

BUSINESS RESEARCH METHODS

SIXTH EDITION

Emma BELL Alan BRYMAN Bill HARLEY

OXFORD
UNIVERSITY PRESS

BRIEF CONTENTS

PART ONE THE RESEARCH PROCESS

1

1	The nature and process of business research	3
2	Business research strategies	18
3	Research designs	46
4	Planning a research project and developing research questions	76
5	Getting started: reviewing the literature	91
6	Ethics in business research	111
7	Writing up business research	137

PART TWO QUANTITATIVE RESEARCH

163

8	The nature of quantitative research	165
9	Sampling in quantitative research	187
10	Structured interviewing	209
11	Self-completion questionnaires	228
12	Asking questions	249
13	Quantitative research using naturally occurring data	269
14	Secondary analysis and official statistics	291
15	Quantitative data analysis: descriptive, univariate, and bivariate statistics	310
16	Quantitative data analysis: hypothesis testing and inferential statistics	335

PART THREE QUALITATIVE RESEARCH

359

17	The nature of qualitative research	361
18	Sampling in qualitative research	387
19	Ethnography and participant observation	402
20	Interviewing in qualitative research	426
21	Focus groups	453
22	Language in qualitative research	472
23	Documentary data	489
24	Visual qualitative research	502
25	Qualitative data analysis	527

PART FOUR MIXED METHODS RESEARCH

551

26	Breaking down the quantitative/qualitative divide	553
27	Mixed methods research: combining quantitative and qualitative research	565

DETAILED CONTENTS

Acronyms and abbreviations	xxv
About the authors	xxvii
About the students and supervisors	xxix
Guide to using this book	xxxi
Resources for lecturers	xxxiv
About the book	xxxv
Acknowledgements	xli
Editorial Advisory Panel	xlii
Publisher credits	xliii

PART ONE THE RESEARCH PROCESS 1

Chapter 1 The nature and process of business research	3
Introduction: what is business research and why do it?	4
Key considerations in business research methods	5
Relevance to practice	6
The process of business research	8
Literature review	8
Concepts and theories	8
Research questions	9
Sampling	9
Data collection	10
Data analysis	12
Writing up	13
The messiness of business research	15
Key points	16
Questions for review	16
Chapter 2 Business research strategies	18
Introduction: the nature of business research	19
Theory and research	20
What is theory?	20
Deductive and inductive logics of inquiry	21
Philosophical assumptions in business research	26
Ontological considerations	27
Objectivism	27
Constructionism	28
Epistemological considerations	30
A natural science epistemology: positivism	30
Interpretivism	31
Research paradigms	35
Developing a research strategy: quantitative or qualitative?	36

	Other considerations	38
	Values	38
	Practicalities	40
	Key points	43
	Questions for review	44
Chapter 3	Research designs	46
	Introduction	47
	Quality criteria in business research	48
	Reliability	48
	Replicability	48
	Validity	48
	Research designs	50
	Experimental design	50
	Cross-sectional design	59
	Longitudinal design	63
	Case study design	63
	Comparative design	69
	Levels of analysis	72
	Bringing research strategy and research design together	72
	Key points	73
	Questions for review	74
Chapter 4	Planning a research project and developing research questions	76
	Introduction	77
	Planning your research project	77
	Getting to know what is expected of you by your university	77
	Thinking about your research area	77
	Using your supervisor	77
	Managing time and resources	80
	Developing suitable research questions	82
	Criteria for evaluating research questions	86
	Writing your research proposal	87
	Checklist	89
	Key points	89
	Questions for review	90
Chapter 5	Getting started: reviewing the literature	91
	Introduction	92
	Reviewing the literature	93
	Reading critically	93
	Systematic review	94
	Narrative and integrative reviews	98
	Searching databases	100
	Online databases	100
	Keywords and defining search parameters	103
	Making progress	104
	Referencing	104
	Avoiding plagiarism	107

