<i>About the Authors</i>	ix
<i>Preface to the Fifth Edition</i>	xi
PART 1 PRODUCING A PROPOSAL	1
1 Introduction	3
1.1 The concept of research	3
1.1.1 Research: a careful search/investigation	4
1.1.2 Research: contribution to knowledge	4
1.1.3 A learning process	6
1.1.4 Contextual factors affecting research	6
1.2 Classifications of research	7
1.2.1 Pure and applied research	7
1.2.2 Quantitative and qualitative research	8
1.2.3 Other categories of research	11
1.3 Theories and paradigms	12
1.3.1 Development of knowledge	13
1.3.2 Testing a theory	16
1.3.3 Paradigms	19
1.3.4 Positivism	20
1.3.5 Interpretivism	21
1.3.6 Pragmatism	23
1.3.7 Models and hypotheses	23
1.4 Research styles	25
1.4.1 Action research	25
1.4.2 Ethnographic research	26
1.4.3 Surveys	27
1.4.4 Case studies	28
1.4.5 Experiments	29
1.5 Quantitative and qualitative approaches	31
1.5.1 Quantitative approaches	32
1.5.2 Qualitative approaches	32
1.5.3 Triangulated studies	32
1.5.4 Data sources	33
1.6 Where to begin	35
1.7 Summary	36
References	37

3.7	Theoretical models and constructs	97
3.7.1	Theoretical model	98
3.7.2	Constructs	100
3.8	Proper referencing	101
3.9	Summary	103
	Notes	104
	References	104
4	Approaches to Empirical Work	110
4.1	Starting data collection	110
4.2	Experience	111
4.3	Reasoning and inference	112
4.3.1	Sensemaking	114
4.3.2	Motivated reasoning	115
4.3.3	Determinism and stochasticism	117
4.3.4	Complexity	119
4.4	Systems of methods	122
4.5	Research design	123
4.5.1	Context	126
4.5.2	Variance and errors	126
4.5.3	Empiricism, rationalism, and verification	127
4.6	Qualitative and quantitative approaches	129
4.6.1	When are qualitative approaches employed?	130
4.6.2	When are quantitative approaches employed?	134
4.7	Experimental	135
4.7.1	Experiments and quasi-experiments	135
4.7.2	Variables	138
4.7.3	Experimental control	141
4.7.4	Replication	142
4.7.5	Between-subjects design (simple randomised experiments)	143
4.7.6	Between-subjects design (matched randomised groups)	143
4.7.7	Within-subject design (repeated measure design)	144
4.7.8	Factorial experiments	145
4.8	Survey	145
4.9	Secondary	147
4.9.1	Archival	149
4.9.2	Meta-analysis	150
4.10	Case study	151
4.11	Ethnographic	155
4.11.1	Ethnography	156
4.11.2	Ethnomethodology	158
4.12	Action	158
4.13	Grounded theory (development of theory from data)	159
4.14	Narrative	162

3.7	Theoretical models and constructs	97
	3.7.1 Theoretical model	98
	3.7.2 Constructs	100
3.8	Proper referencing	101
3.9	Summary	103
	Notes	104
	References	104
4	Approaches to Empirical Work	110
4.1	Starting data collection	110
4.2	Experience	111
4.3	Reasoning and inference	112
	4.3.1 Sensemaking	114
	4.3.2 Motivated reasoning	115
	4.3.3 Determinism and stochasticism	117
	4.3.4 Complexity	119
4.4	Systems of methods	122
4.5	Research design	123
	4.5.1 Context	126
	4.5.2 Variance and errors	126
	4.5.3 Empiricism, rationalism, and verification	127
4.6	Qualitative and quantitative approaches	129
	4.6.1 When are qualitative approaches employed?	130
	4.6.2 When are quantitative approaches employed?	134
4.7	Experimental	135
	4.7.1 Experiments and quasi-experiments	135
	4.7.2 Variables	138
	4.7.3 Experimental control	141
	4.7.4 Replication	142
	4.7.5 Between-subjects design (simple randomised experiments)	143
	4.7.6 Between-subjects design (matched randomised groups)	143
	4.7.7 Within-subject design (repeated measure design)	144
	4.7.8 Factorial experiments	145
4.8	Survey	145
4.9	Secondary	147
	4.9.1 Archival	149
	4.9.2 Meta-analysis	150
4.10	Case study	151
4.11	Ethnographic	155
	4.11.1 Ethnography	156
	4.11.2 Ethnomethodology	158
4.12	Action	158
4.13	Grounded theory (development of theory from data)	159
4.14	Narrative	162

