<i>Introduction to Innovation for Entrepreneurs: mindful, meaningful innovation x</i>	
<b>1 Types of innovation</b>	<b>1</b>
Introduction	1
The difference between innovation and invention	1
What are the major types of innovation?	2
<b>2 Finding the right problem to solve</b>	<b>12</b>
Purpose	12
Introduction	12
Kevin realizes a purpose for his life's work	13
Understanding and acting on your core values	14
Building upon natural skills with learning through classes and internships	16
Finding a problem to solve that aligns with your core values and personal skills	19
From the problem to solve to a product idea, and then to a new business	21
Now, it is your turn	24
Defining purpose, fulfillment, and happiness	26
<b>3 Forming a team</b>	<b>29</b>
Introduction	29
Building an innovation team	29
Creating discussion groups by problemspaces	31
Finding shared, compatible core values, and passions	32
Building the team: Mel's principle	34
Now, recruit team members onto your team	36
<b>4 Ideation - for and with the user</b>	<b>38</b>
The purpose of the chapter	38
Let's get started: meet Kate	38
Design thinking and rapid prototyping - to improve the experience of the target user	40
Let's start to ideate, with methods	44
Ideating: come up with the initial innovation hypothesis	45
Customer Experience Mapping	48
Next, Mind Mapping for looking at different solution pathways	52

Prioritizing solution pathways and design alternatives	55
Let's develop a Customer Value Proposition	57
Drink Simple takes flight	59
<b>5 Users, buyers, and use cases</b>	<b>64</b>
The purpose of the chapter	64
Customer segmentation: users, buyers, use cases	65
The fundamental importance of understanding use cases	66
Factor in the buyer (when s/he is not the actual user)	67
Two simple templates for user/buyer/use case segmentation	69
Chocolate innovation and the case of My M&M's	72
Generalizing from My M&M's to your project	76
<b>6 Gaining insight into user needs</b>	<b>81</b>
The purpose of the chapter	81
User-centered design to improve the user's experience	82
Karthik's journey of personal and user discovery	82
The power of understanding use cases	84
dump into the hearts and minds of your users	85
Doing the interviewing: "field research"	86
What is a reasonable number of interviews for concept development?	86
Interview target users in their places of use and purchase	88
Effective conversations with target users	89
Prepare a discussion guide	89
Laddering interviewees: the power of "why?"	92
Finding deeper insights from the interviews: look for perceived and latent needs	93
Understand the full use case: look at the before, during, and after	97
Develop a persona of the target user and buyer	100
An epilogue (as of January 2021) to Karthik's journey of user discovery	104
<b>7 Product and service design</b>	<b>110</b>
. The purpose of the chapter	110
Achieving elegance in the design of new products and services	111
It's the benefits of the technology that matters, not the technology itself	113
Step 1: create a concept sketch or storyboard for a new product or service	114
Step 2: define the product or service architecture	120

## CONTENTS

For software products or apps, specify the software stack as its architecture	122
Defining architecture for a service innovation	123
Deciding how to implement subsystem functionality: the beauty of composite design	127
Design the styling or GUI, and the packaging	131
<b>Competitive analysis, positioning, and branding</b>	<b>135</b>
The purpose of the chapter	135
Pause and take a deep breath: are you ready to proceed forward?	136
Let's meet... dosh and Manny!	136
The importance of competitive positioning	137
Step 1: competitive analysis on features and price	140
Slate's competitive analysis matrix	142
Step 2: define competitive positioning	145
Slate's competitive positioning	150
Step 3: create a brand strategy	150
Creating a brand architecture for your product or service	152
Slate's branding strategy	155
Slate becomes an operational, growing business	156
A final thought: craft a brand story	158
<b>Defining the prototype</b>	<b>161</b>
The purpose of the chapter	161
Prototyping a new idea	161
Two specific MVP design templates	162
Prototype design specifications for a physical assembled product	165
Prototype design specifications for a new food or drink product	166
Prototype design specifications for a software system or app	171
Design specification for a new service	175
Defining the level of the prototype you should build for this class	177
<b>10 Understand the broader market opportunity and industry ecosystem</b>	<b>182</b>
The purpose of the chapter	182
TAM, SAM, SOM; sizing your market niche	183
A B2B example	187
Building the story for TAM, SAM, and SOM	188
Industry ecosystem mapping	189

<b>11</b>	<b>Creating a product line and platform strategy</b>	<b>194</b>
	-The purpose of the chapter	194
	Giving customers choice with a product line, not a single product	194
	Platforming: more definitions	197
	A food example	198
	Software applications	201
	A services example	204
	Providing variety and choice within a product line or services	205
<b>12</b>	<b>Conducting a Reality Check</b>	<b>212</b>
	The purpose of the chapter	212
	The first step: tuning the Customer Value Proposition	213
	The questions needed for the Reality Check	214
	Organizing the panels of respondents	216
	Let's explore the survey methods with an example	217
	Analyzing your data and interpreting the results	219
	Validating your product or service design	219
	Validating the go-to-market strategy	220
	Product line or service extensions	221
	Testing a brand name	223
	Summarizing everything into several important templates	224
<b>13</b>	<b>The final presentation: guidelines and next steps</b>	<b>229</b>
	Introduction	229
	A structure for the presentation: a story wheel	229
	The verbal presentation	232
	<i>Index</i>	235