	Checklist	108
	Key points	109
	Questions for review	109
Chapter 6	Ethics in business research	111
	Introduction	112
	Ethical principles	113
	Avoidance of harm	113
	Informed consent	117
	Privacy	121
	Preventing deception	122
	Stances on research ethics	122
	Other ethical and legal considerations	126
	Data management	126
	Copyright	126
	Affiliation and conflicts of interest	127
	Visual methods and research ethics	128
	Ethical considerations in online research	129
	The political context of business research	132
	Checklist	134
	Key points	135
	Questions for review	135
Chapter 7	Writing up business research	137
	Introduction	138
	Writing academically	138
	Writing up your research	140
	Start early	141
	Be persuasive	141
	Get feedback	141
	Use inclusive language	143
	Structure your writing	145
	Writing up quantitative and qualitative research	149
	An example of quantitative research	149
	An example of qualitative research	152
	Reflexivity and writing differently	158
	Checklist	159
	Key points	160
	Questions for review	161

PART TWO QUANTITATIVE RESEARCH

163

Chapter 8	The nature of quantitative research	165
	Introduction	166
	The main steps in quantitative research	166
	Concepts and their measurement	169
	What is a concept?	169
	Why measure?	170
	Indicators	170
	Dimensions of concepts	170

Reliability and validity of measures	174
Reliability of measures	174
Validity of measures	175
The connection between reliability and validity	176
The main preoccupations of quantitative researchers	177
Measurement	177
Causality	178
Generalization	179
Replication	179
The critique of quantitative research	182
Criticisms of quantitative research	182
Is it always like this?	183
Reverse operationism	183
Reliability and validity testing	184
Sampling	184
Key points	185
Questions for review	185
Chapter 9 Sampling in quantitative research	187
Introduction	188
The importance of a representative sample	189
Sampling error	191
Types of probability sample	193
Simple random sample	193
Systematic sample	193
Stratified random sampling	194
Multi-stage cluster sampling	194
The qualities of a probability sample	195
Sample size	197
Absolute and relative sample size	197
Time and cost	198
Non-response	198
Heterogeneity of the population	199
Types of non-probability sampling	199
Convenience sampling	200
Quota sampling	201
Limits to generalization	203
Error in survey research	204
Sampling issues for online surveys	204
Key points	207
Questions for review	207
Chapter 10 Structured interviewing	209
Introduction	210
The structured interview	210
Reducing error due to interviewer variability	211
Accuracy and ease of data processing	211
Other types of interview	212
Interview contexts	214

More than one interviewee	214
More than one interviewer	214
In person or by phone or video call?	214
Computer-assisted interviewing	216
Conducting interviews	217
Know the schedule	217
Introducing the research	217
Rapport	218
Asking questions	218
Recording answers	219
Clear instructions	219
Question order	219
Probing	222
Prompting	222
Leaving the interview	223
Training and supervision	223
Problems with structured interviewing	224
Characteristics of interviewers	224
Response sets	224
The problem of meaning	225
Key points	226
Questions for review	227
Chapter 11 Self-completion questionnaires	228
Introduction	229
Different kinds of self-completion questionnaires	229
Evaluating the self-completion questionnaire in relation to the structured interview	229
Advantages of the self-completion questionnaire over the structured interview	230
Disadvantages of the self-completion questionnaire in comparison to the structured interview	231
Steps to improve response rates to postal and online questionnaires	232
Designing the self-completion questionnaire	235
Do not cramp the presentation	235
Clear presentation	235
Vertical or horizontal closed answers?	235
Identifying response sets in a Likert scale	237
Clear instructions about how to respond	237
Keep question and answers together	237
Online surveys	237
Comparing modes of survey administration	240
Diaries as a form of self-completion questionnaire	243
Advantages and disadvantages of the diary as a method of data collection	246
Experience and event sampling	246
Key points	247
Questions for review	248

