Processing and Analysis.....	141
5.5	Mixed Methods.....	143
5.6	Further Reading.....	146
	References.....	149

Part III Publishing Research

6 Writing IS Research Articles.....	163
6.1 Why Publishing Is Important.....	163
6.2 How Publishing Works.....	166
6.3 Preparing Publications.....	168
The Publishing Process.....	169
Key Publishing Decisions.....	170
Managing Co-Authorship.....	172
The Pre-Submission Lifecycle.....	175
6.4 Writing a Paper.....	177
Structuring Your Paper.....	178
Writing an Introduction.....	179
Writing a Background Section.....	181
Writing About Your Research Model, Your Theory, or Your Hypotheses.....	182
Writing About Your Procedures, Your Research Approach, Your Methods, or Your Research Design.....	183
Writing About Results, Findings, or Outcomes.....	185
Writing the Discussion Section.....	185
Writing About Implications.....	186
Writing a Conclusion.....	188
Writing an Abstract.....	188
6.5 Revising a Paper.....	189
Understanding Reviews.....	189
Revising a Paper Based on Reviews.....	191
6.6 Further Reading.....	194
References.....	195
7 Ethical Considerations in Research.....	197
7.1 The Role of Ethics in Research.....	197
Problems with Scientific Ethics in Research Practice.....	198
7.2 Ethical Considerations for Scientific Conduct.....	201
Examples I Have Encountered.....	204
7.3 Ethical Considerations for Scientific Writing.....	206
Examples I Have Encountered.....	209
7.4 Further Reading.....	211
References.....	213
8 Concluding Remarks.....	215
Index	217