4.15	Modelling	163
4.15.1	Classification of models	163
4.15.2	Deterministic and stochastic models	164
4.15.3	The modelling process	165
4.16	Simulation	166
4.16.1	Dynamism	166
4.16.2	Heuristics	166
4.16.3	Approaches	167
4.17	Level of research	168
4.18	Practice-based research	171
4.19	Summary	175
	References	176
5	Hypotheses	182
5.1	Essentials of a valid hypothesis	182
5.2	Roles of hypotheses	185
5.3	Objective testing of hypotheses	187
5.4	Role of sampling	188
5.5	Common statistical measures	191
5.5.1	Normal distribution	196
5.6	Null hypotheses	198
5.7	Validities	199
5.8	Summary	202
	References	202
6	Data Collection	204
6.1	Data requirements	204
6.2	Sources of quantitative data	207
6.3	Collecting data from respondents	210
6.3.1	Questionnaires	213
6.3.2	Interviews	215
6.4	Case studies	218
6.5	Triangulation	218
6.6	Sampling	219
6.6.1	Sample size	223
6.7	Scales of measurement	227
6.7.1	Scaling techniques (non-metric and metric)	229
6.7.2	Non-comparative (metric) scales	229
6.7.3	Comparative (non-metric) scales	230
6.7.4	Common scaling methods	231
6.7.5	Development of multi-item scales	233
6.8	Obtaining data	235
6.9	Translation	243
6.10	Response styles and biases	244
6.11	Summary	246
	References	247

7	Data Analysis	251
7.1	Analysing data	251
7.2	Plotting data	256
7.3	Statistical methods	260
7.4	Non-parametric tests	261
7.4.1	Sign test	261
7.4.2	Rank-sum tests	262
7.4.3	Chi-square (χ^2) test	266
7.4.4	Goodness of fit	267
7.5	Parametric tests	267
7.5.1	t-Test	268
7.5.2	Analysis of variance (ANOVA)	268
7.5.3	Regression and correlation	271
7.5.4	Multiple regression	276
7.5.5	Time series	277
7.5.6	Index numbers	282
7.5.7	Simple average index	283
7.5.8	Chained index	287
7.6	Other analytical techniques	289
7.6.1	Cluster analysis	289
7.6.2	Factor analysis	290
7.6.3	Path analysis	292
7.6.4	Analytic hierarchy process (AHP)	295
7.7	Analysis of qualitative data	296
7.7.1	Analysing documents (from texts)	297
7.7.2	Conversation analysis	299
7.7.3	Discourse analysis	300
7.7.4	Social network analysis	301
7.7.5	Multi-level research	303
7.7.6	Meta-analysis	304
7.7.7	Longitudinal research	304
7.8	Summary	305
	References	306
8	Ethics in Research	310
8.1	The concepts of morals and ethics	310
8.2	Research ethics	314
8.2.1	Theory and literature	317
8.2.2	Data collection, use, and disposal	318
8.3	Data analysis, intellectual property, and data protection	320
8.3.1	Data analysis, results, and reporting	320
8.3.2	Intellectual property	322
8.3.3	Data protection	322
8.4	Equality, diversity, and inclusion	323
8.5	Summary	327
	References	328

PART 3	REPORTING THE RESULTS	331
9	Results, Inferences, and Conclusions	333
9.1	Requirements for valid results	333
9.2	Potential sources of error	334
9.3	Reliability	335
9.4	Results	336
9.4.1	Producing the results	336
9.4.2	Introductory results	337
9.4.3	Substantive results	338
9.4.4	Inferences	339
9.4.5	Causal relationships	340
9.4.6	Interpretation	341
9.5	Conclusions	345
9.5.1	How to write conclusions	345
9.5.2	Further research	347
9.6	Summary	347
	References	348
10	Reports and Presentations	349
10.1	Report production	349
10.2	Communication	350
10.3	Contents of the report	352
10.3.1	How to begin	352
10.3.2	Text of the report	353
10.3.3	Theory and literature	354
10.3.4	Reporting on methodology and methods	356
10.3.5	Reporting on data sourcing and data collection	356
10.3.6	Presentation of results	357
10.3.7	Discussion of results	358
10.3.8	Conclusions	358
10.3.9	Limitations	359
10.3.10	Recommendations	359
10.3.11	Introduction	360
10.3.12	Remainder of the report	360
10.4	Oral presentation	361
10.5	Summary	362
	References	362
	<i>Index</i>	363