Chapter 12 Asking questions	249
Introduction	250
Open or closed questions?	250
Open questions	250
Closed questions	251
Types of question	253
Rules for designing questions	254
General rules of thumb	254
Specific rules when designing questions	256
Vignette questions	261
Piloting and pre-testing questions	263
Using existing questions	263
Checklist	266
Key points	267
Questions for review	267
Chapter 13 Quantitative research using naturally occurring data	269
Introduction	270
Structured observation	270
The observation schedule	272
Strategies for observing behaviour	272
Sampling for structured observation	273
Sampling people	273
Sampling in terms of time	273
Further sampling considerations	273
Limitations of structured observation	274
Issues of reliability and validity	274
Criticisms of structured observation	276
Content analysis	276
What are the research questions?	278
Selecting a sample for content analysis	278
Sampling media	278
Sampling dates	279
What is to be counted?	280
Significant actors	280
Words	280
Subjects and themes	281
Dispositions	281
Images	281
Coding in content analysis	282
Coding schedule	282
Coding manual	282
Potential pitfalls in devising coding schemes	285
Advantages and disadvantages of content analysis	286
Advantages	286
Disadvantages	287
Key points	288
Questions for review	288

Chapter 14	Secondary analysis and official statistics	291
	Introduction	292
	Using data collected by others	292
	Advantages of secondary analysis	293
	Limitations of secondary analysis	298
	Accessing data archives	299
	Big data	300
	Archival proxies and meta-analysis	304
	Official statistics	305
	Reliability and validity	306
	Official statistics as a form of unobtrusive measure	306
	Key points	308
	Questions for review	308
Chapter 15	Quantitative data analysis: descriptive, univariate, and bivariate statistics	310
	Introduction	311
	A sample research project	312
	Getting to know and describing your data	314
	Common types of variables	314
	Data cleaning and scale construction	316
	Descriptive and univariate statistics	318
	Frequencies and distributions	318
	Bivariate statistics	326
	Covariance and correlation	326
	Contingency tables	332
	Mean comparisons	332
	Key points	333
	Questions for review	333
Chapter 16	Quantitative data analysis: hypothesis testing and inferential statistics	335
	Introduction	336
	Significance testing and effect sizes	336
	Null-hypothesis significance testing	338
	Common inferential statistics for prediction	342
	Regression	342
	Analysis of Variance (ANOVA)	352
	Key points	356
	Questions for review	357

PARTTHREE QUALITATIVE RESEARCH

359

Chapter 17	The nature of qualitative research	361
	Introduction	362
	The main steps in qualitative research	363
	Theory and research	366
	Concepts in qualitative research	367

Reliability and validity in qualitative research	368
Adapting reliability and validity for qualitative research	368
Alternative criteria for evaluating qualitative research	369
Overview of the issue of criteria	371
The main preoccupations of qualitative researchers	372
Seeing through the eyes of people being studied	372
Description and emphasis on context	373
Emphasis on process	374
Flexibility and limited structure	374
Concepts and theory grounded in data	375
The critique of qualitative research	375
Too subjective	375
Difficult to replicate	375
Problems of generalization	376
Lack of transparency	376
Is it always like this?	377
Contrasts and similarities between quantitative and qualitative research	378
Contrasts	378
Similarities	379
Researcher–participant relationships	380
Action research	380
Feminist research	381
Decolonial and indigenous research	382
Key points	385
Questions for review	385
Chapter 18 Sampling in qualitative research	387
Introduction	388
Levels of sampling	389
Purposive sampling	390
Theoretical sampling	390
Generic purposive sampling	393
Snowball sampling	394
Sample size	396
Not just people	399
Using more than one sampling approach	399
Key points	400
Questions for review	401
Chapter 19 Ethnography and participant observation	402
Introduction	403
Organizational ethnography	403
Access	406
Overt versus covert?	407
Ongoing access	409
Key informants	411

Roles for ethnographers	412
Active or passive?	413
Shadowing	414
Field notes	414
Types of field notes	415
Bringing ethnographic fieldwork to an end	416
Other types of ethnographic research	416
Feminist ethnography	416
Global and multi-site ethnography	417
Digital ethnography	418
Writing ethnography	420
Realist tales	420
Other approaches	422
Key points	423
Questions for review	424
Chapter 20 Interviewing in qualitative research	426
Introduction	427
Differences between structured interviewing and the qualitative interview	427
Asking questions	428
Preparing an interview guide	430
Kinds of questions	433
Using an interview guide: an example	434
Recording, transcription, and translation	436
Flexibility in interviewing	439
Non-face-to-face interviews	440
Telephone interviewing	441
Online interviews	441
Video interviewing	442
Other approaches to qualitative interviewing	444
Feminist interviewing	444
Critical incident interviewing	446
Life history interviews	447
Merits and limitations of qualitative interviewing	448
Advantages of qualitative interviews	448
Disadvantages of qualitative interviews	449
Checklist	450
Key points	451
Questions for review	451
Chapter 21 Focus groups	453
Introduction	454
Uses of focus groups	455
Commercial use of focus groups	455
Conducting focus groups	456
Recording and transcription	456
How many groups?	456
Size of groups	458

Level of moderator involvement	458
Selecting participants	460
Asking questions	461
Beginning and finishing	462
Interaction in focus groups	462
Focus groups as an emancipatory method	463
Online focus groups	464
Limitations of focus groups	468
Checklist	470
Key points	470
Questions for review	471
Chapter 22 Language in qualitative research	472
Introduction	473
Discourse analysis	473
Main features of discourse analysis	474
Detailed procedures	476
Critical discourse analysis	478
Strengths and limitations of discourse analysis	480
Narrative analysis	481
Rhetorical analysis	483
Conversation analysis	484
Key points	487
Questions for review	488
Chapter 23 Documentary data	489
Introduction	490
Personal documents	491
Public documents	492
Organizational documents	494
Media outputs	495
Documents as 'texts'	496
Interpreting documentary data	497
Qualitative content analysis	498
Historical analysis	498
Checklist	500
Key points	500
Questions for review	501
Chapter 24 Visual qualitative research	502
Introduction	503
The visual turn in business research	503
The main approaches to visual research	505
Research generated images	506
Taking photographs	506
Video recordings	509
Visual arts-based methods	510
Already existing visual material	514
Found photographs and online images	514
Material objects	518
Visual ethnography	520

Interpreting the visual	521
Grounded visual pattern analysis	522
Semiotic and multimodal analysis	522
Key points	524
Questions for review	525
Chapter 25 Qualitative data analysis	527
Introduction	528
Thematic analysis	529
Grounded theory	532
Tools of grounded theory	532
Outcomes of grounded theory	533
Memos	536
Criticisms of grounded theory	536
More on coding	542
Steps and considerations in coding	542
Turning data into fragments	543
The critique of coding	544
Secondary analysis of qualitative data	545
Using data analysis software in qualitative research	547
Key points	549
Questions for review	549
PARTFOUR MIXED METHODS RESEARCH	551
Chapter 26 Breaking down the quantitative/qualitative divide	553
Introduction	554
The natural science model and qualitative research	554
Quantitative research: interpretivism and constructionism	556
Interpretivism	556
Constructionism	557
Epistemological and ontological considerations	557
Problems with the quantitative/qualitative contrast	558
Behaviour versus meaning	558
Theory tested in research versus theory emergent from data	558
Numbers versus words	558
Artificial versus natural	559
Reciprocal analysis	560
Qualitative analysis of quantitative data	560
Quantitative analysis of qualitative data	561
Quantification in qualitative research	561
Thematic analysis	562
Quasi-quantification in qualitative research	562
Combating anecdotalism through limited quantification	562
Key points	563
Questions for review	563
Chapter 27 Mixed methods research: combining quantitative and qualitative research	565
Introduction	566
The debates surrounding mixed methods research	566

xviii Detailed Contents

The arguments against mixed methods research	566
Two versions of the debate about quantitative and qualitative research	567
The rise of mixed methods research	568
Classifying mixed methods research in terms of priority and sequence	569
Different types of mixed methods design	570
Approaches to mixed methods research	572
The logic of triangulation	572
Qualitative research facilitates quantitative research	573
Quantitative research facilitates qualitative research	573
Filling in the gaps	575
Static and processual features	575
Research issues and participants' perspectives	576
The problem of generality	576
Interpreting the relationship between variables	577
Studying different aspects of a phenomenon	578
Solving a puzzle	581
Quality issues in mixed methods research	583
Key points	584
Questions for review	584
Glossary	587
References	597
Name index	623
Subject index	629
